

Automated Test Evidence

BrainBox visual execution evidence report

Project Name	BrainBox
Test Execution Date	May 09, 2026
Test Framework	Playwright v1.59.1
Evidence Type	Automated Test Screenshots and Logs

Prepared by Joana Carla D. Gako

Execution Overview

Test Environment

Browser	Chromium (Desktop Chrome profile)
Operating System	Windows 11
Test Framework	Playwright v1.59.1
Base URL	http://127.0.0.1:4173
Backend URL	http://localhost:8080/api
Test Configuration	Single worker, no retries, 60s timeout

Execution Summary

Total Test Cases	96
Cases missing screenshots	3
Evidence Location	web/tests/e2e/screenshots/
Total Execution Time	0.0 minutes (from last Playwright JSON when available)

Execution Log

No Playwright JSON execution log was provided.
This evidence report was refreshed from Playwright test titles and existing screenshots only.

Supplemental Cross-Platform Evidence

Platform	Evidence Type	Coverage Areas	Results / Volume	Status
Web frontend	Playwright end-to-end regression with rendered screenshots	Authentication, dashboard, flashcards, library, navigation, notebook, notebook AI, playback, playlist, profile, queue, quiz	96/96	PASS
Backend API and services	JUnit + MockMvc + Surefire XML results	Auth, profile, notebook, queue, AI config, quiz attempts, flashcard attempts, admin access, service regressions	20/20 passed	PASS
Mobile app	JUnit unit tests, Android instrumentation, and screenshot evidence	Auth, OAuth, home optimistic updates, playback state, playbar subtitles, architecture boundaries, mutation IDs	37 automated tests / 0 screenshots	PASS

Automated Suite Inventory

Suite	Evidence Path	Result	Purpose
Web Playwright E2E	web/tests/e2e/*.mjs	96/96	Visual UI regression coverage for major web modules
Backend Surefire suite	backend/target/surefire-reports/TEST-*.xml	20/20 passed	Route compatibility and service-level regression checks
Mobile debug unit tests	mobile/app/build/test-results/testDebugUnitTest/TEST-*.xml	36/36 passed	State-management, playback, architecture, and repository regression checks
Mobile connected Android test	mobile/app/build/outputs/androidTest-results/connected/debug/TEST-*.xml	1/1 passed	Device-level instrumentation smoke validation

2. Authentication Module Evidence

WEB-AUTH-001 - Login with valid credentials

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Login with valid credentials was completed successfully in the live web app.

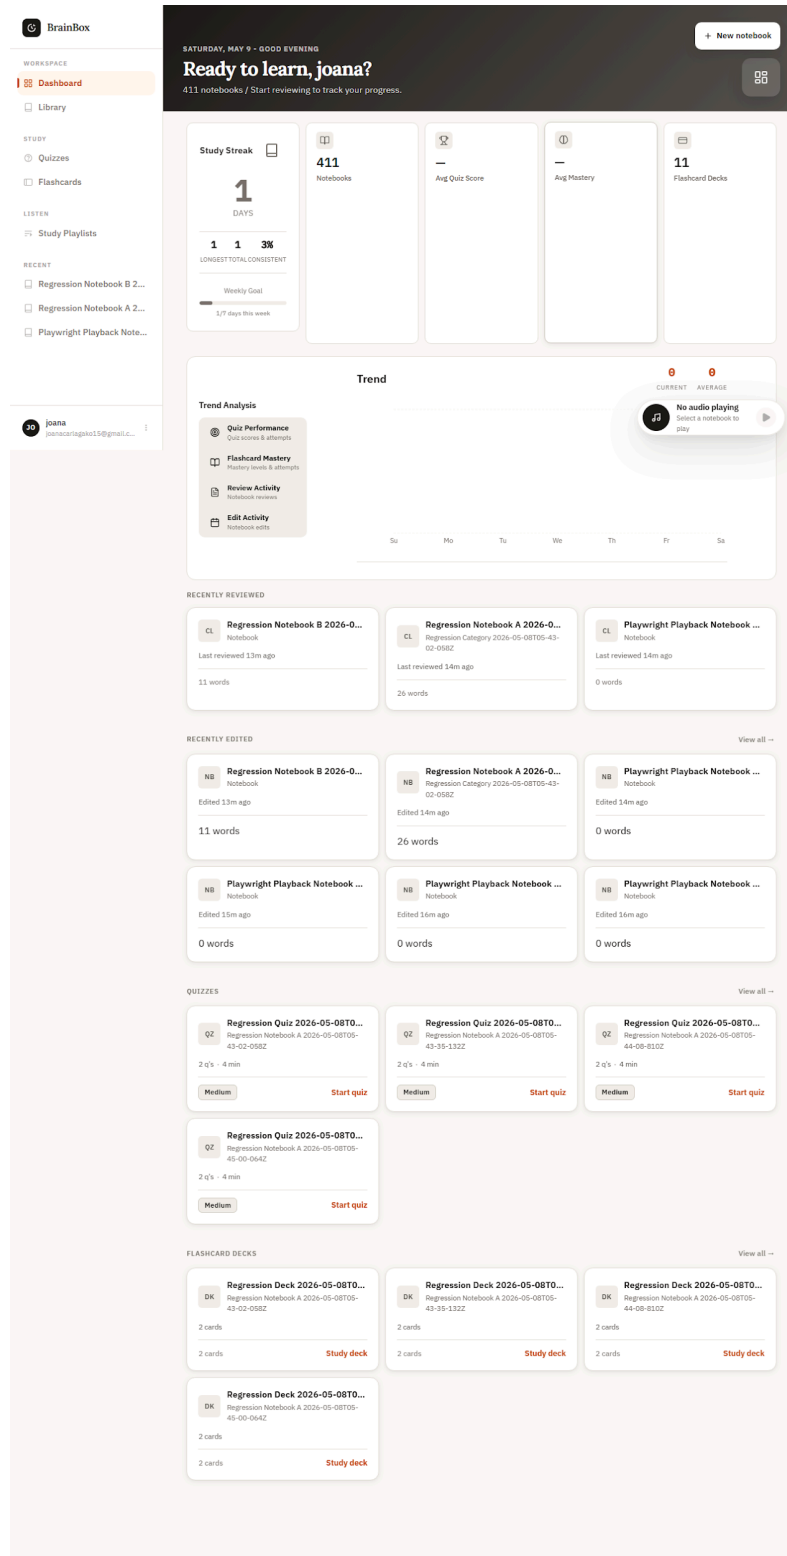

Figure 1. WEB-AUTH-001 rendered evidence screenshot

WEB-AUTH-002 - Login with invalid credentials

Test Result	PASS
Execution Time	0.0 seconds

Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Login with invalid credentials was completed successfully in the live web app.

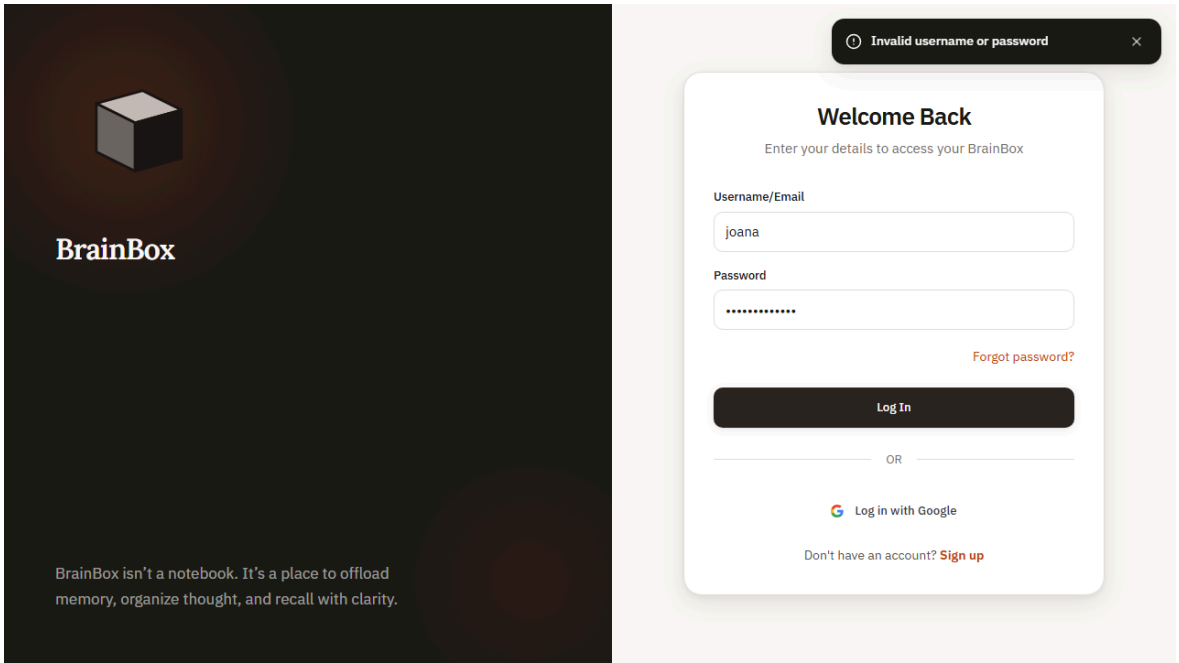

Figure 2. WEB-AUTH-002 rendered evidence screenshot

WEB-AUTH-003 - Login with empty fields

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Login with empty fields was completed successfully in the live web app.

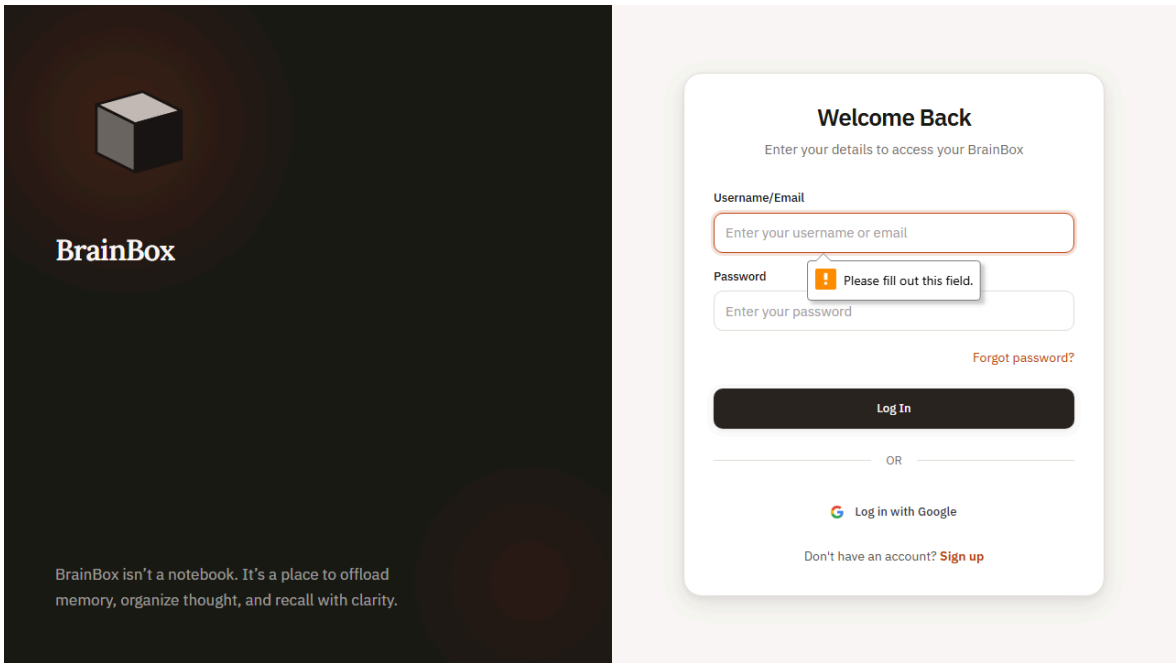

Figure 3. WEB-AUTH-003 rendered evidence screenshot

WEB-AUTH-004 - Login form UI elements

Test Result	PASS
Execution Time	0.0 seconds
Validation	The required implemented UI controls are visible, labeled, and ready for interaction.
Evidence Description	Login form UI elements was completed successfully in the live web app.

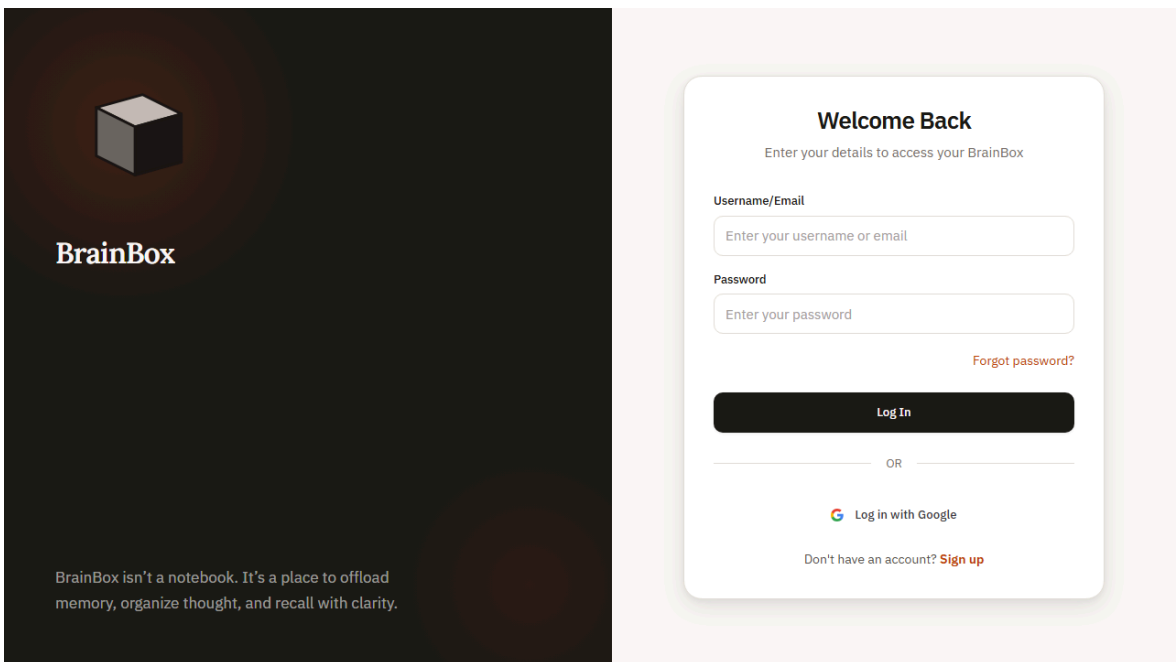

Figure 4. WEB-AUTH-004 rendered evidence screenshot

WEB-AUTH-005 - Forgot password link navigation

Test Result	PASS
Execution Time	0.0 seconds
Validation	Navigation reaches the expected route or modal state.
Evidence Description	Forgot password link navigation was completed successfully in the live web app.

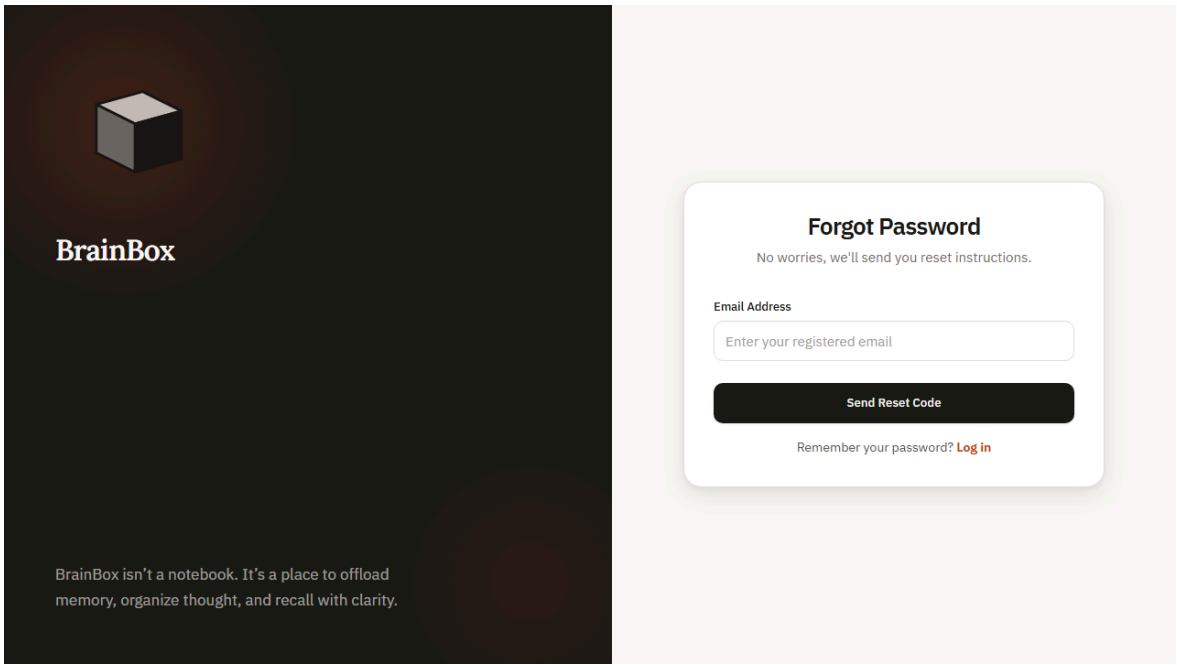

Figure 5. WEB-AUTH-005 rendered evidence screenshot

WEB-AUTH-006 - Sign up link navigation

Test Result	PASS
Execution Time	0.0 seconds
Validation	Navigation reaches the expected route or modal state.
Evidence Description	Sign up link navigation was completed successfully in the live web app.

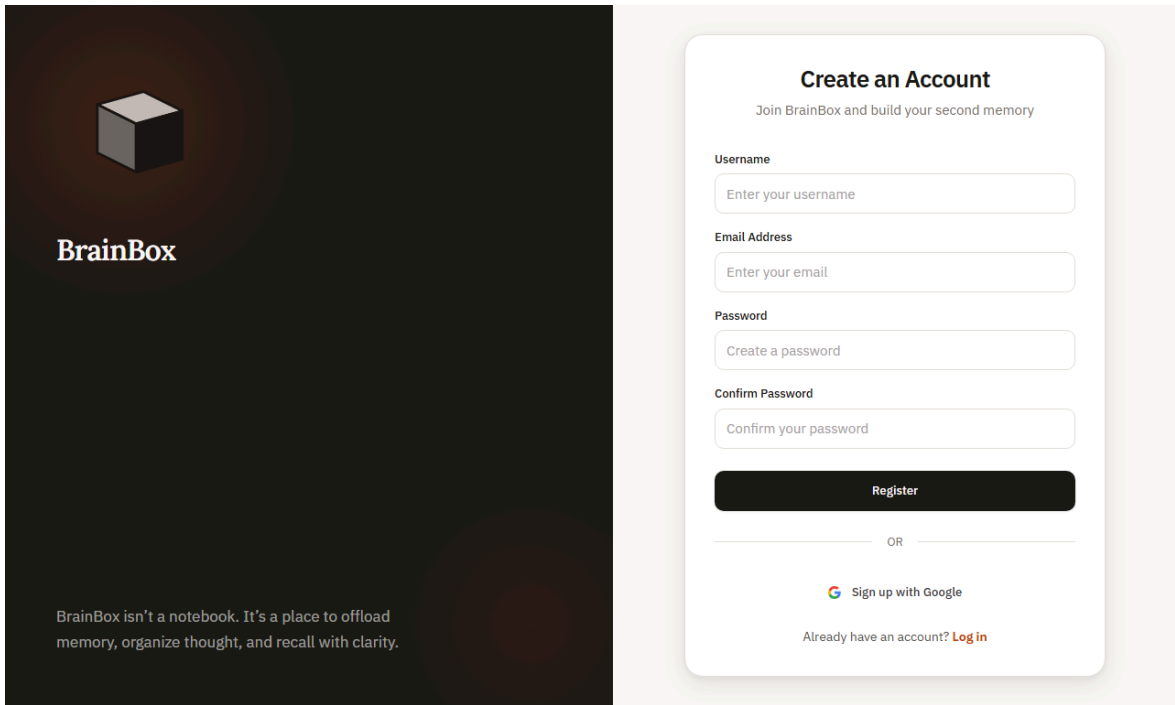

Figure 6. WEB-AUTH-006 rendered evidence screenshot

WEB-AUTH-010 - Registration page UI elements

Test Result	PASS
Execution Time	0.0 seconds
Validation	The required implemented UI controls are visible, labeled, and ready for interaction.
Evidence Description	Registration page UI elements was completed successfully in the live web app.

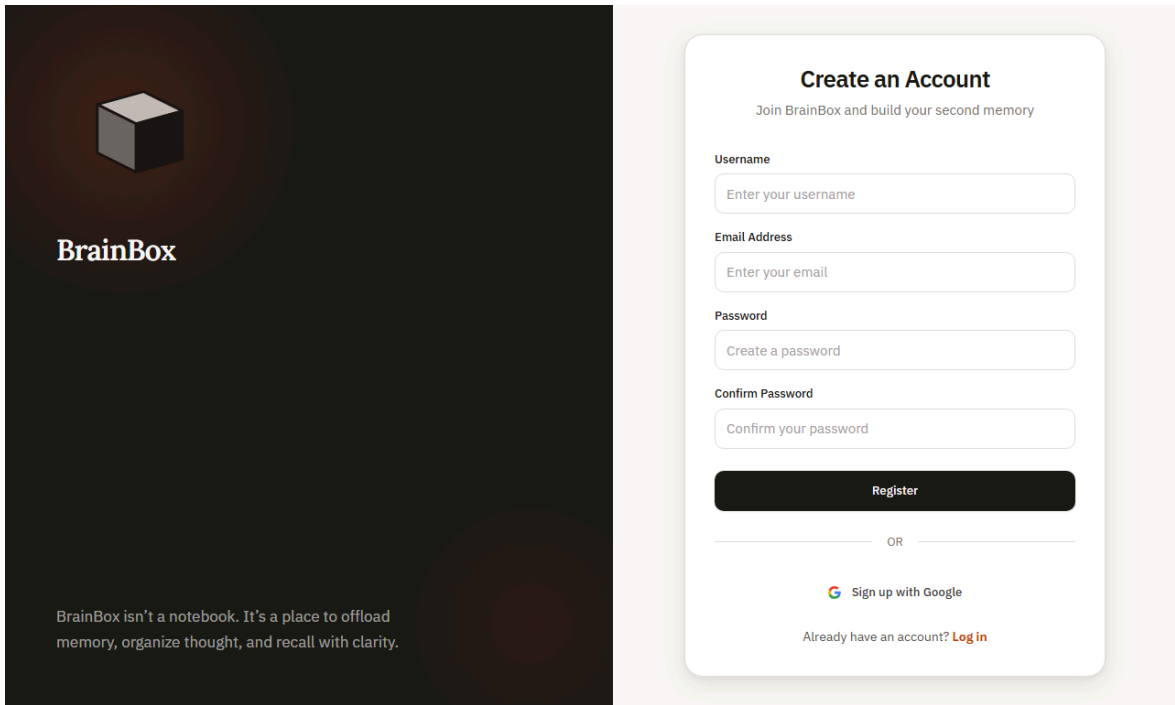

Figure 7. WEB-AUTH-010 rendered evidence screenshot

WEB-AUTH-011 - Registration form fill (email verification required)

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Registration form fill (email verification required) was completed successfully in the live web app.

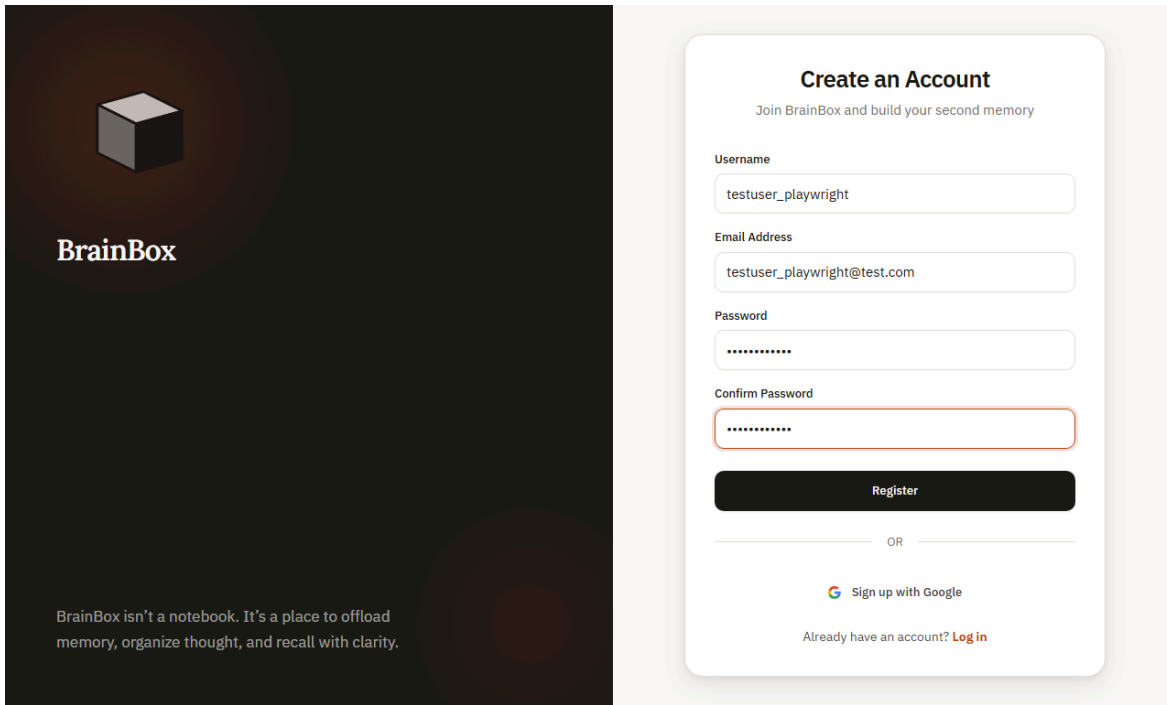

Figure 8. WEB-AUTH-011 rendered evidence screenshot

WEB-AUTH-020 - Forgot password page UI

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Forgot password page UI was completed successfully in the live web app.

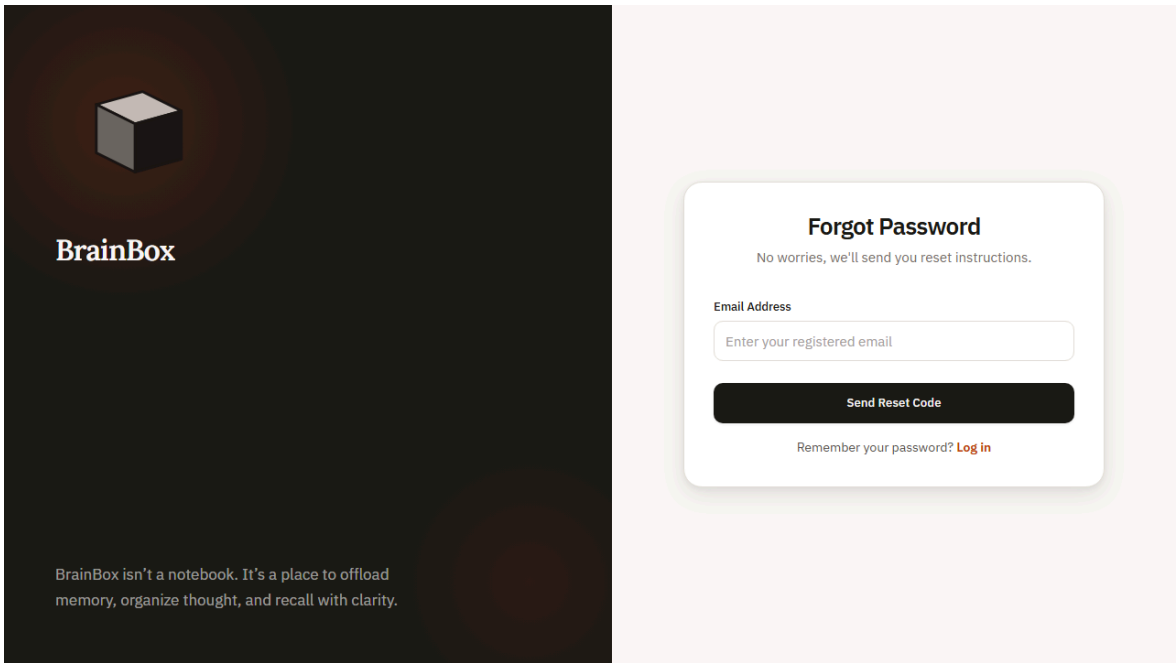

Figure 9. WEB-AUTH-020 rendered evidence screenshot

WEB-AUTH-021 - Forgot password email filled (email required)

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Forgot password email filled (email required) was completed successfully in the live web app.

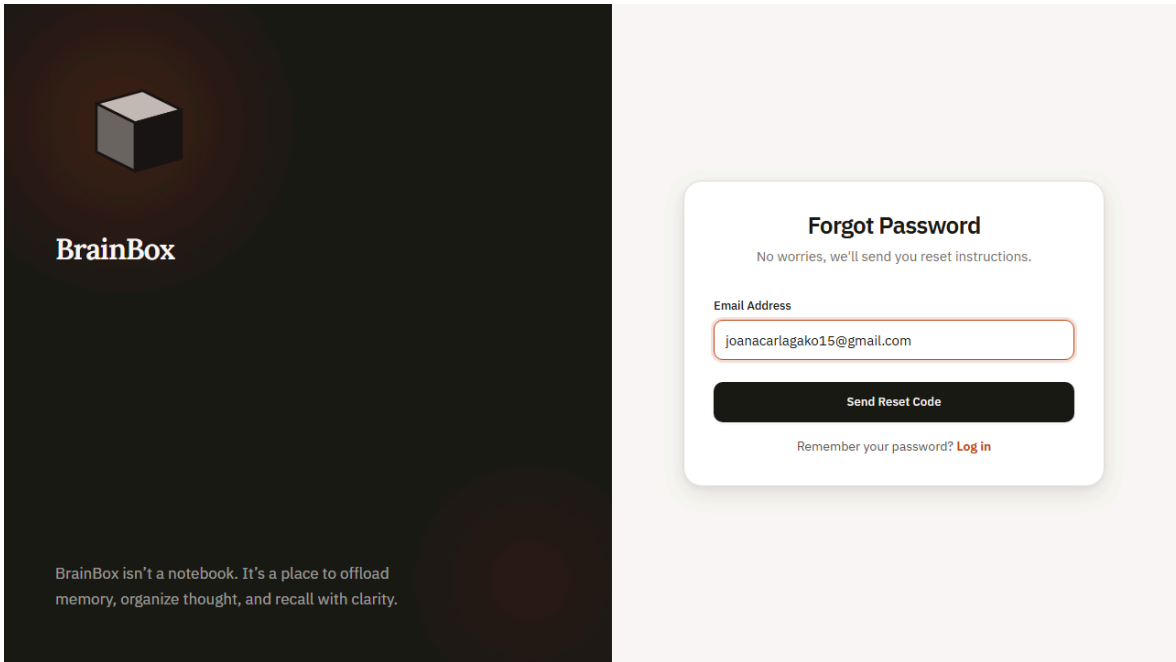

Figure 10. WEB-AUTH-021 rendered evidence screenshot

WEB-AUTH-030 - Google login button on login page

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Google login button on login page was completed successfully in the live web app.

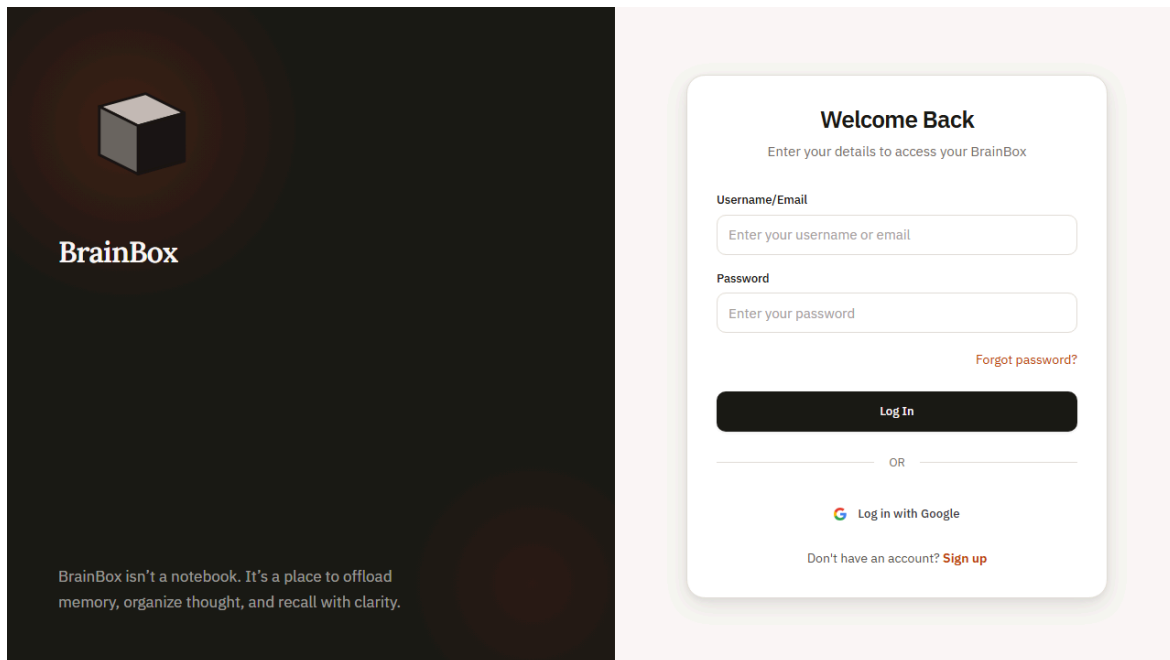

Figure 11. WEB-AUTH-030 rendered evidence screenshot

WEB-AUTH-031 - Google signup button on register page

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Google signup button on register page was completed successfully in the live web app.

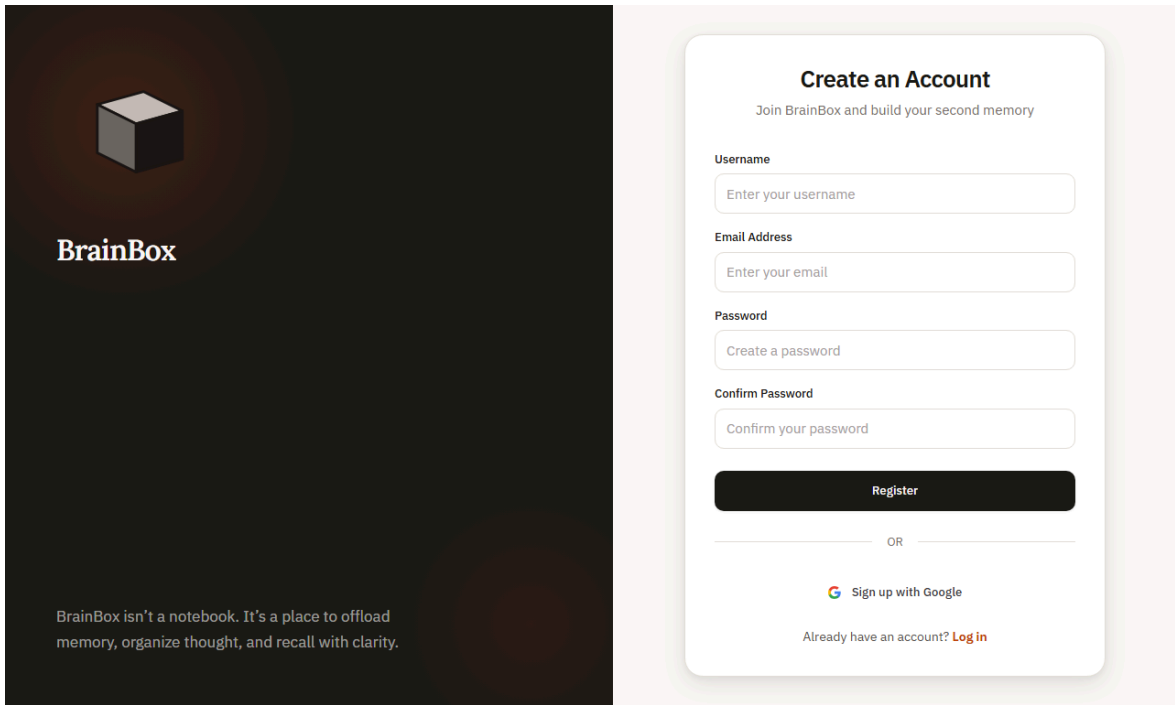

Figure 12. WEB-AUTH-031 rendered evidence screenshot

WEB-AUTH-040 - Logout flow

Test Result	PASS
Execution Time	0.0 seconds
Validation	Logout behaves as implemented and the user is returned to an unauthenticated state.
Evidence Description	Logout flow was completed successfully in the live web app.

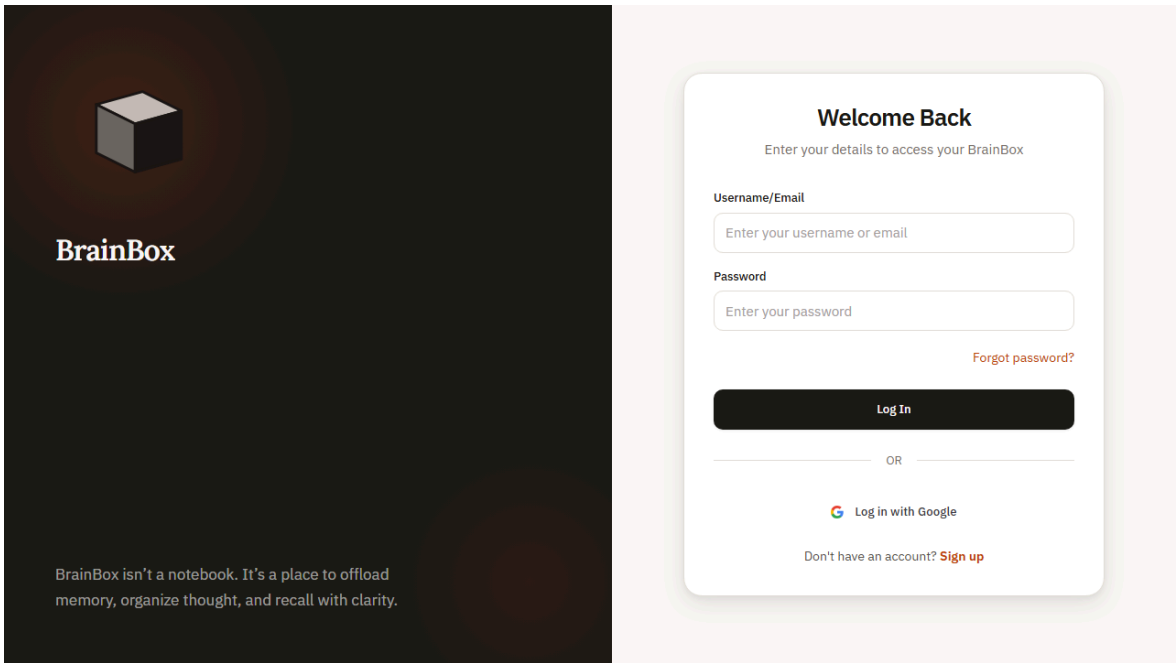

Figure 13. WEB-AUTH-040 rendered evidence screenshot

WEB-AUTH-041 - Logout confirmation modal UI

Test Result	PASS
Execution Time	0.0 seconds
Validation	Logout behaves as implemented and the user is returned to an unauthenticated state.
Evidence Description	Logout confirmation modal UI was completed successfully in the live web app.

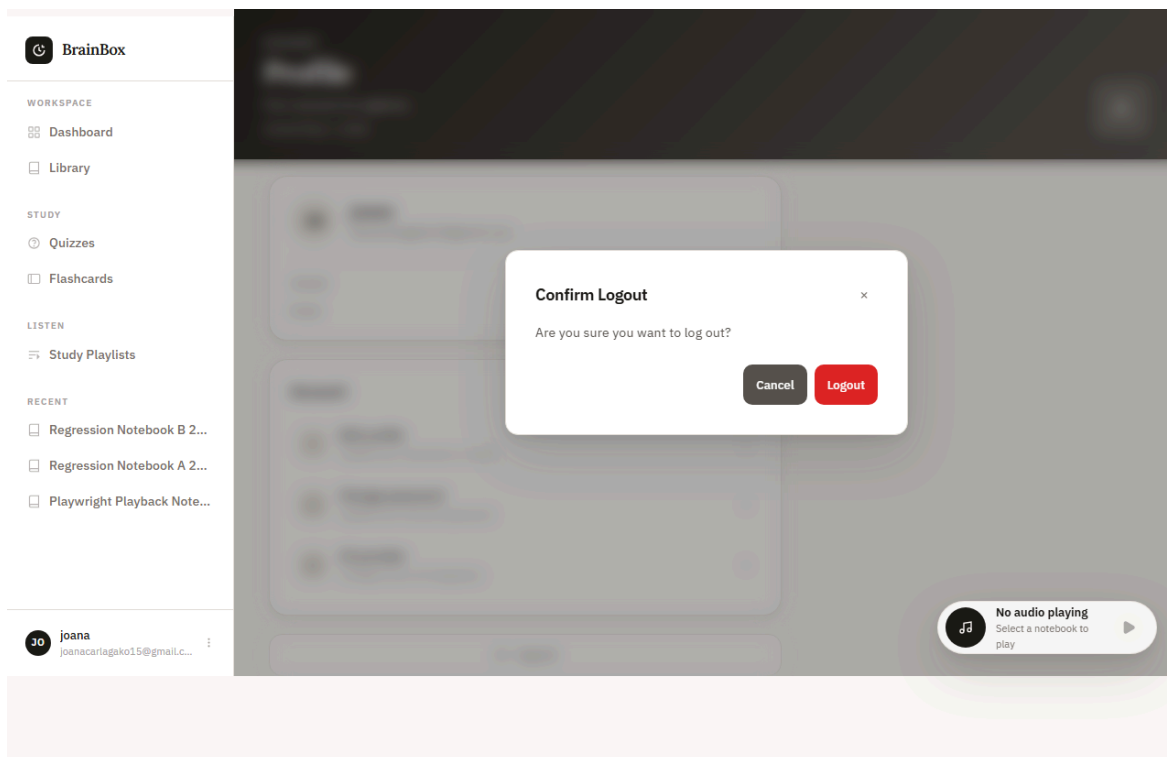

Figure 14. WEB-AUTH-041 rendered evidence screenshot

WEB-AUTH-050 - Unauthenticated redirect

Test Result	PASS
Execution Time	0.0 seconds
Validation	Navigation reaches the expected route or modal state.
Evidence Description	Unauthenticated redirect was completed successfully in the live web app.

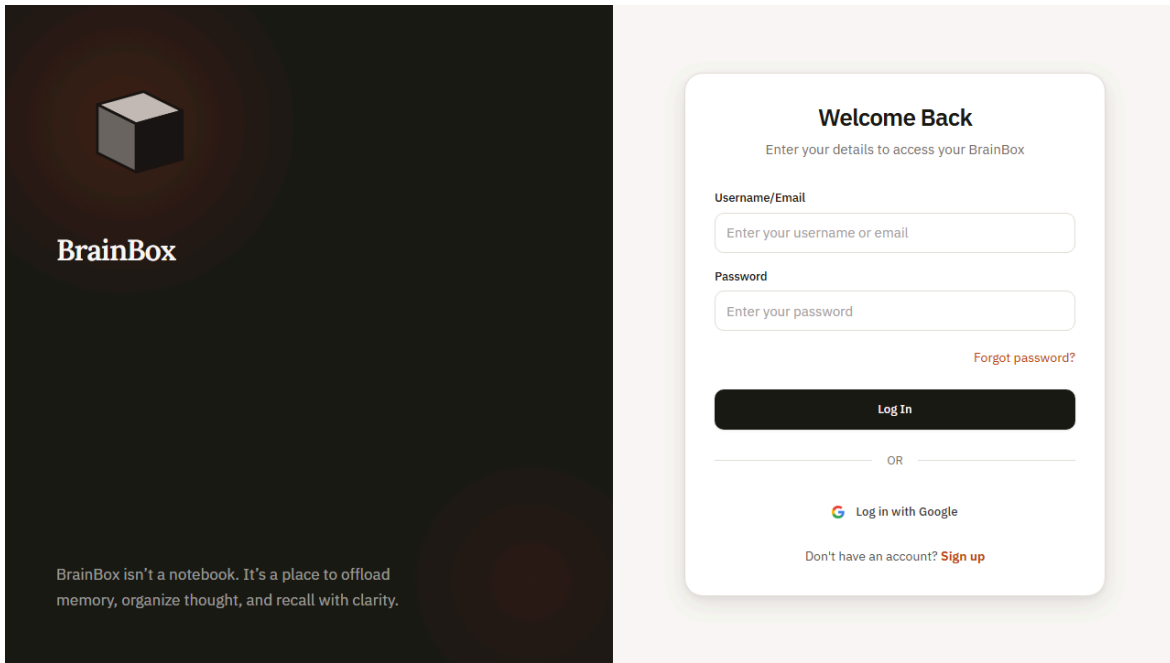

Figure 15. WEB-AUTH-050 rendered evidence screenshot

3. Dashboard Module Evidence

WEB-DASH-001 - Dashboard loads with statistics

Test Result	PASS
Execution Time	0.0 seconds
Validation	The page loads successfully and its core content is visible.
Evidence Description	Dashboard loads with statistics was completed successfully in the live web app.

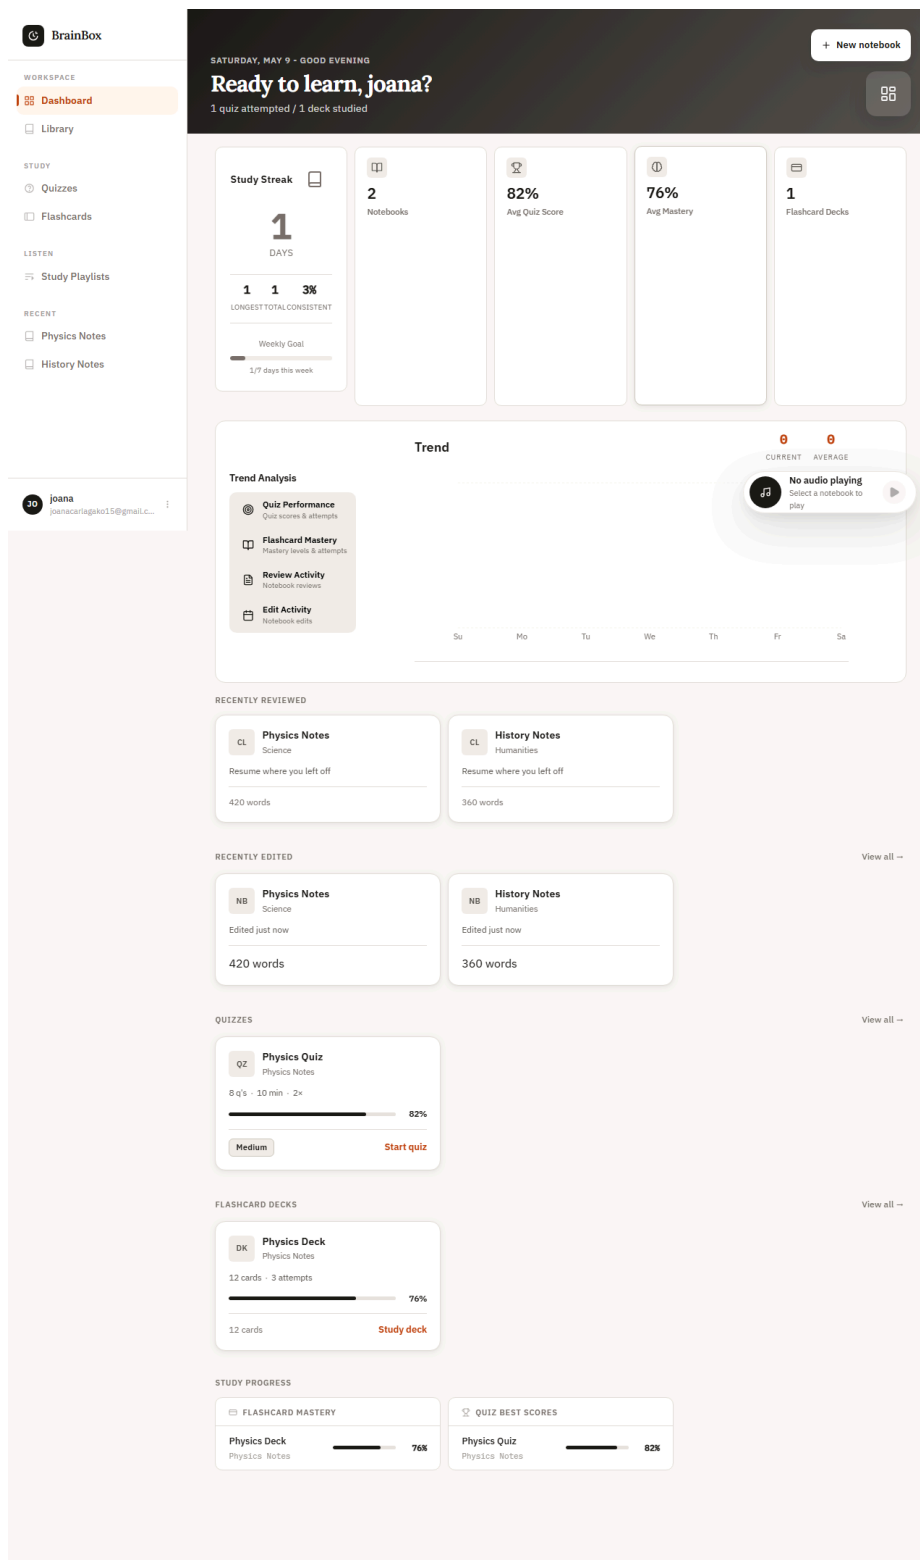

Figure 16. WEB-DASH-001 rendered evidence screenshot

WEB-DASH-002 - New notebook button

Test Result	PASS
Execution Time	0.0 seconds

Validation	The create flow opens correctly and accepts the intended input.
Evidence Description	New notebook button was completed successfully in the live web app.

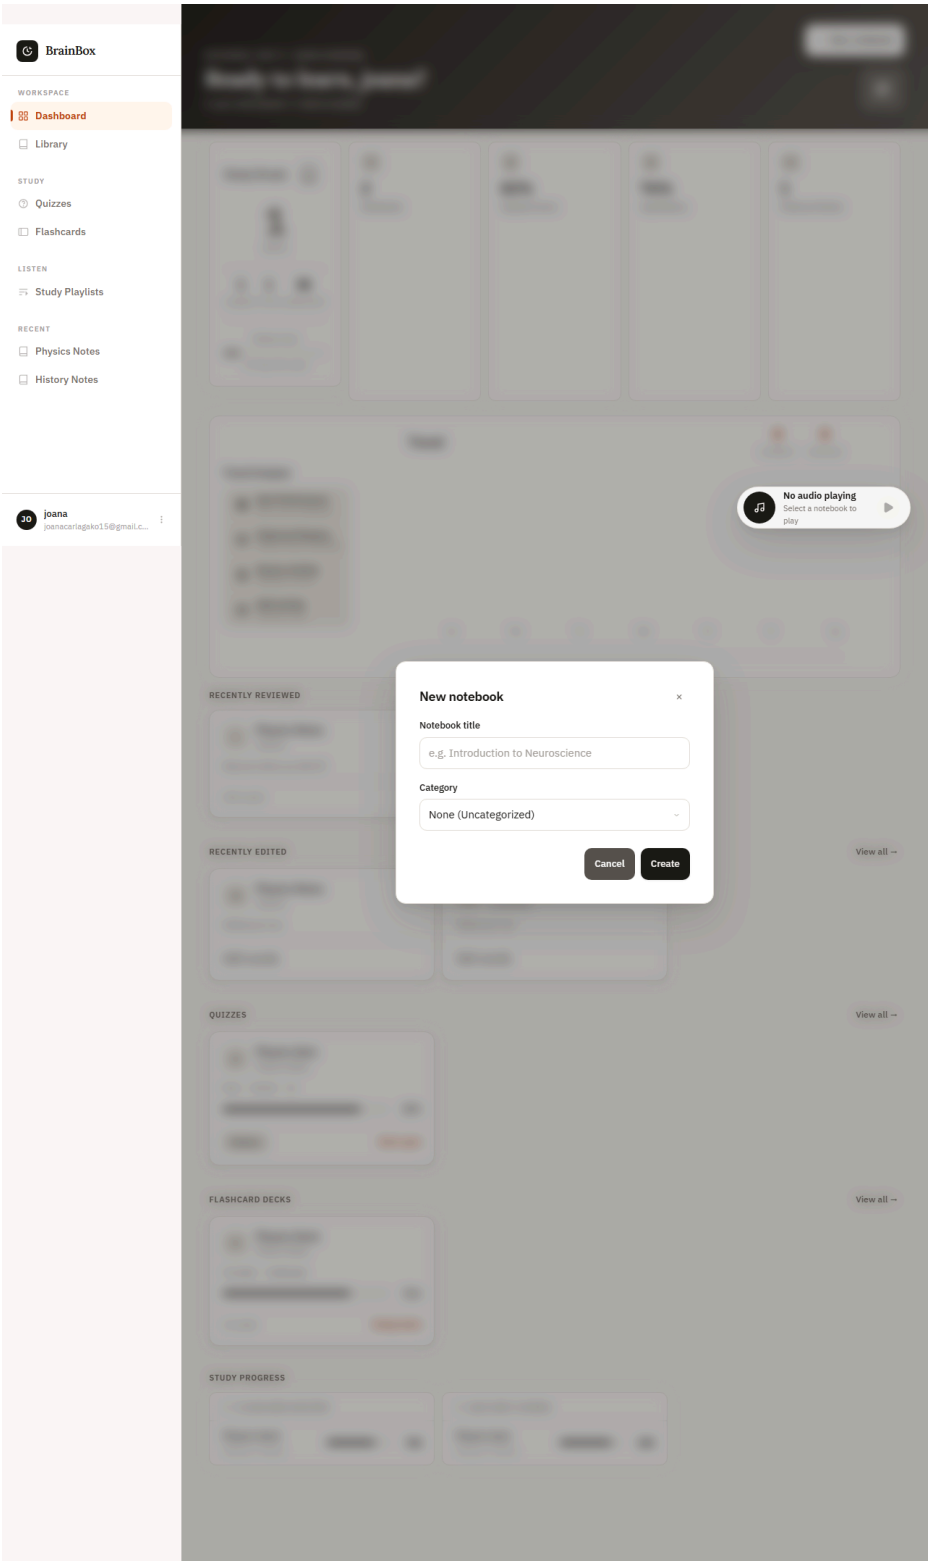

Figure 17. WEB-DASH-002 rendered evidence screenshot

WEB-DASH-003 - Dashboard view all links

Test Result	PASS
Execution Time	0.0 seconds
Validation	Navigation reaches the expected route or modal state.
Evidence Description	Dashboard view all links was completed successfully in the live web app.

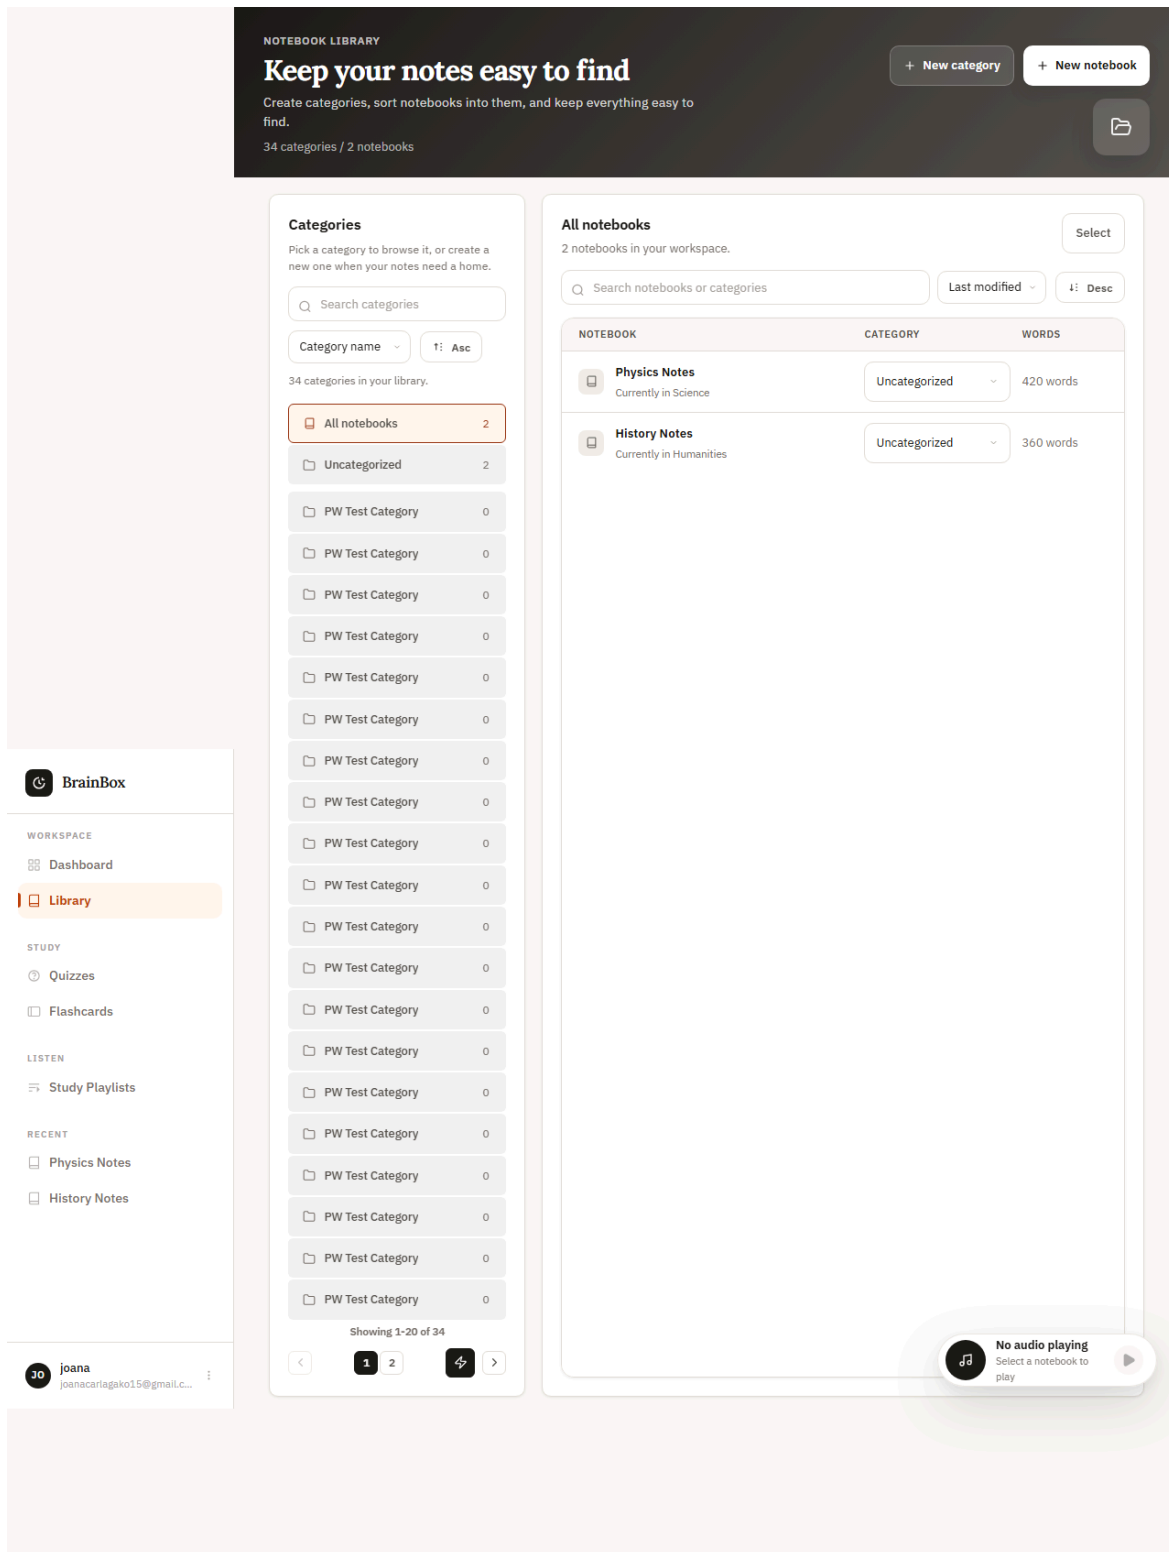

Figure 18. WEB-DASH-003 rendered evidence screenshot

WEB-DASH-004 - Stat card navigation

Test Result	PASS
Execution Time	0.0 seconds

Validation	Navigation reaches the expected route or modal state.
Evidence Description	Stat card navigation was completed successfully in the live web app.

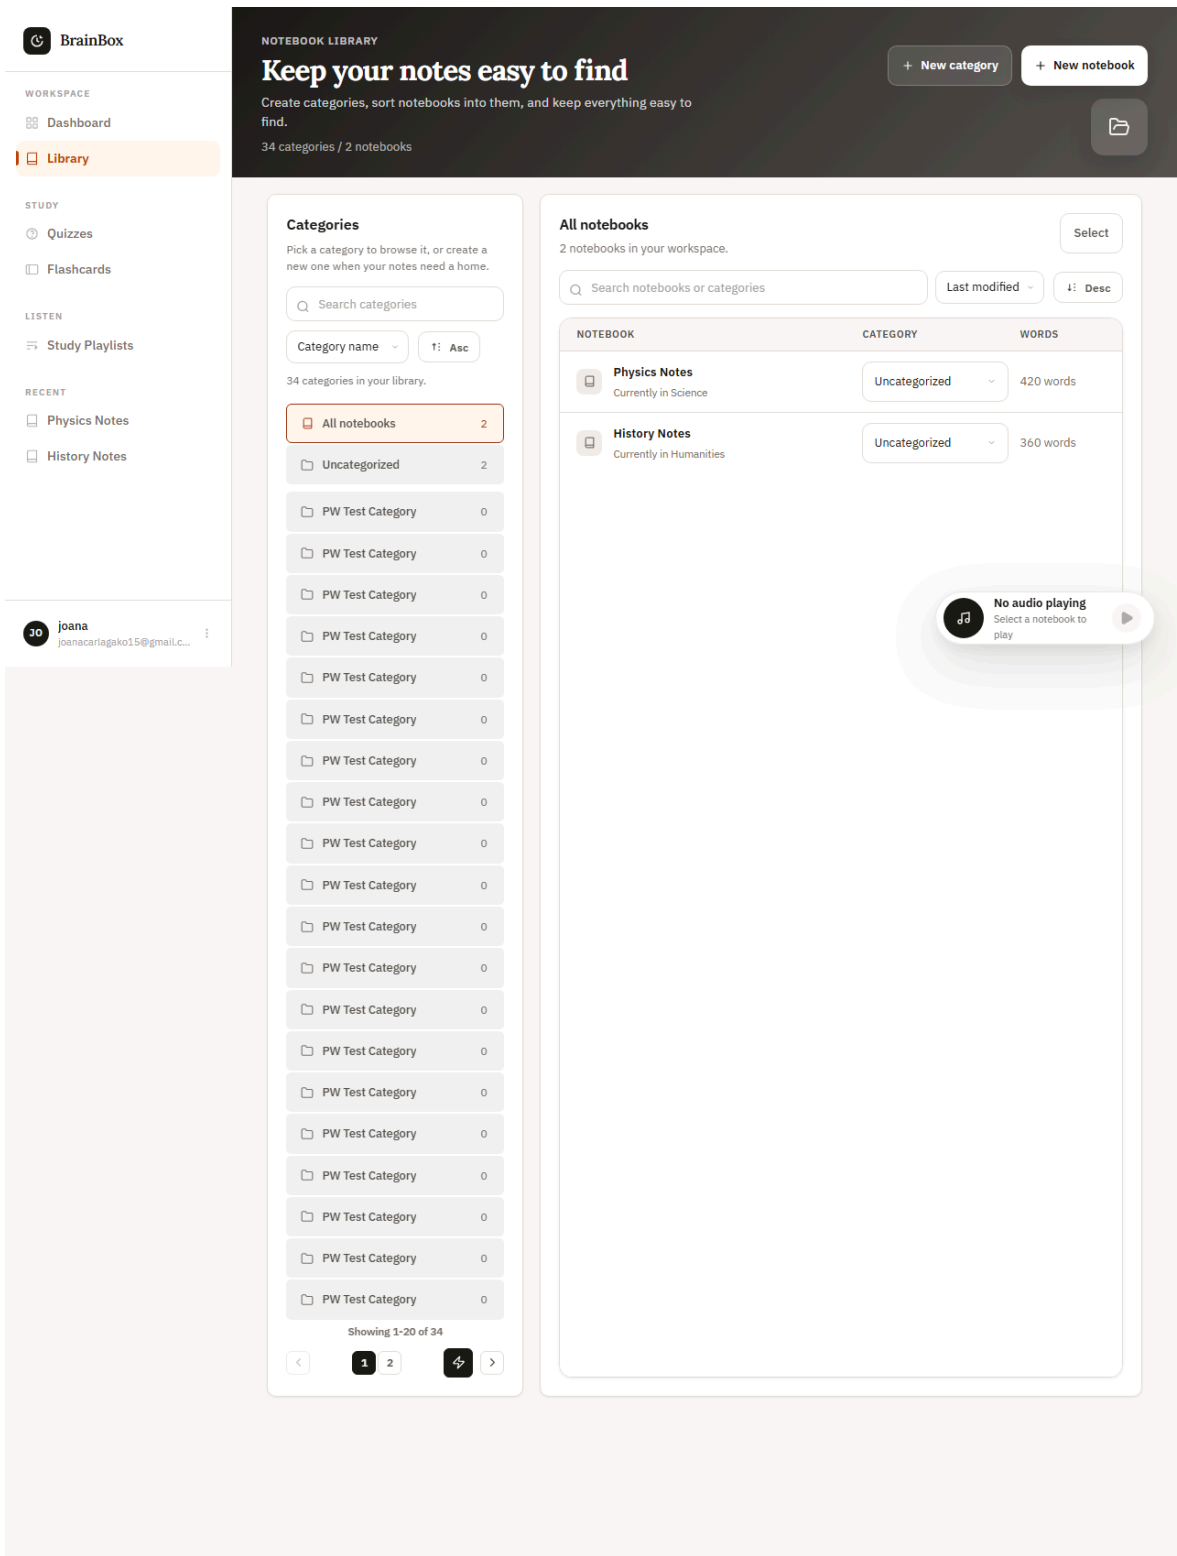

Figure 19. WEB-DASH-004 rendered evidence screenshot

4. Library And Category Module Evidence

WEB-LIB-001 - Library page loads with notebooks

Test Result	PASS
Execution Time	0.0 seconds
Validation	The page loads successfully and its core content is visible.
Evidence Description	Library page loads with notebooks was completed successfully in the live web app.

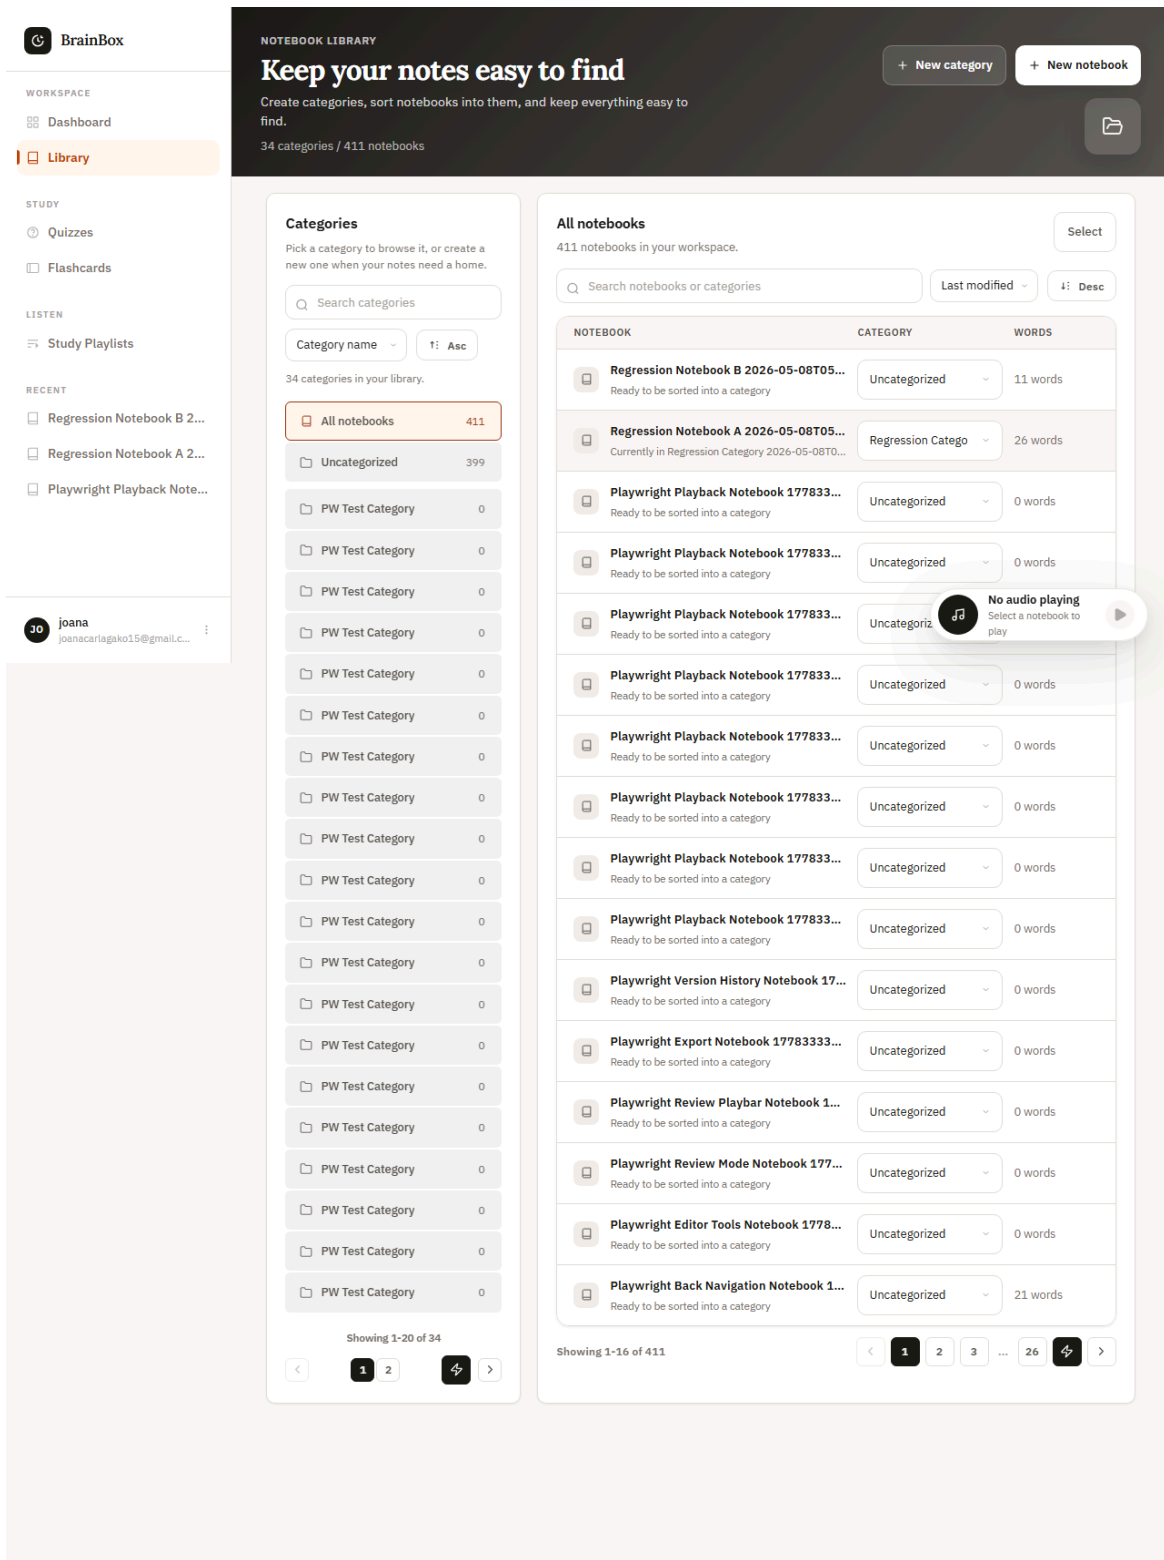

Figure 20. WEB-LIB-001 rendered evidence screenshot

WEB-LIB-002 - Search notebooks

Test Result	PASS
Execution Time	0.0 seconds

Validation	The relevant search control accepts input and updates the visible list or state.
Evidence Description	Search notebooks was completed successfully in the live web app.

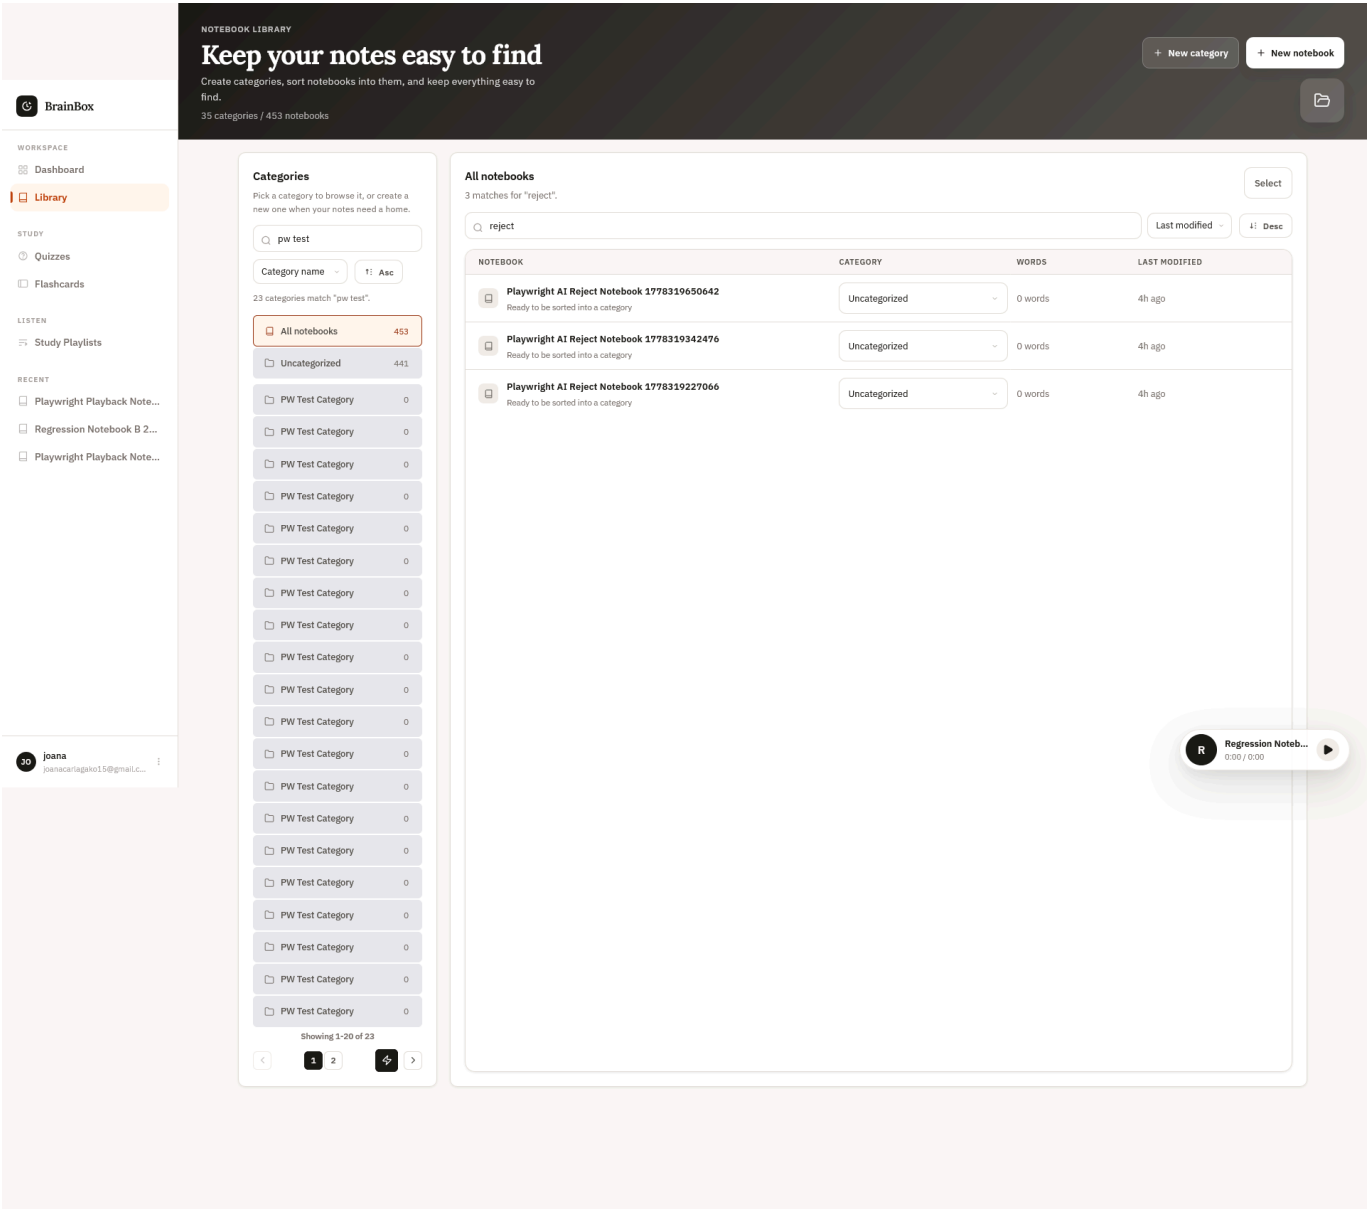

Figure 21. WEB-LIB-002 rendered evidence screenshot

WEB-LIB-003 - Sort notebooks

Test Result	PASS
Execution Time	0.0 seconds
Validation	The sort control is usable and the current view updates without errors.
Evidence Description	Sort notebooks was completed successfully in the live web app.

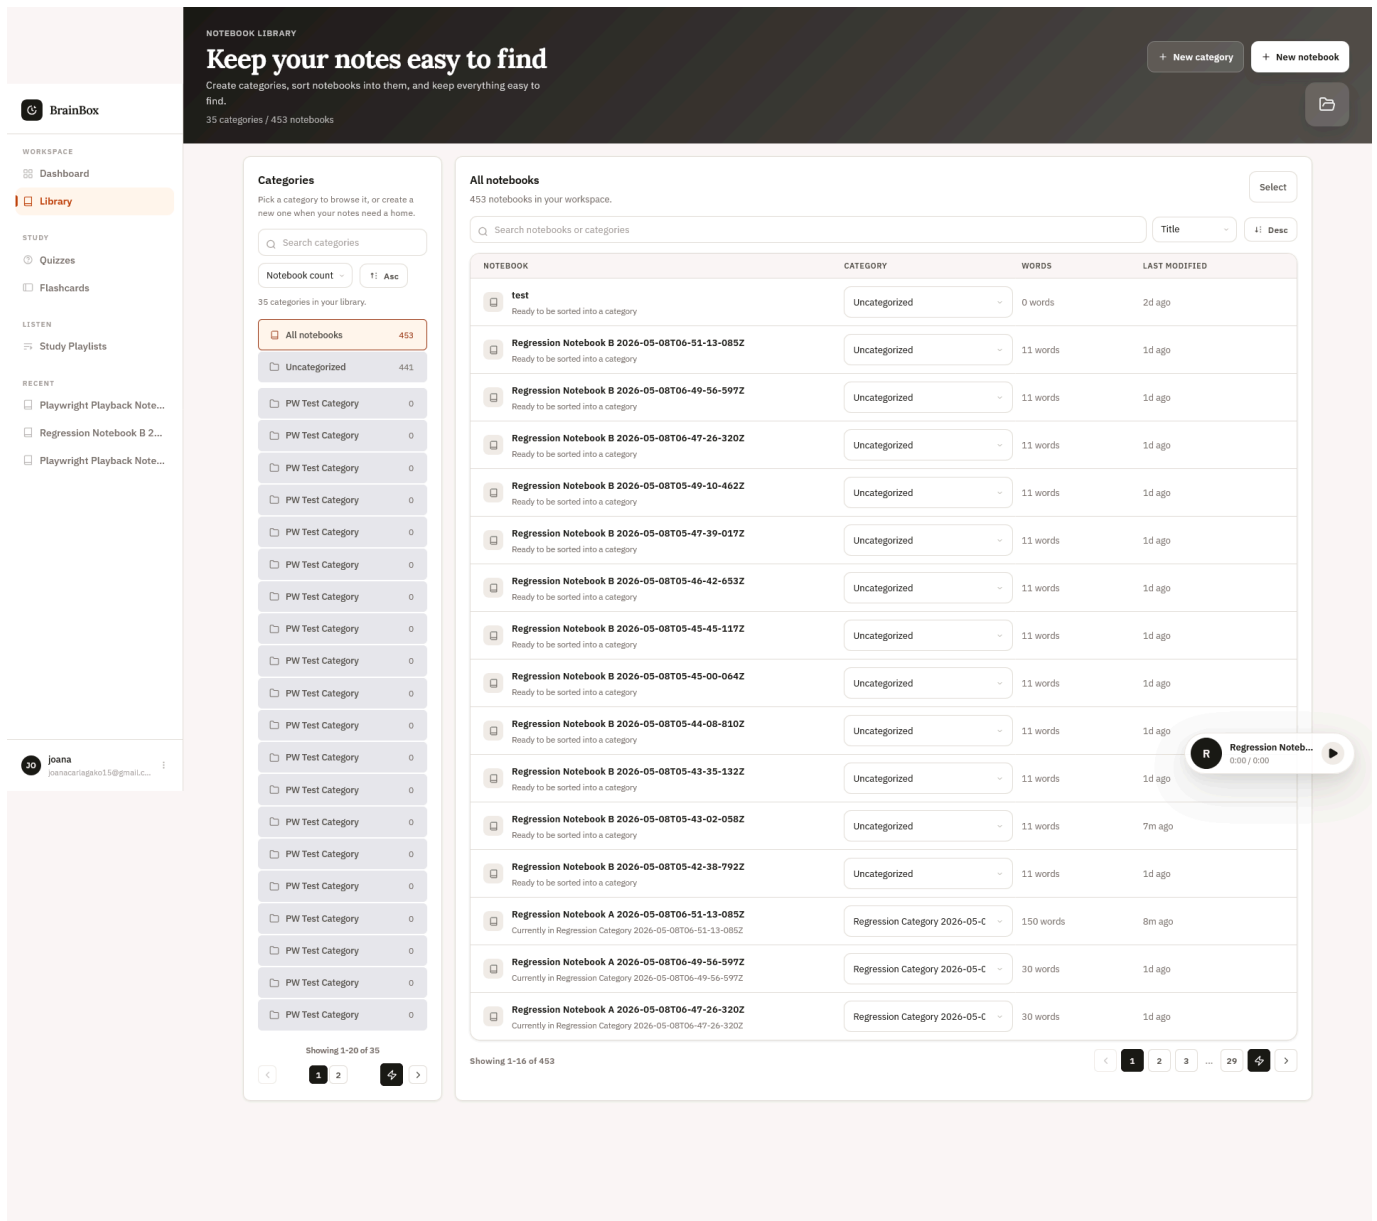

Figure 22. WEB-LIB-003 rendered evidence screenshot

WEB-LIB-004 - Open notebook from library

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Open notebook from library was completed successfully in the live web app.

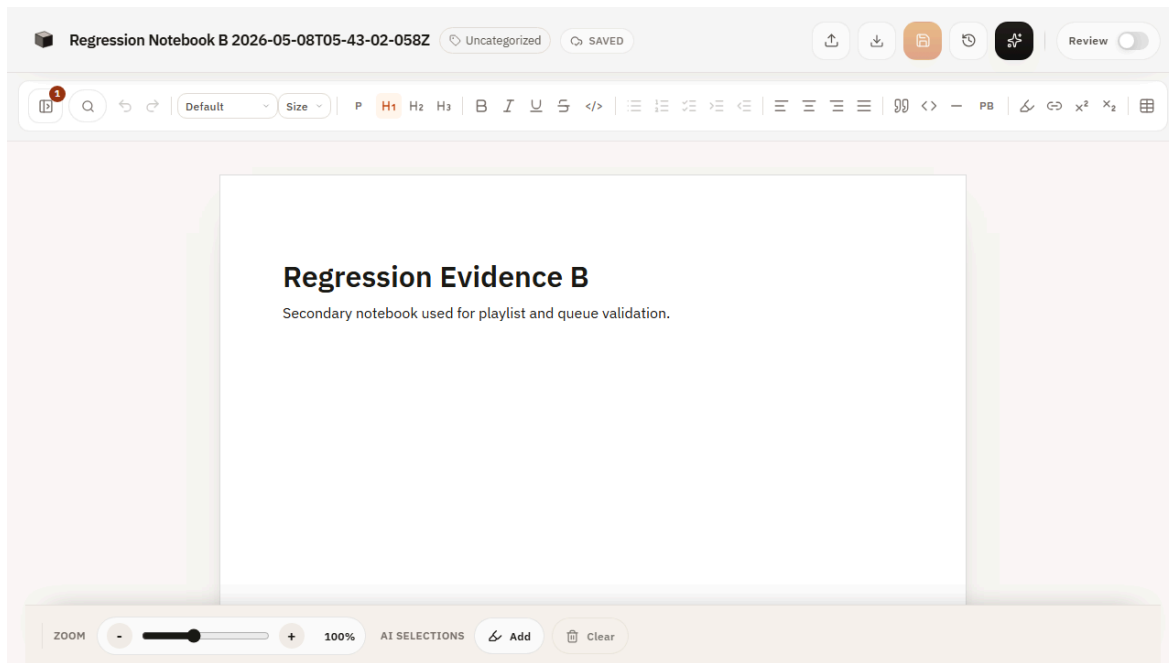

Figure 23. WEB-LIB-004 rendered evidence screenshot

WEB-LIB-010 - Create a new category

Test Result	PASS
Execution Time	0.0 seconds
Validation	The create flow opens correctly and accepts the intended input.
Evidence Description	Create a new category was completed successfully in the live web app.

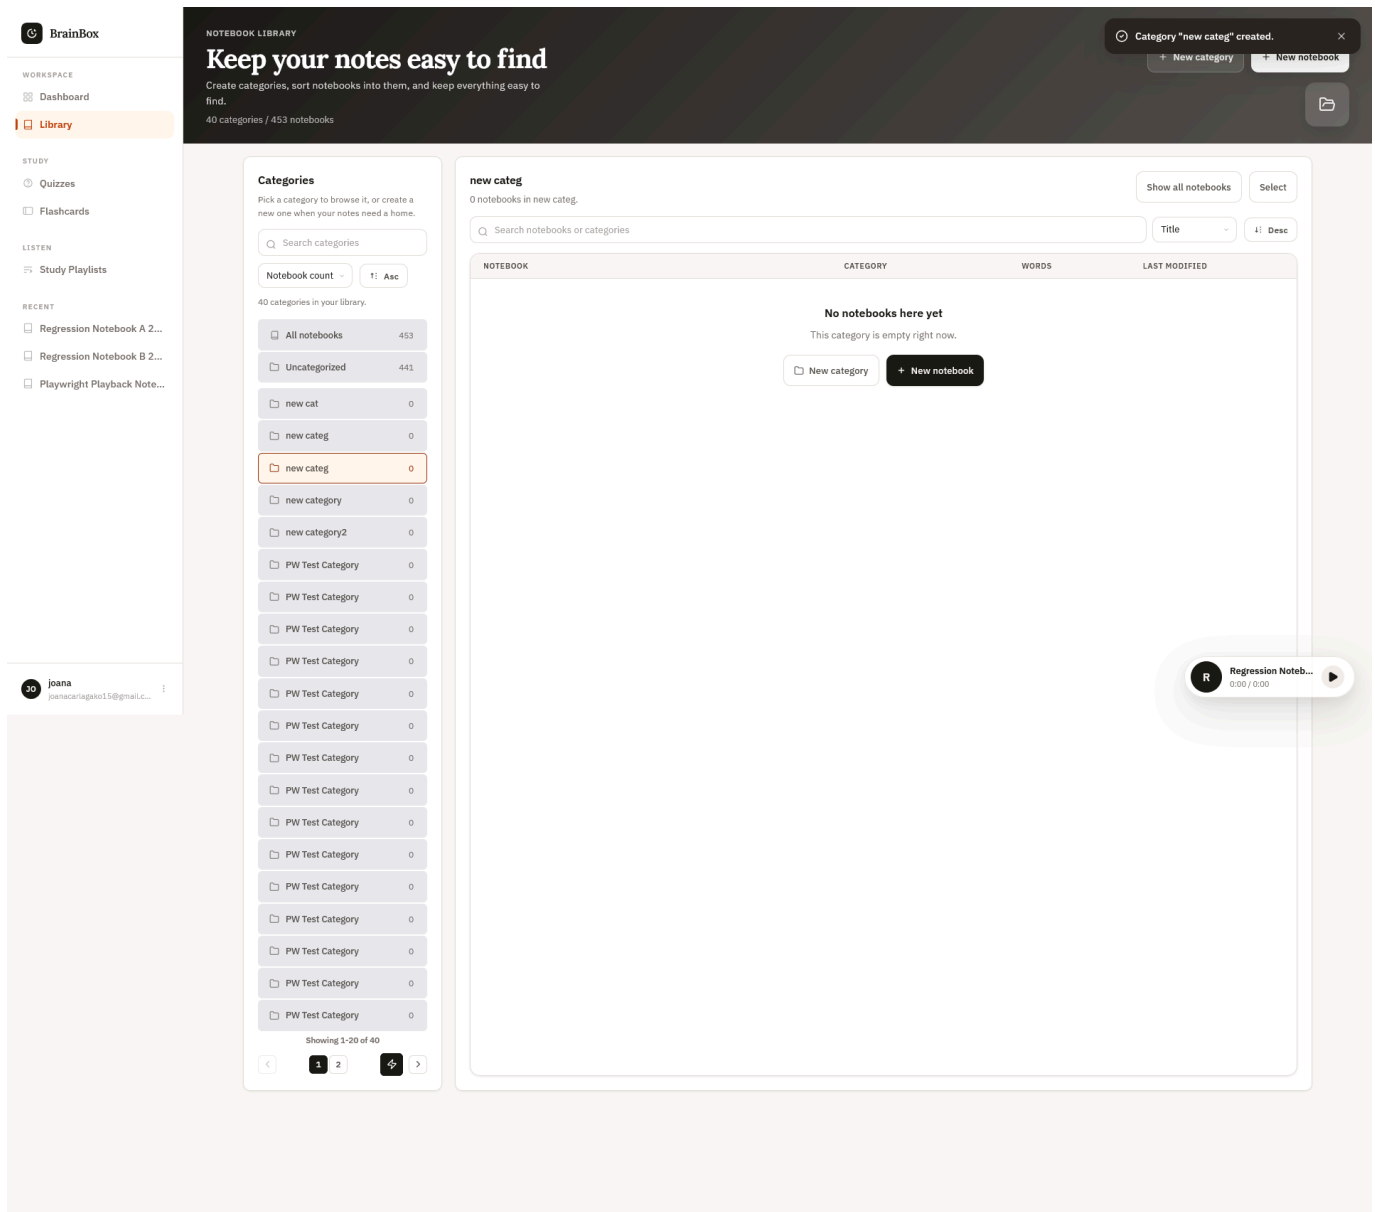

Figure 24. WEB-LIB-010 rendered evidence screenshot

WEB-LIB-011 - Filter notebooks by category

Test Result	PASS
Execution Time	0.0 seconds
Validation	The selected filter updates the visible content set without breaking navigation.
Evidence Description	Filter notebooks by category was completed successfully in the live web app.

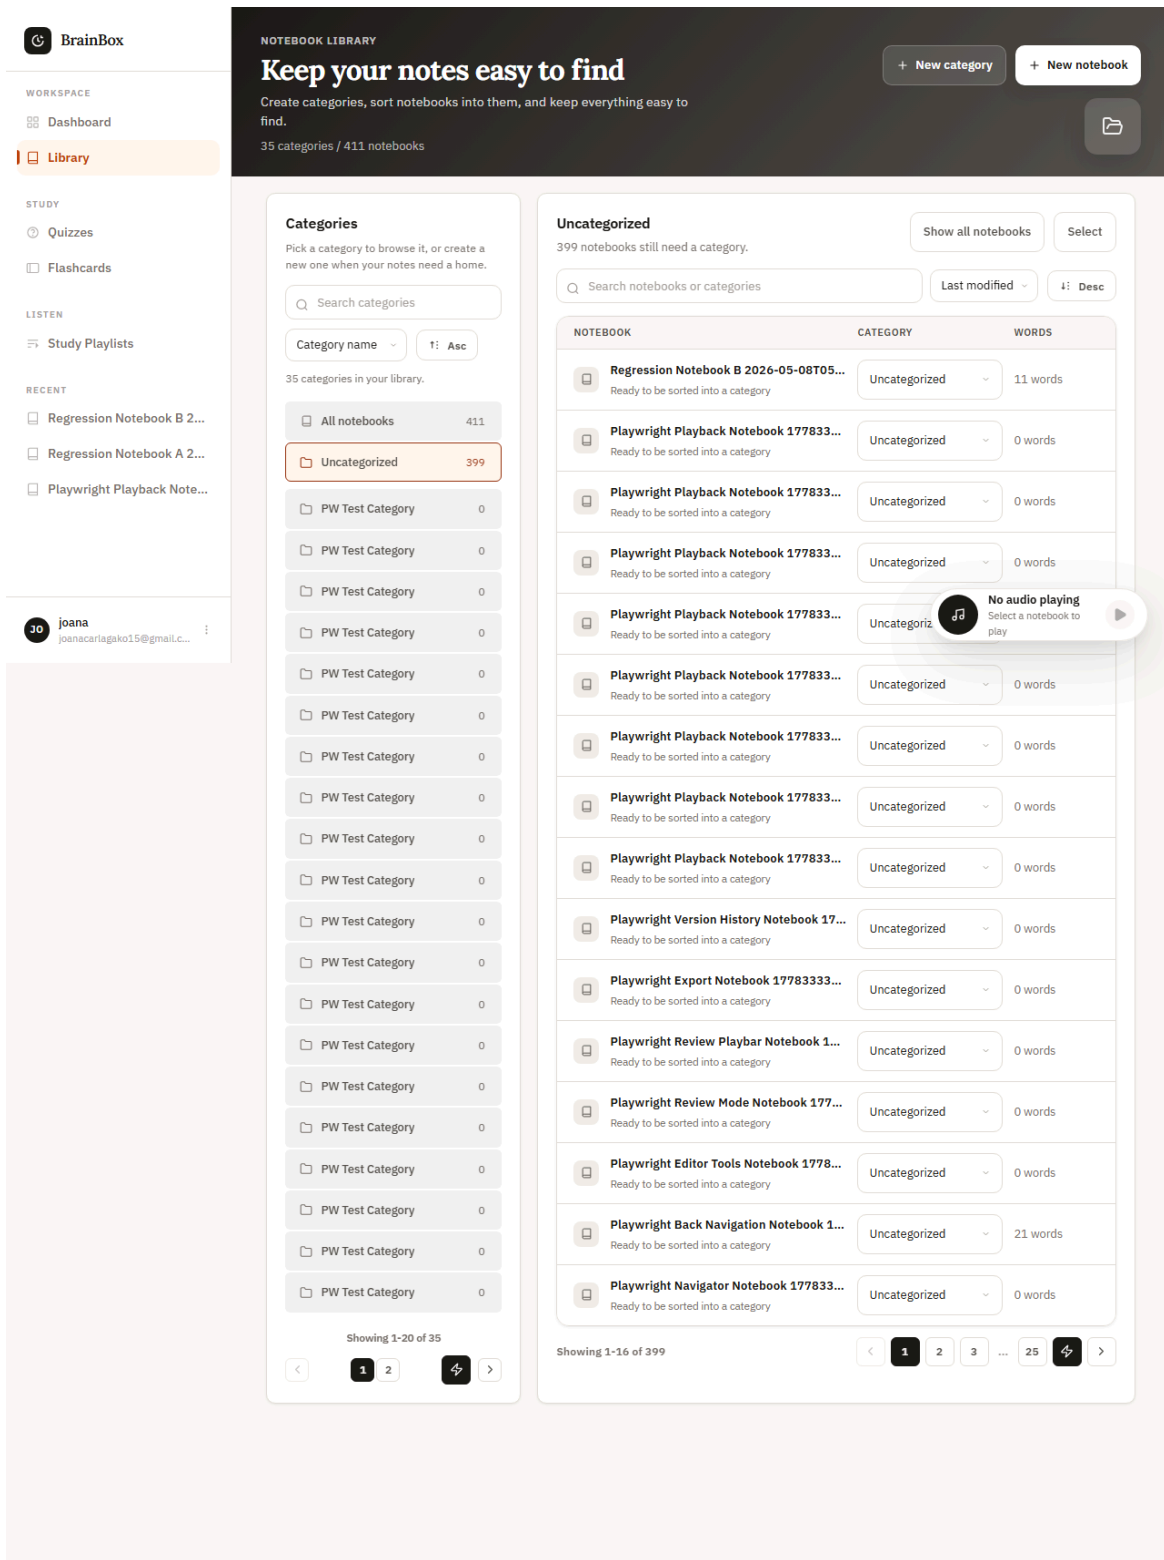

Figure 25. WEB-LIB-011 rendered evidence screenshot

WEB-LIB-014 - Search categories

Test Result	PASS
Execution Time	0.0 seconds

5. Notebook And Editor Module Evidence

WEB-NB-001 - Create a new notebook

Test Result	PASS
Execution Time	0.0 seconds
Validation	The create flow opens correctly and accepts the intended input.
Evidence Description	Create a new notebook was completed successfully in the live web app.

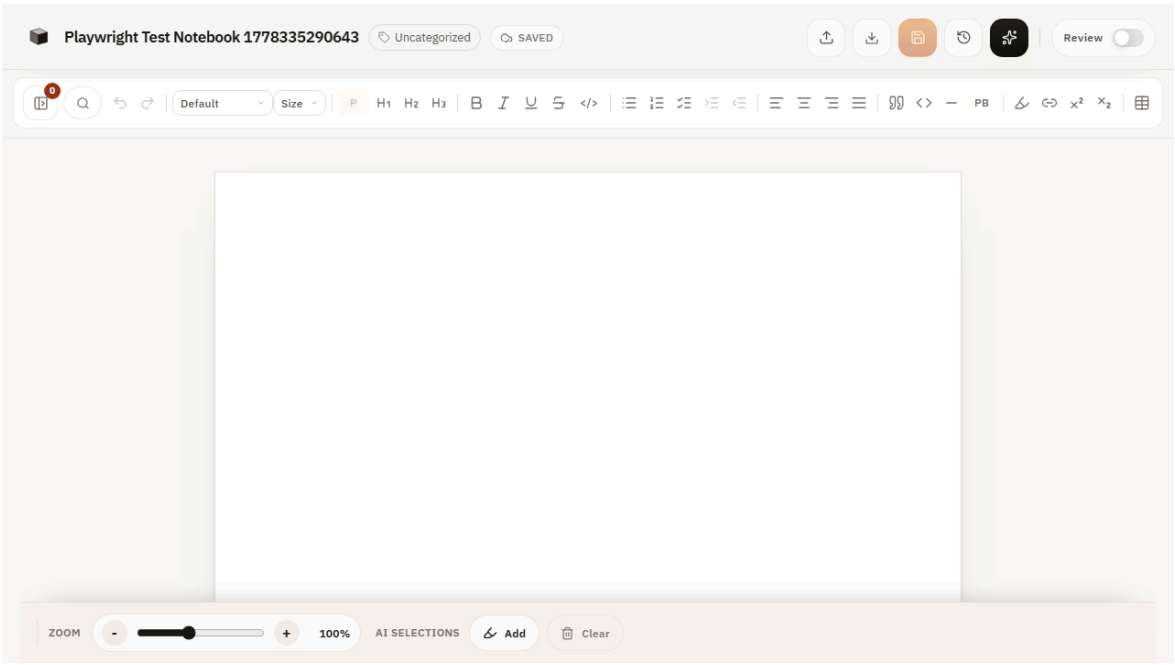

Figure 27. WEB-NB-001 rendered evidence screenshot

WEB-NB-002 - Edit notebook content

Test Result	PASS
Execution Time	0.0 seconds
Validation	The edit surface is reachable and the relevant controls are visible.
Evidence Description	Edit notebook content was completed successfully in the live web app.

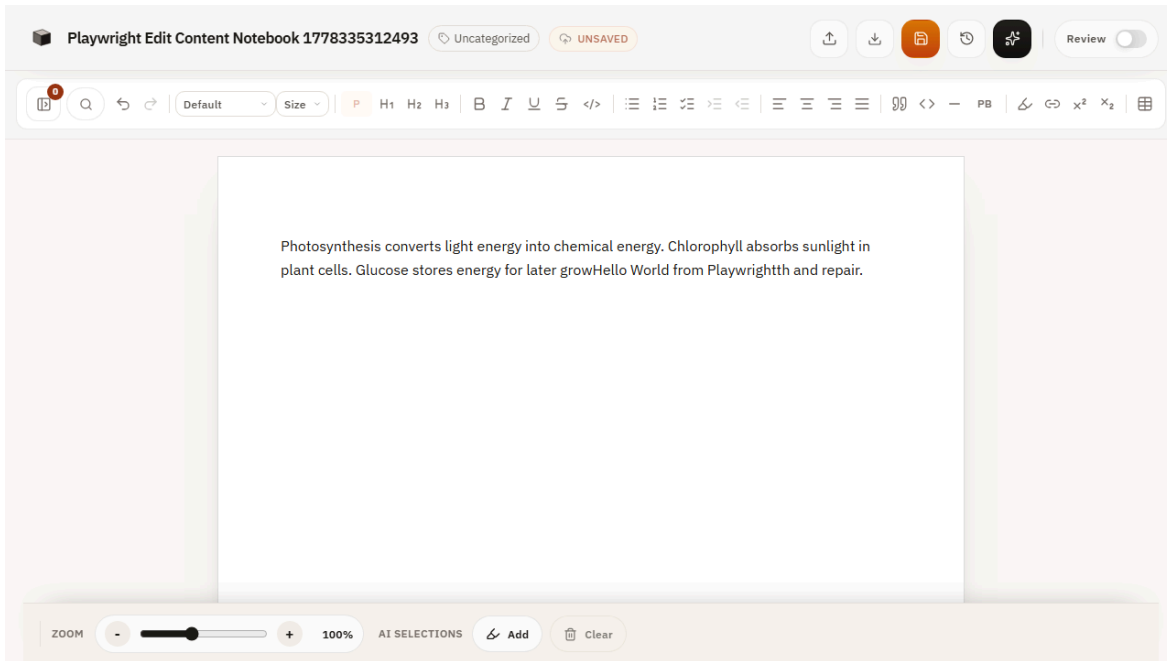

Figure 28. WEB-NB-002 rendered evidence screenshot

WEB-NB-003 - Auto-save indicator

Test Result	PASS
Execution Time	0.0 seconds
Validation	The save-status control reflects unsaved or saved state after editor changes.
Evidence Description	Auto-save indicator was completed successfully in the live web app.

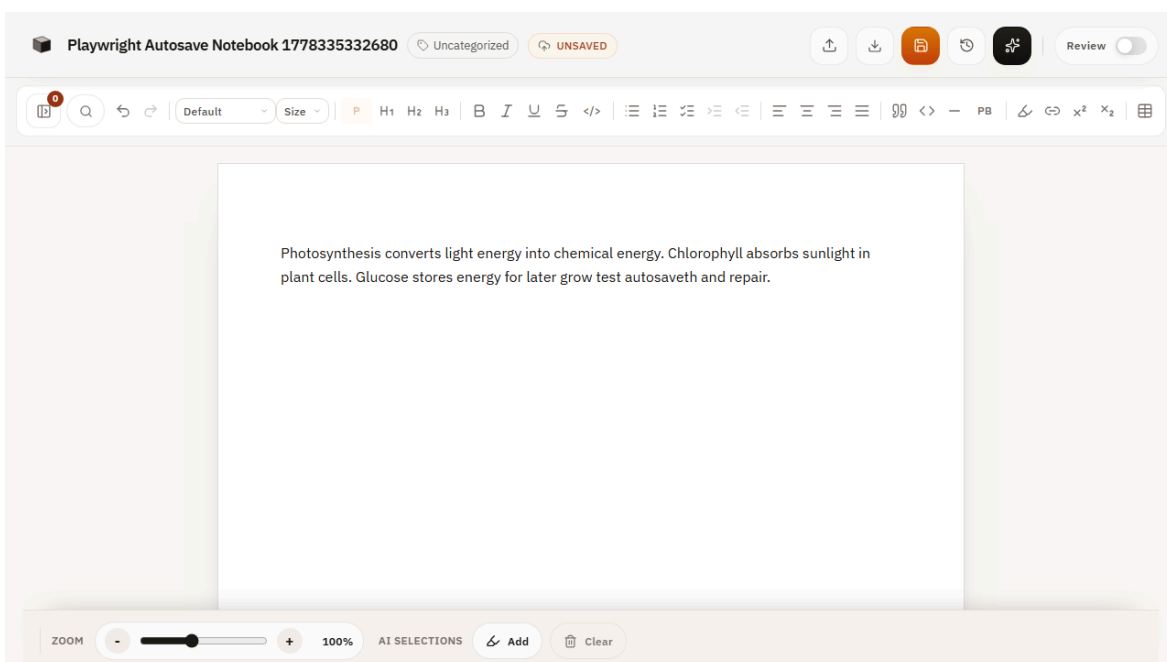

Figure 29. WEB-NB-003 rendered evidence screenshot

WEB-NB-004 - Navigator panel opens and can be collapsed

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Navigator panel opens and can be collapsed was completed successfully in the live web app.

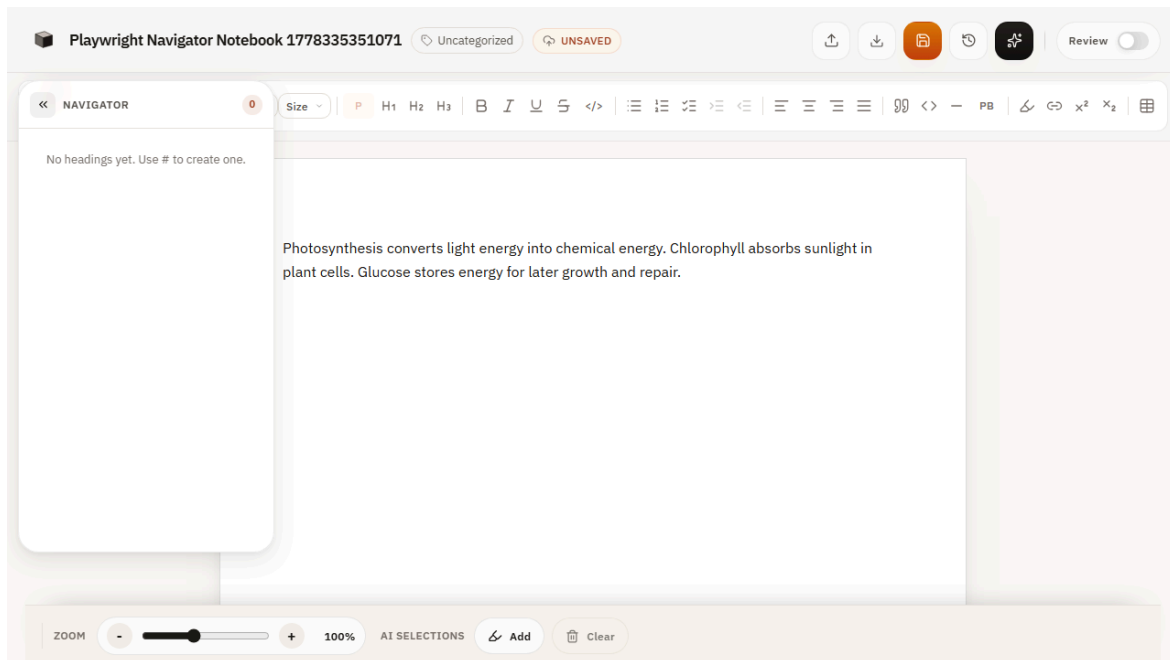

Figure 30. WEB-NB-004 rendered evidence screenshot

WEB-NB-005 - Navigate back from editor

Test Result	PASS
Execution Time	0.0 seconds
Validation	The edit surface is reachable and the relevant controls are visible.
Evidence Description	Navigate back from editor was completed successfully in the live web app.

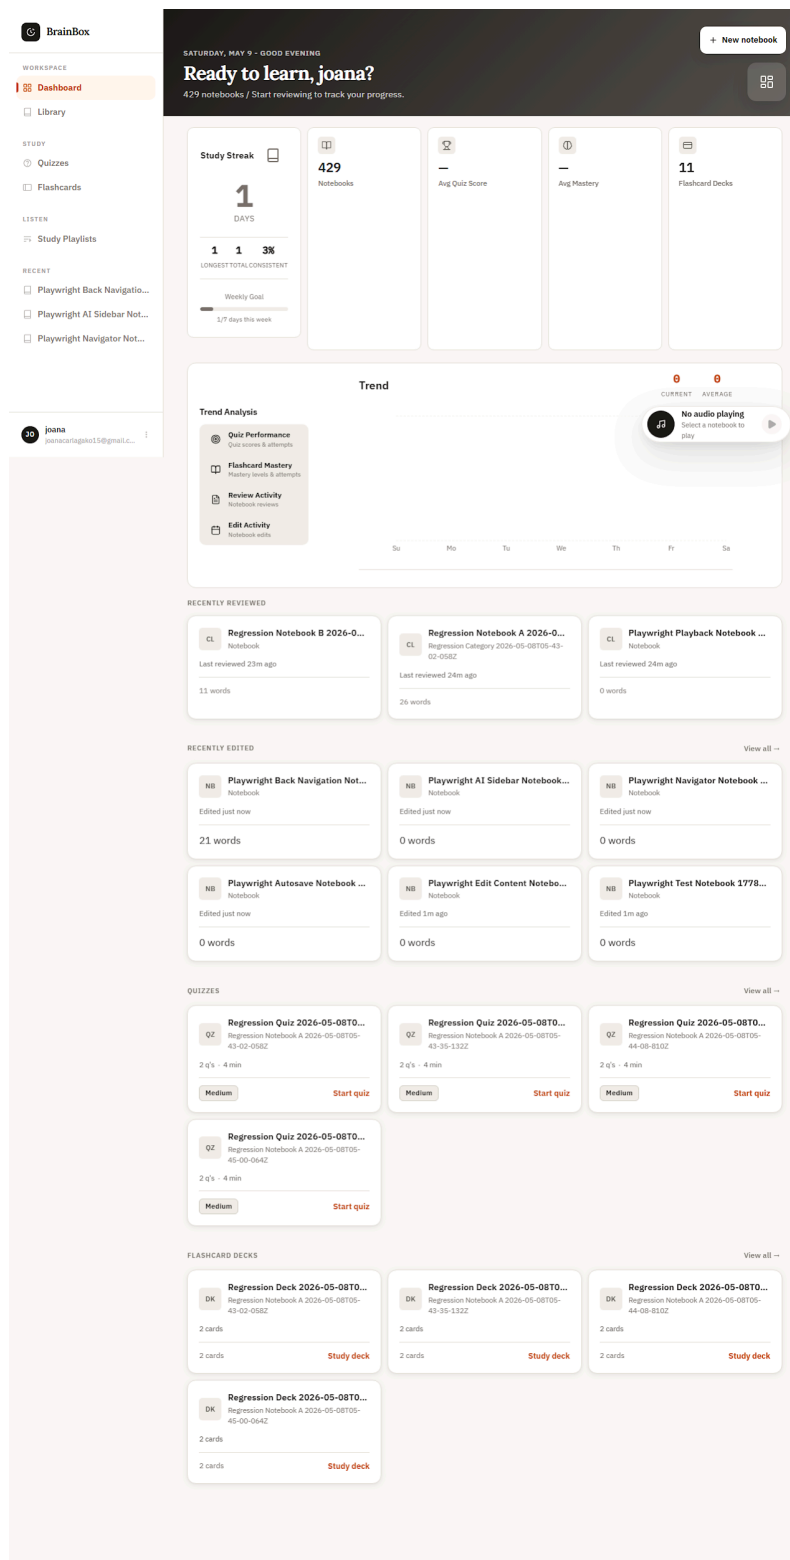

Figure 31. WEB-NB-005 rendered evidence screenshot

WEB-NB-006 - Editor formatting and insert tools

Test Result	PASS
Execution Time	0.0 seconds

Validation	The editor exposes the implemented formatting, insert, zoom, and AI-highlight controls.
Evidence Description	Editor formatting and insert tools was completed successfully in the live web app.

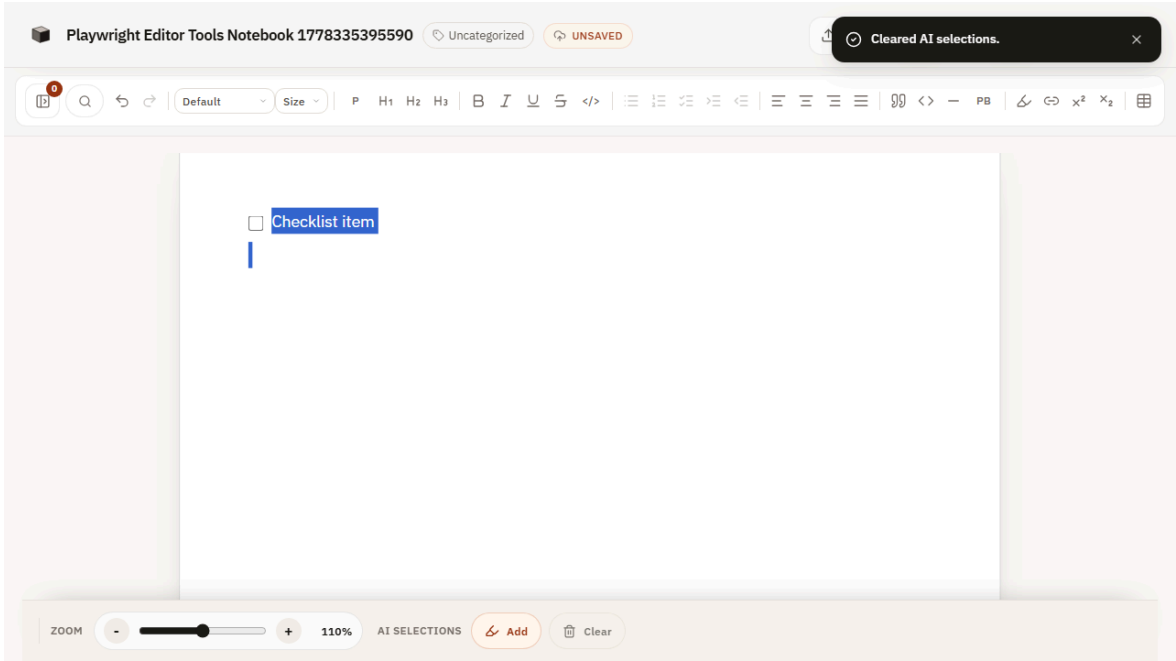

Figure 32. WEB-NB-006 rendered evidence screenshot

WEB-NB-007 - Review mode toggle

Test Result	PASS
Execution Time	0.0 seconds
Validation	Review mode turns on and the document review surface becomes visible.
Evidence Description	Review mode toggle was completed successfully in the live web app.

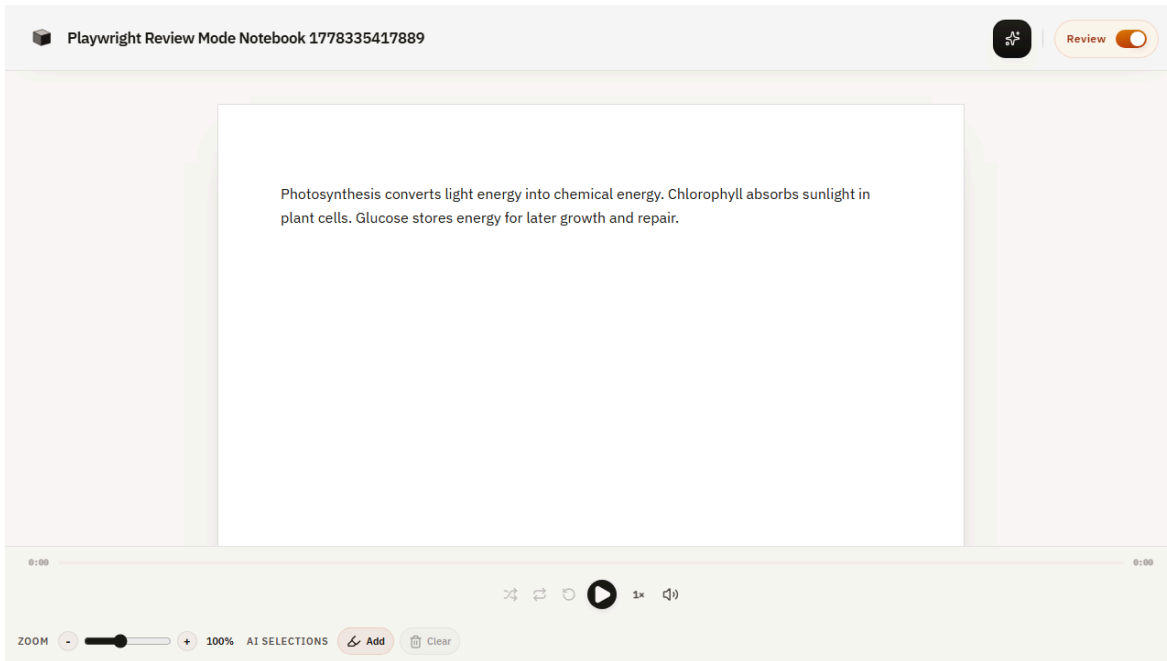

Figure 33. WEB-NB-007 rendered evidence screenshot

WEB-NB-008 - Review mode playbar visible

Test Result	PASS
Execution Time	0.0 seconds
Validation	Review mode turns on and the document review surface becomes visible.
Evidence Description	Review mode playbar visible was completed successfully in the live web app.

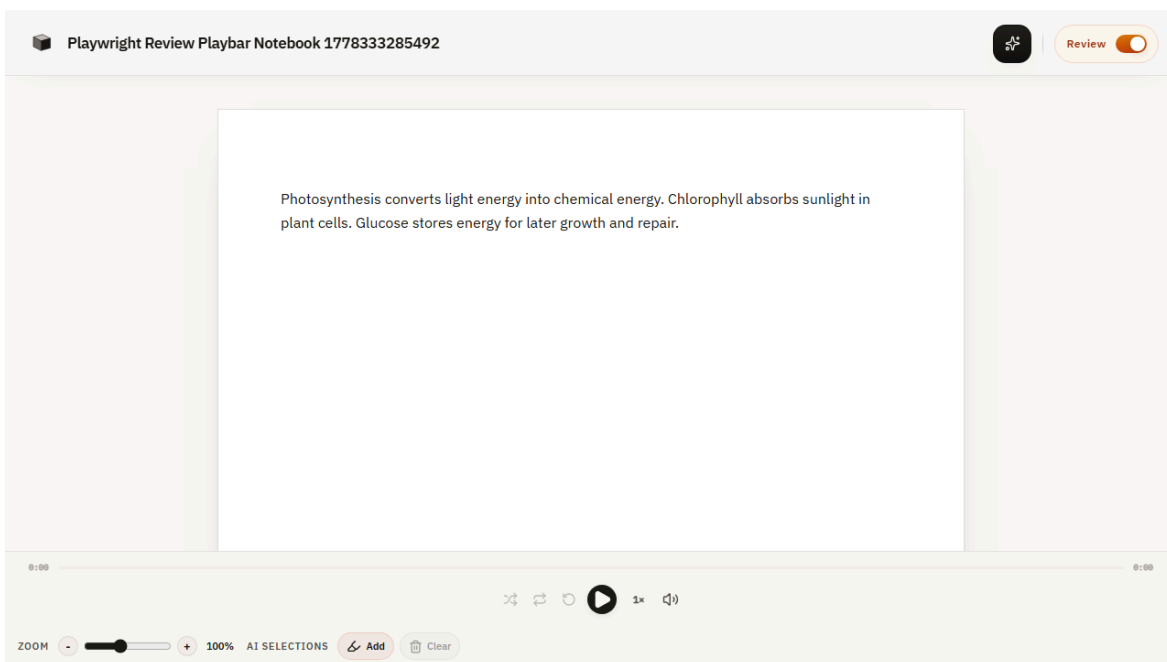

Figure 34. WEB-NB-008 rendered evidence screenshot

WEB-NB-009 - Export menu visible

Test Result	PASS
Execution Time	0.0 seconds
Validation	The export menu opens and exposes the supported PDF, DOCX, and TXT export actions.
Evidence Description	Export menu visible was completed successfully in the live web app.

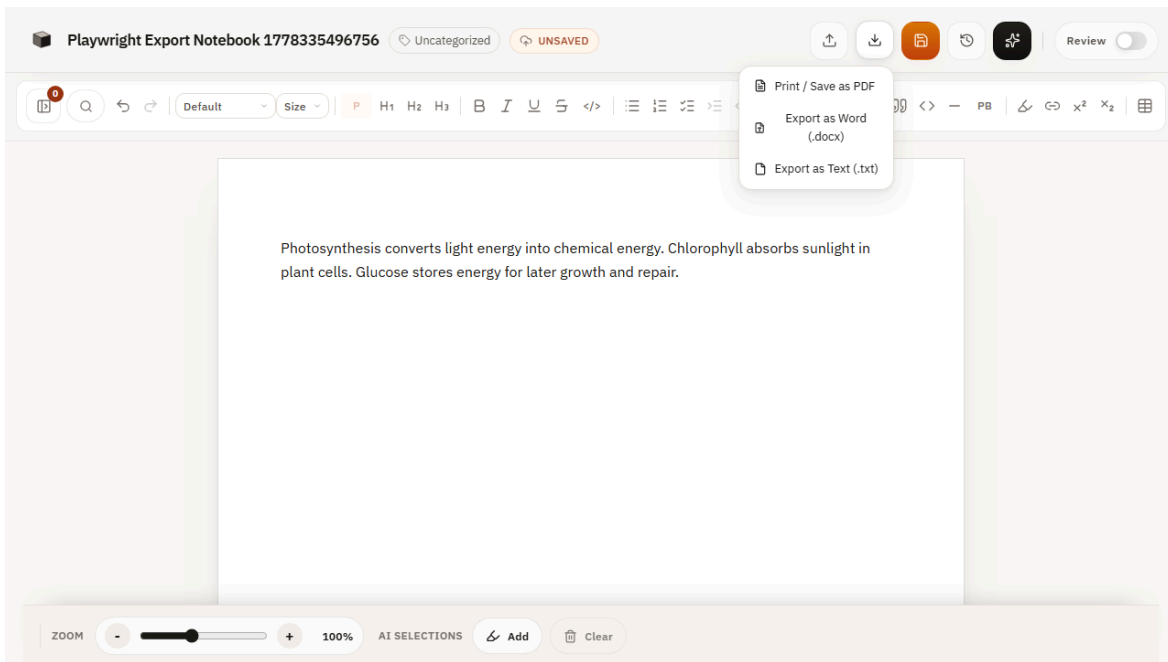

Figure 35. WEB-NB-009 rendered evidence screenshot

WEB-NB-010 - Version history sidebar and version preview controls

Test Result	PASS
Execution Time	0.0 seconds
Validation	The version-history sidebar opens with its visible filters and preview controls.
Evidence Description	Version history sidebar and version preview controls was completed successfully in the live web app.

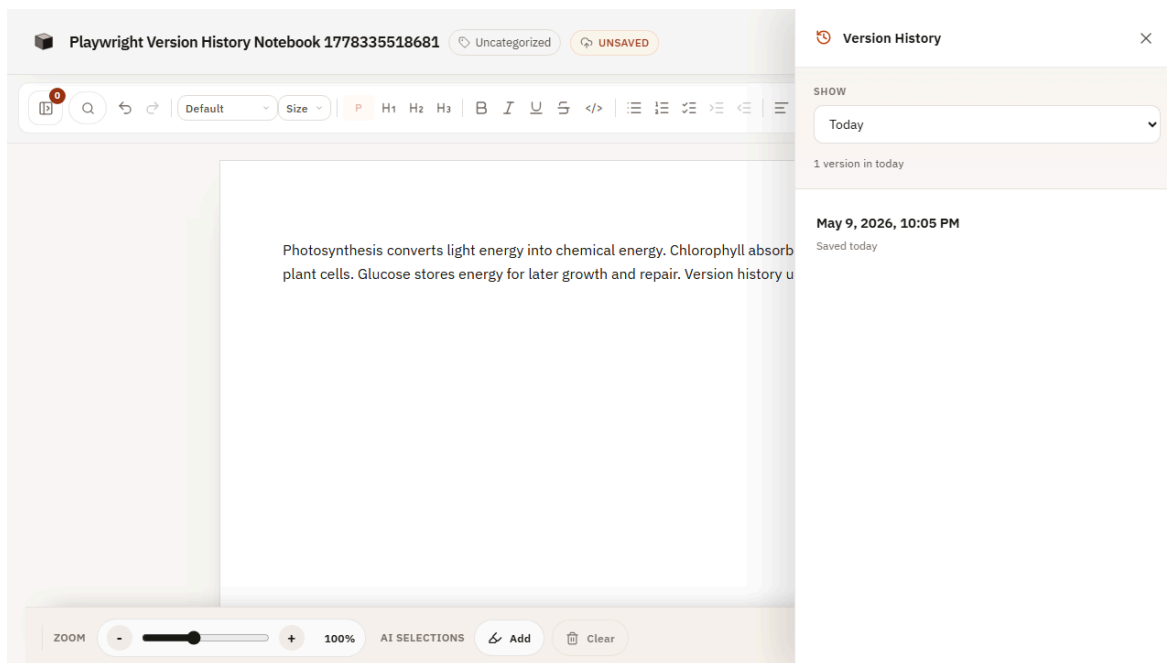

Figure 36. WEB-NB-010 rendered evidence screenshot

6. Notebook Ai Module Evidence

WEB-NB-AI-001 - AI Sidebar opens with default Chat tool

Test Result	PASS
Execution Time	0.0 seconds
Validation	The AI assistant opens successfully and defaults to the Chat tool.
Evidence Description	AI Sidebar opens with default Chat tool was completed successfully in the live web app.

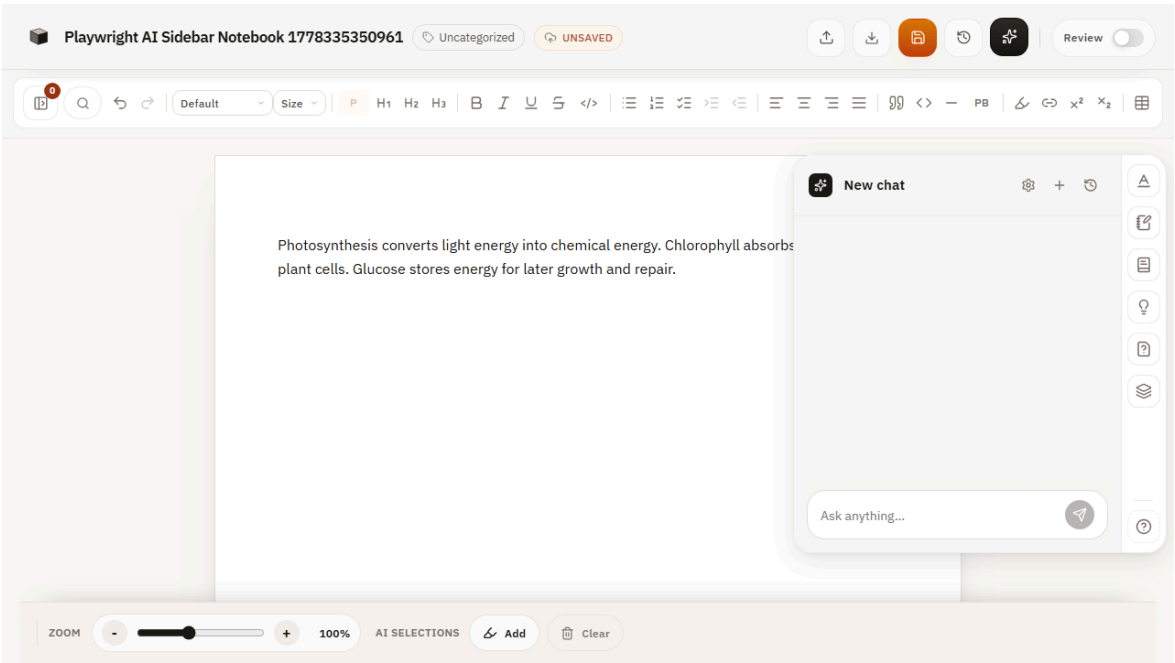

Figure 37. WEB-NB-AI-001 rendered evidence screenshot

WEB-NB-AI-002 - Send prompt, generate note, accept AI changes

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Send prompt, generate note, accept AI changes was completed successfully in the live web app.

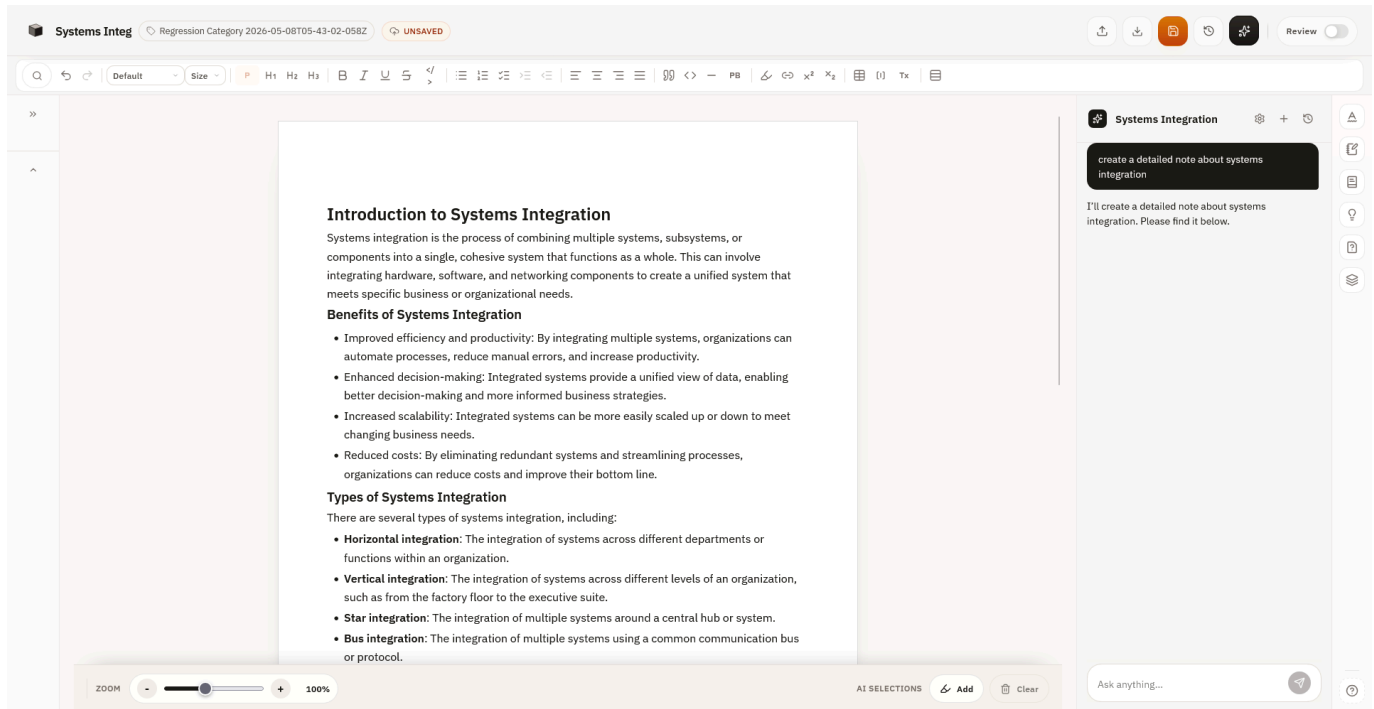

Figure 38. WEB-NB-AI-002 rendered evidence screenshot

WEB-NB-AI-003 - Select AI text, run Improve, accept changes

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Select AI text, run Improve, accept changes was completed successfully in the live web app.

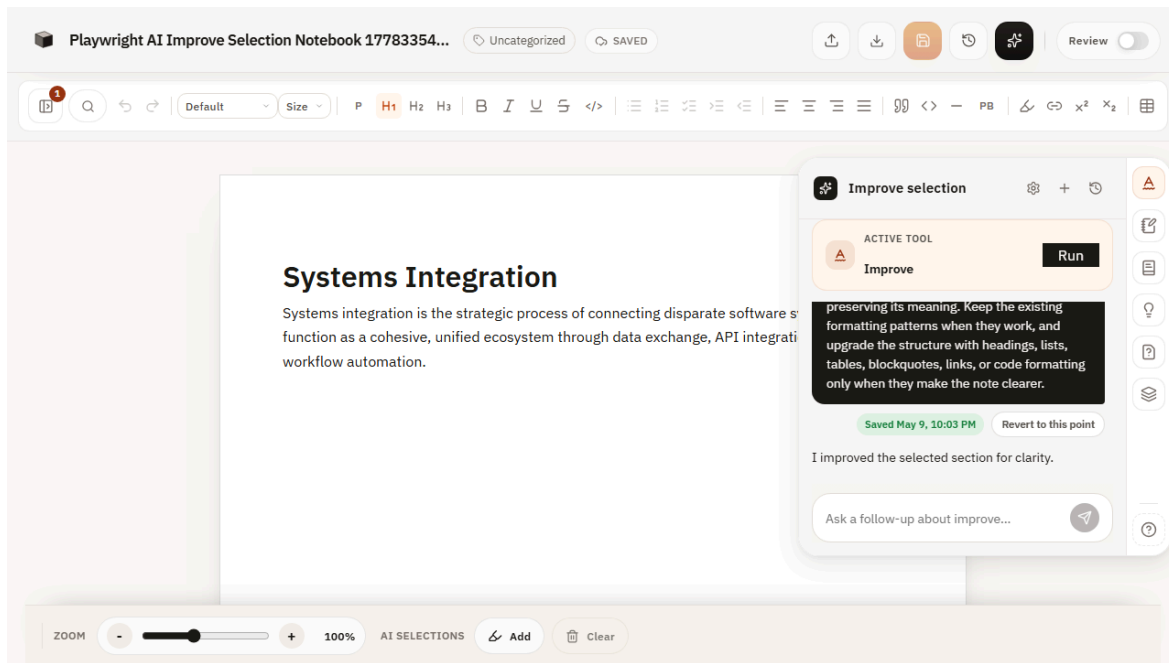

Figure 39. WEB-NB-AI-003 rendered evidence screenshot

WEB-NB-AI-004 - Select AI text, run Expand, accept changes

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Select AI text, run Expand, accept changes was completed successfully in the live web app.

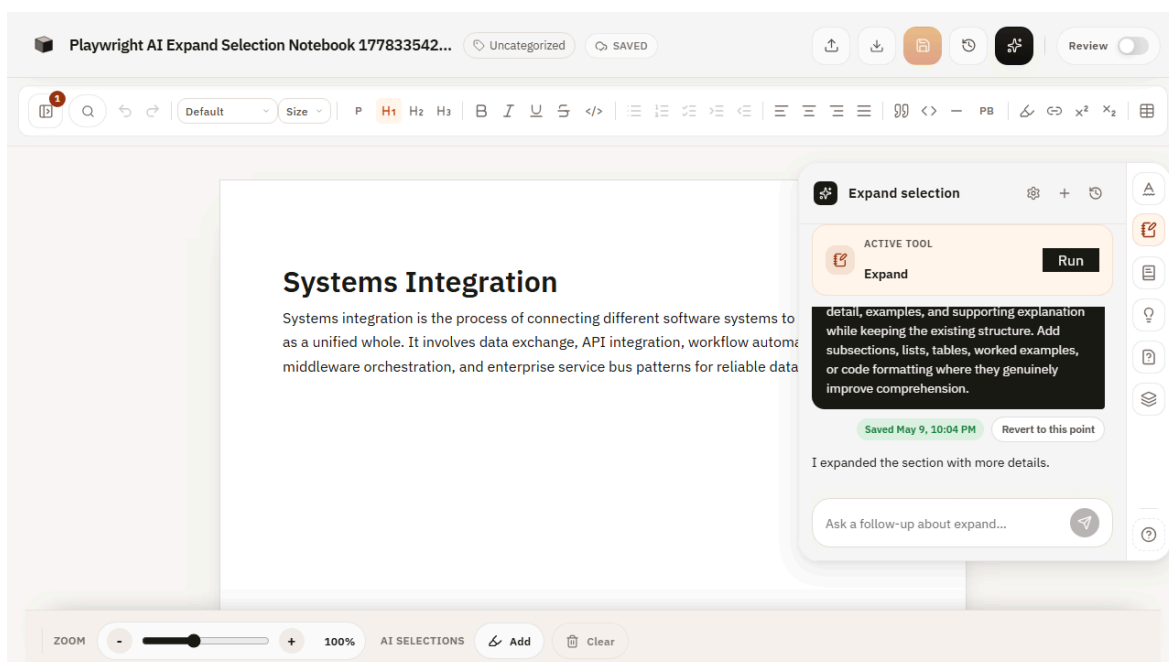

Figure 40. WEB-NB-AI-004 rendered evidence screenshot

WEB-NB-AI-005 - Select AI text, run Summarize

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Select AI text, run Summarize was completed successfully in the live web app.

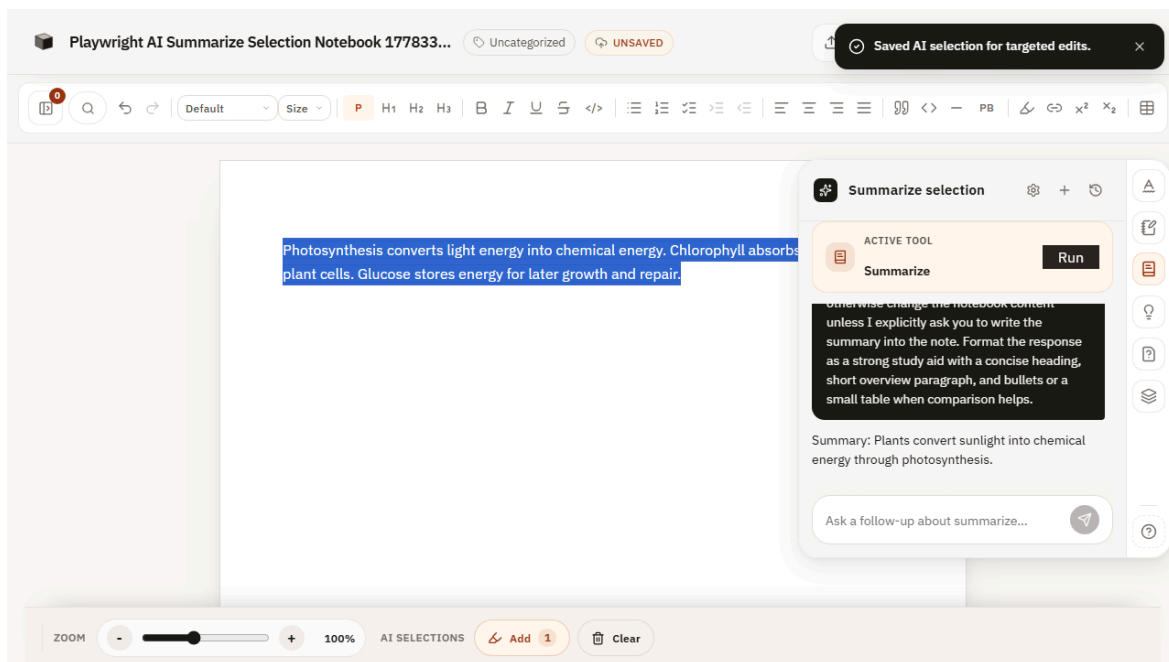

Figure 41. WEB-NB-AI-005 rendered evidence screenshot

WEB-NB-AI-006 - Select AI text, run Explain

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Select AI text, run Explain was completed successfully in the live web app.

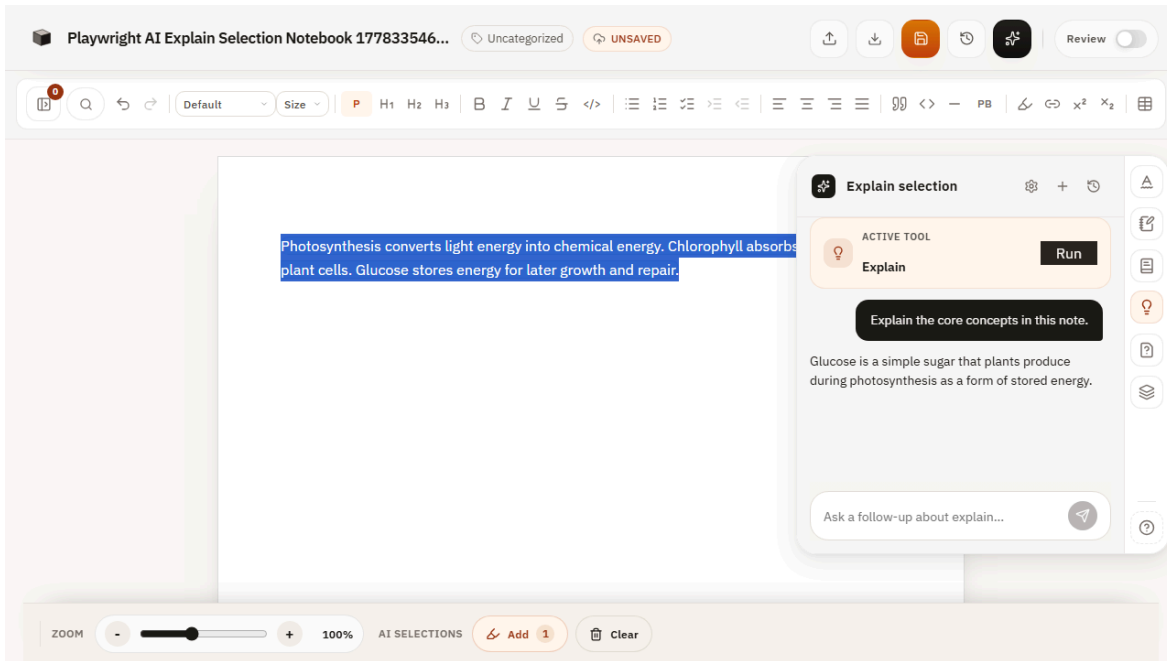

Figure 42. WEB-NB-AI-006 rendered evidence screenshot

WEB-NB-AI-007 - Quiz tool run and view quiz

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Quiz tool run and view quiz was completed successfully in the live web app.

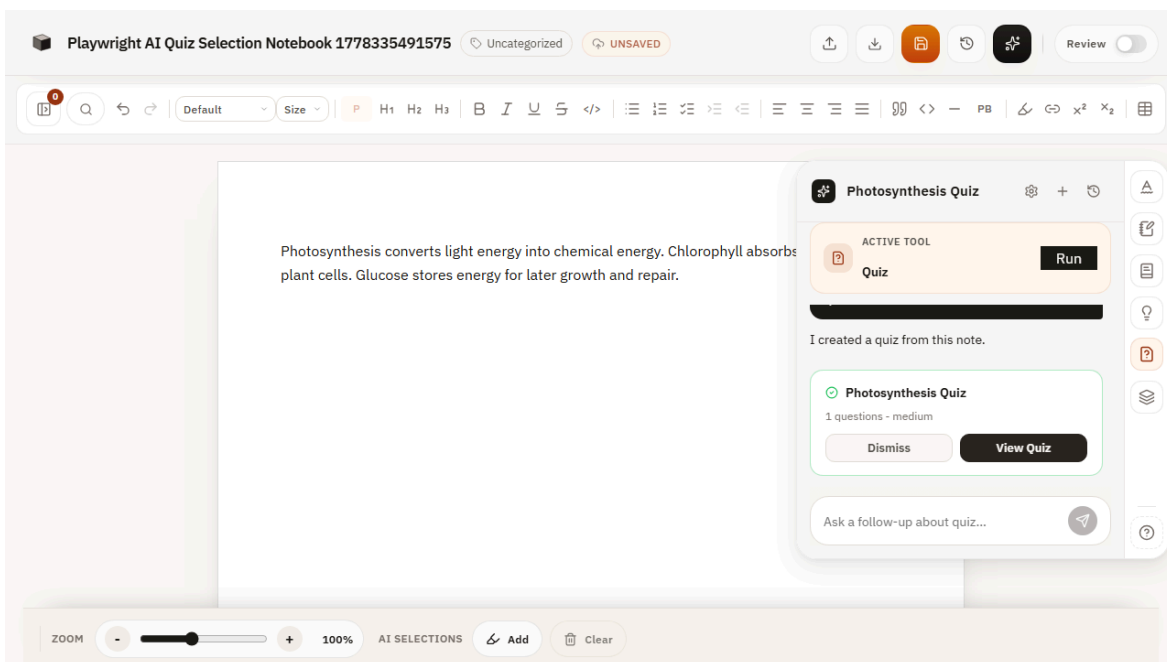

Figure 43. WEB-NB-AI-007 rendered evidence screenshot

WEB-NB-AI-008 - Flashcard tool run and view flashcard

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Flashcard tool run and view flashcard was completed successfully in the live web app.

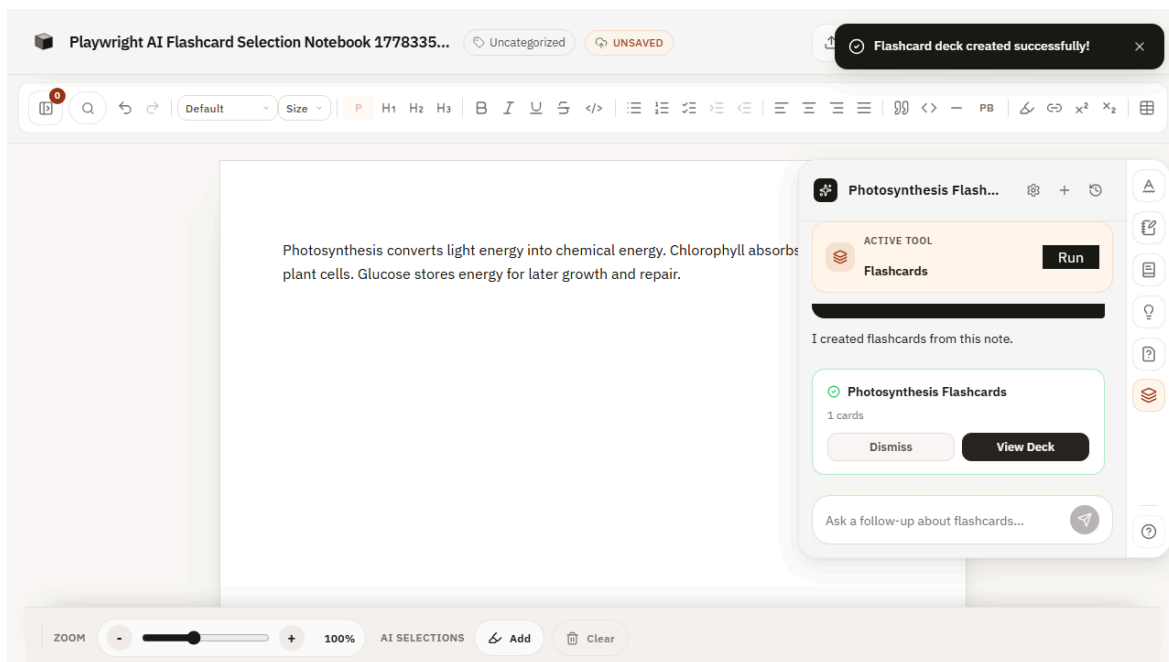

Figure 44. WEB-NB-AI-008 rendered evidence screenshot

WEB-NB-AI-009 - AI tool instructions open from rail

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	AI tool instructions open from rail was completed successfully in the live web app.

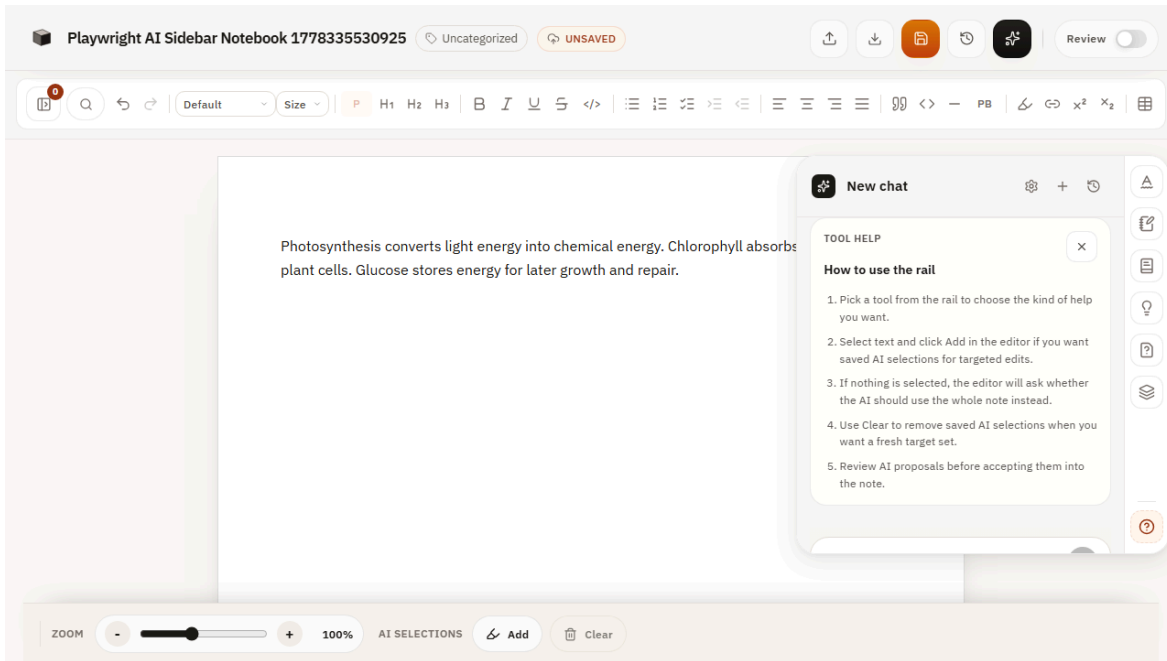

Figure 45. WEB-NB-AI-009 rendered evidence screenshot

WEB-NB-AI-010 - AI provider settings panel opens

Test Result	PASS
Execution Time	0.0 seconds
Validation	The AI provider settings panel opens and shows the configurable provider fields.
Evidence Description	AI provider settings panel opens was completed successfully in the live web app.

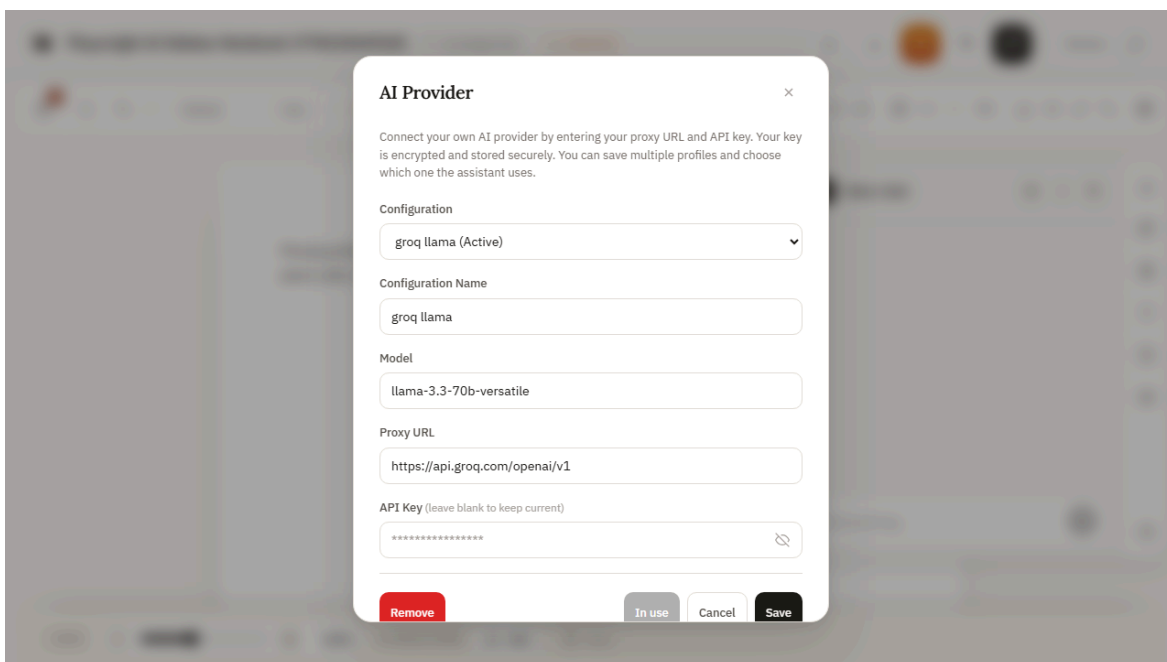

Figure 46. WEB-NB-AI-010 rendered evidence screenshot

WEB-NB-AI-011 - Chat history opens and loads previous conversation

Test Result	PASS
Execution Time	0.0 seconds
Validation	The page loads successfully and its core content is visible.
Evidence Description	Chat history opens and loads previous conversation was completed successfully in the live web app.

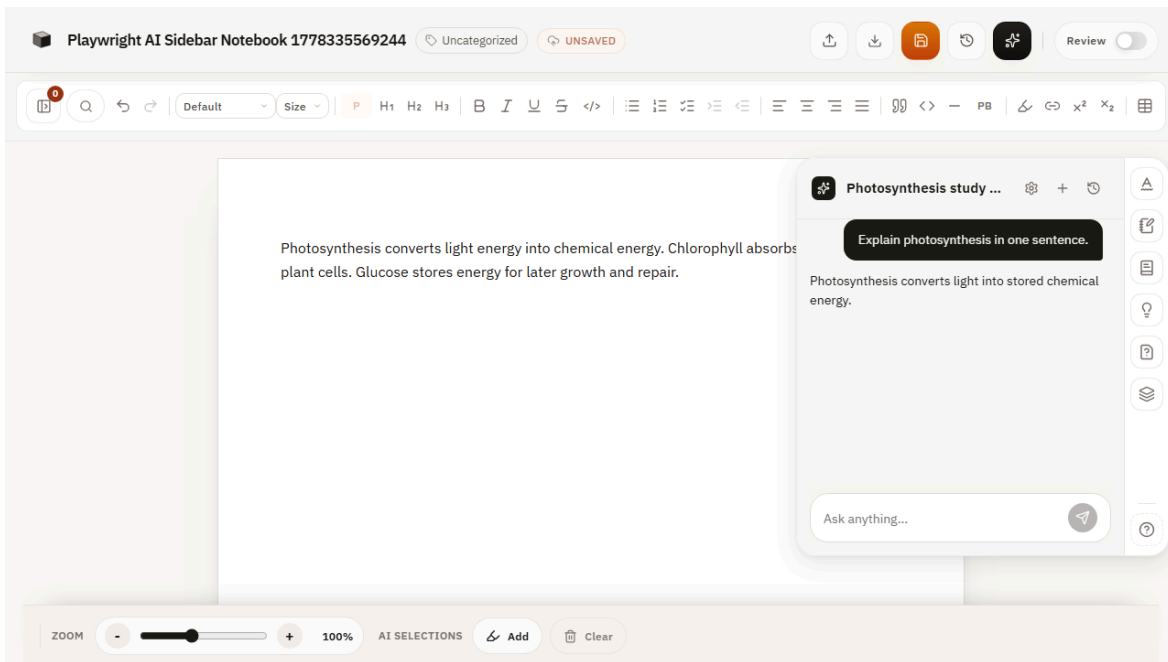

Figure 47. WEB-NB-AI-011 rendered evidence screenshot

WEB-NB-AI-012 - AI sidebar closes from navbar button

Test Result	PASS
Execution Time	0.0 seconds
Validation	The assistant closes cleanly and the reopen control remains available.
Evidence Description	AI sidebar closes from navbar button was completed successfully in the live web app.

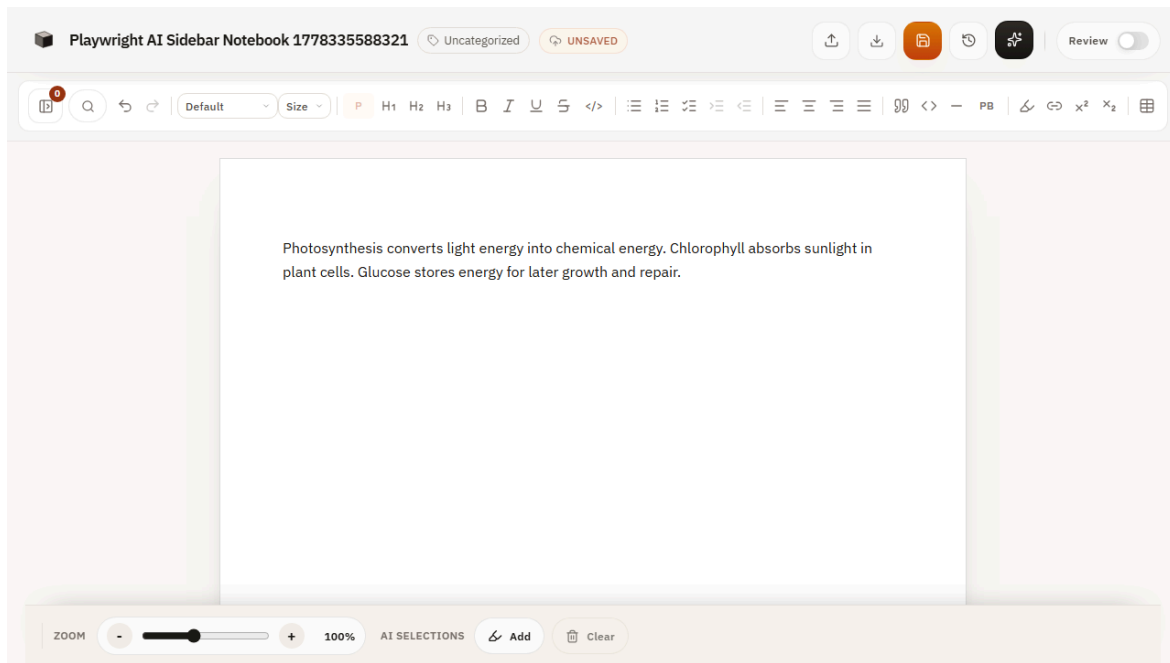

Figure 48. WEB-NB-AI-012 rendered evidence screenshot

7. Quiz Module Evidence

WEB-QZ-001 - Quizzes page loads

Test Result	PASS
Execution Time	0.0 seconds
Validation	The page loads successfully and its core content is visible.
Evidence Description	Quizzes page loads was completed successfully in the live web app.

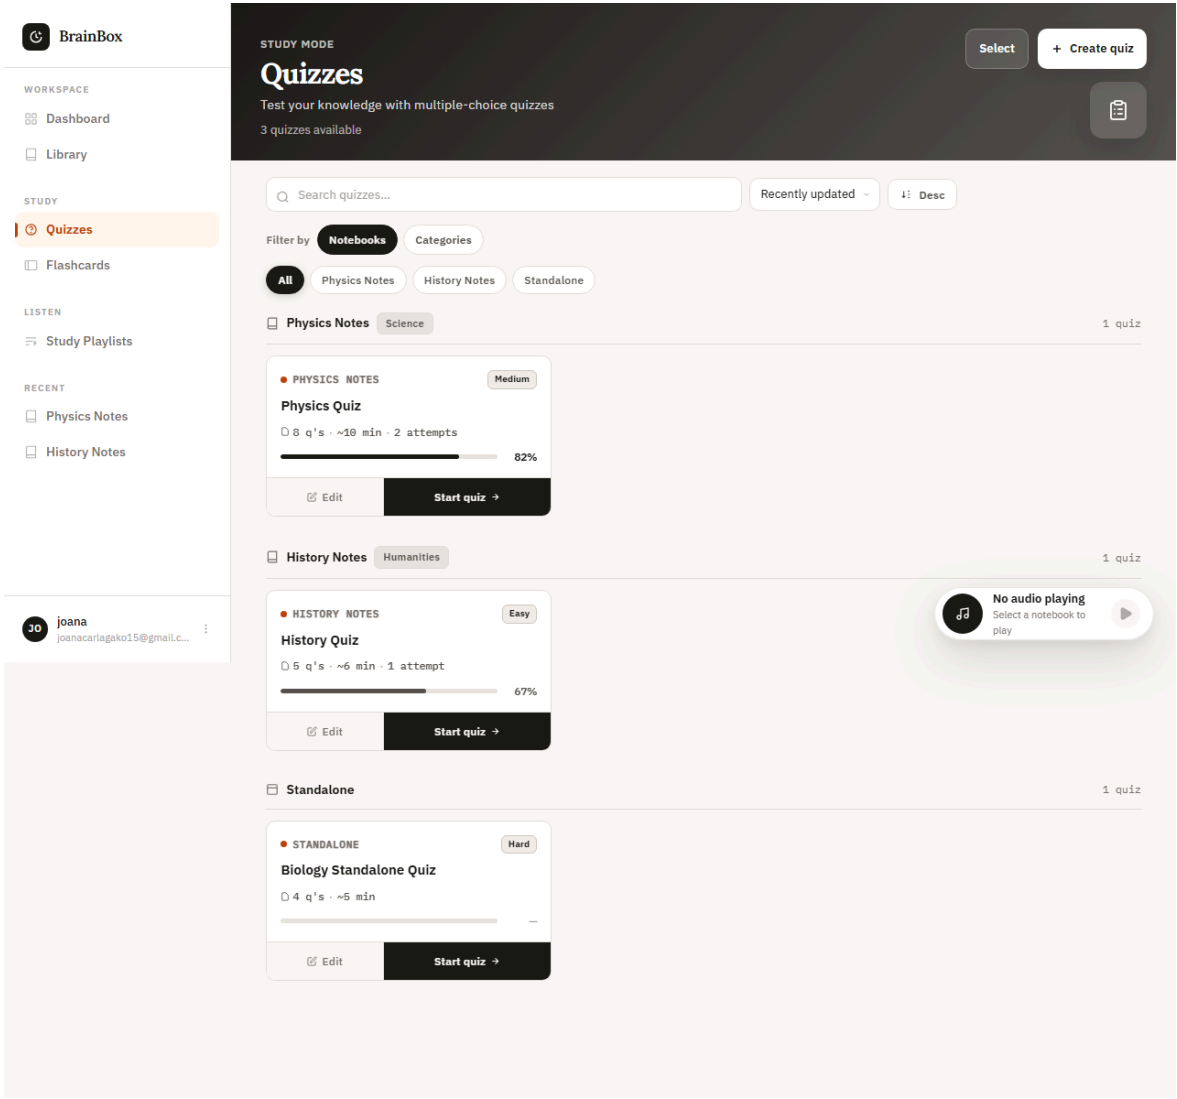

Figure 49. WEB-QZ-001 rendered evidence screenshot

WEB-QZ-002 - Create quiz page

Test Result	PASS
Execution Time	0.0 seconds

Validation	The create flow opens correctly and accepts the intended input.
Evidence Description	Create quiz page was completed successfully in the live web app.

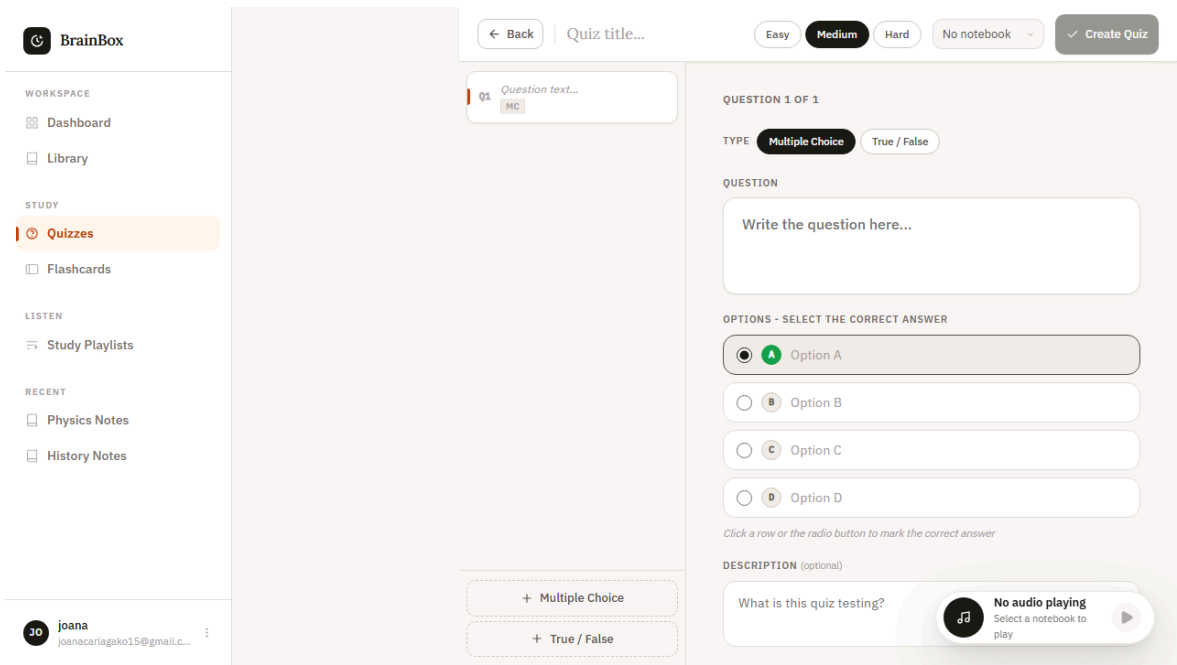

Figure 50. WEB-QZ-002 rendered evidence screenshot

WEB-QZ-003 - Search quizzes

Test Result	PASS
Execution Time	0.0 seconds
Validation	The relevant search control accepts input and updates the visible list or state.
Evidence Description	Search quizzes was completed successfully in the live web app.

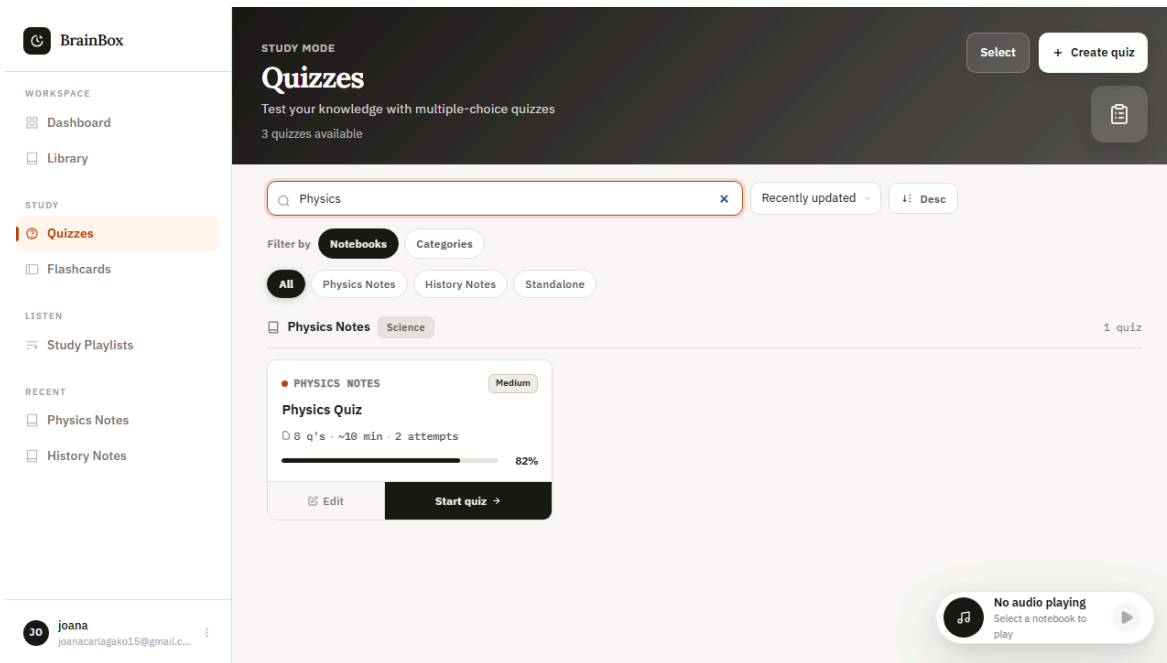

Figure 51. WEB-QZ-003 rendered evidence screenshot

WEB-QZ-004 - Sort quizzes

Test Result	PASS
Execution Time	0.0 seconds
Validation	The sort control is usable and the current view updates without errors.
Evidence Description	Sort quizzes was completed successfully in the live web app.

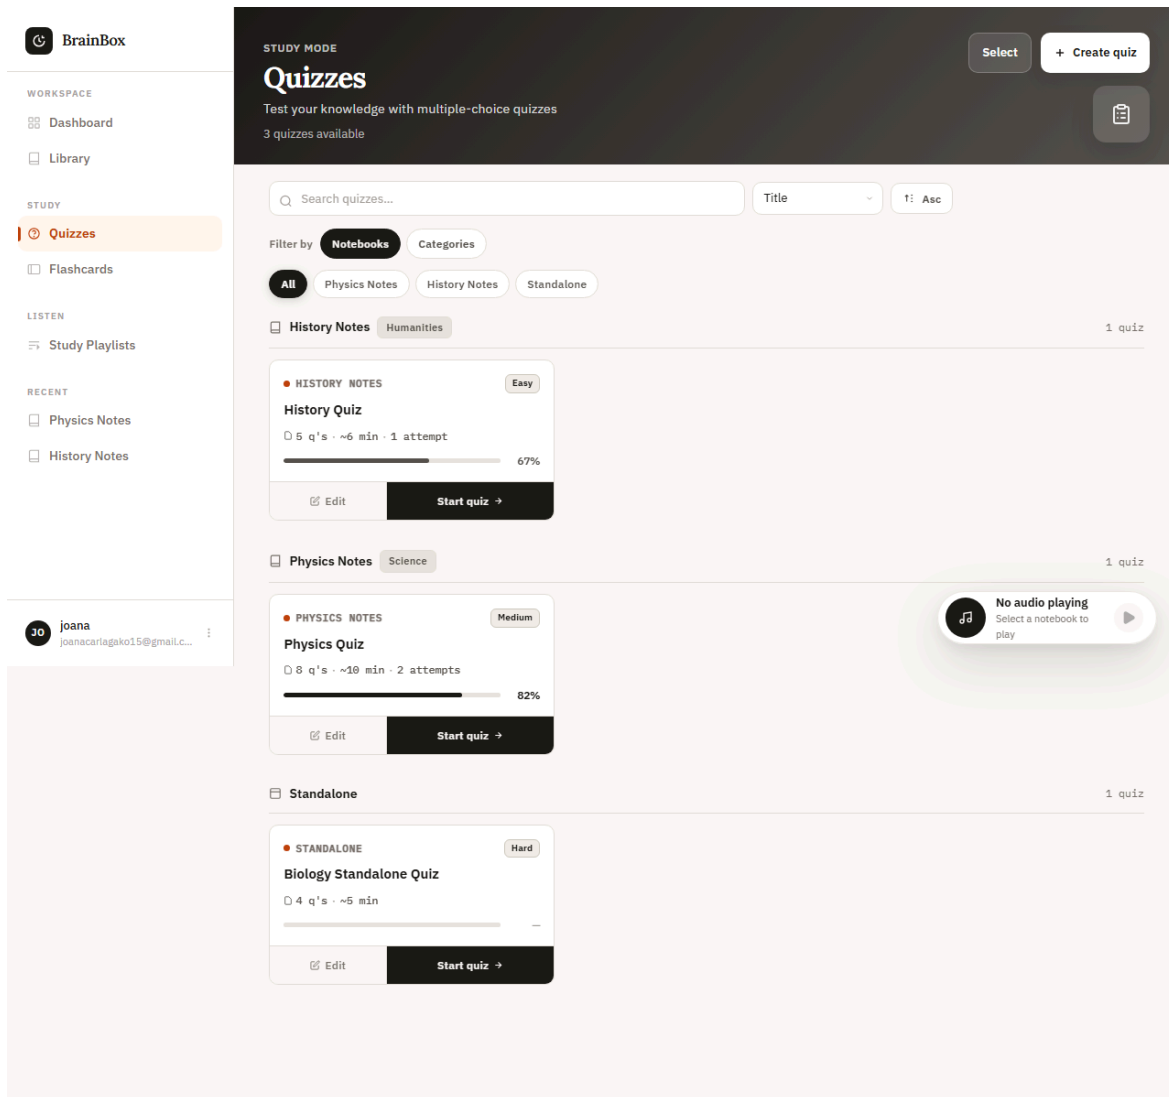

Figure 52. WEB-QZ-004 rendered evidence screenshot

WEB-QZ-005 - Start quiz player

Test Result	PASS
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Start quiz player was completed successfully in the live web app.

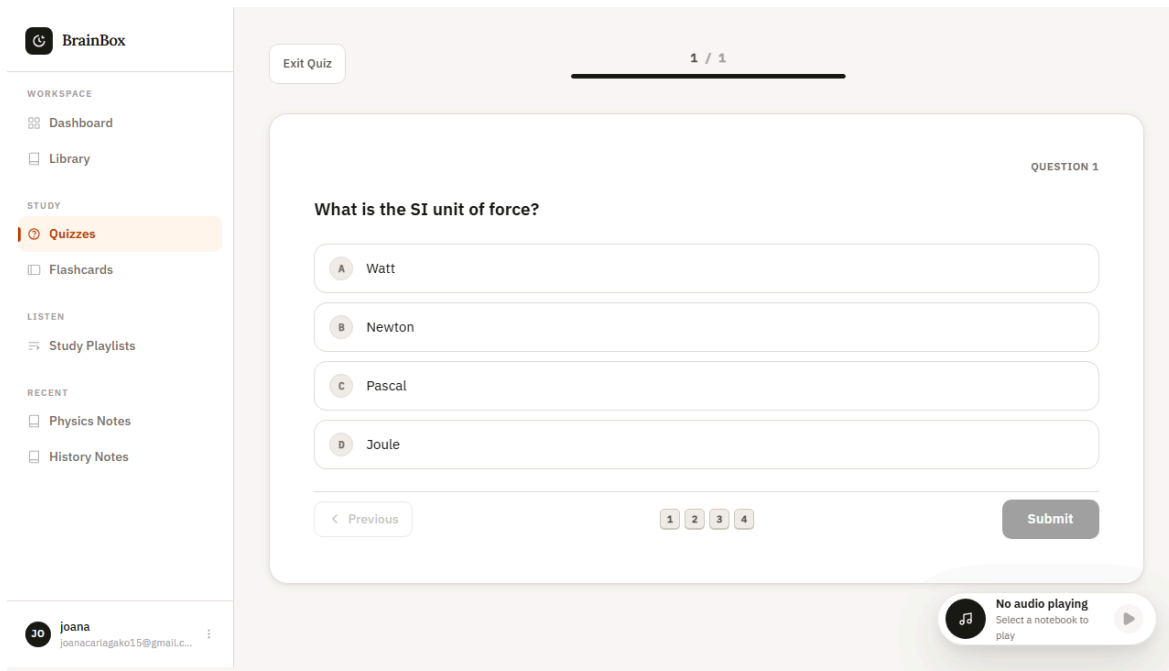

Figure 53. WEB-QZ-005 rendered evidence screenshot

WEB-QZ-006 - Edit quiz accessible

Test Result	PASS
Execution Time	0.0 seconds
Validation	The edit surface is reachable and the relevant controls are visible.
Evidence Description	Edit quiz accessible was completed successfully in the live web app.

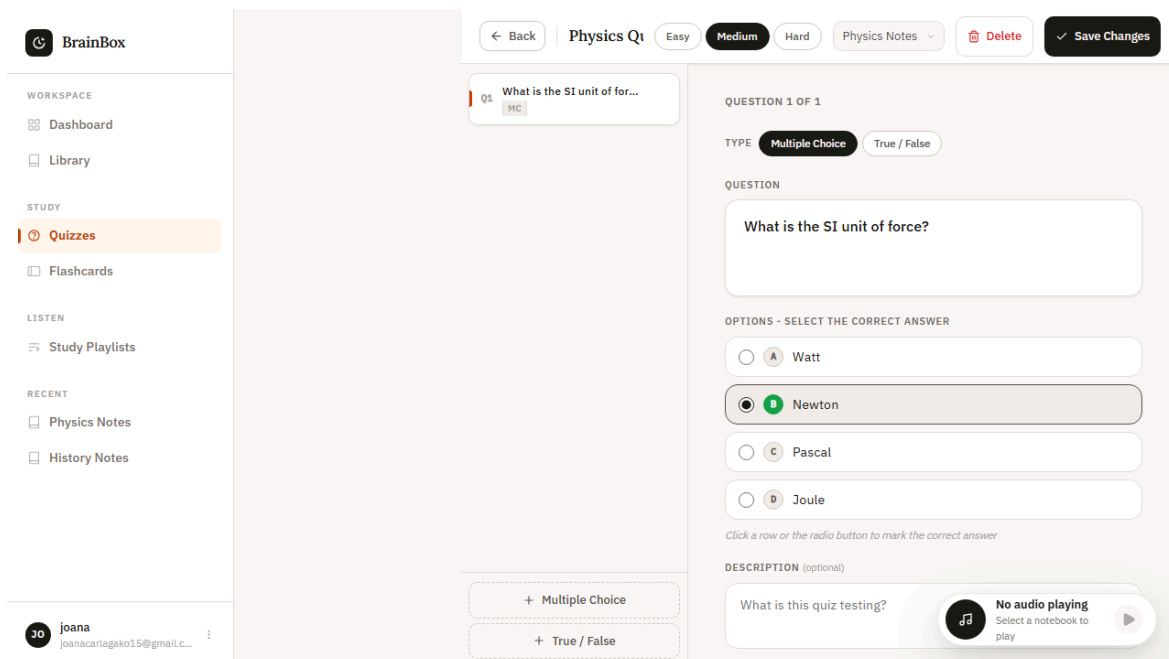

Figure 54. WEB-QZ-006 rendered evidence screenshot

WEB-QZ-007 - Select mode for bulk delete

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Select mode for bulk delete was completed successfully in the live web app.

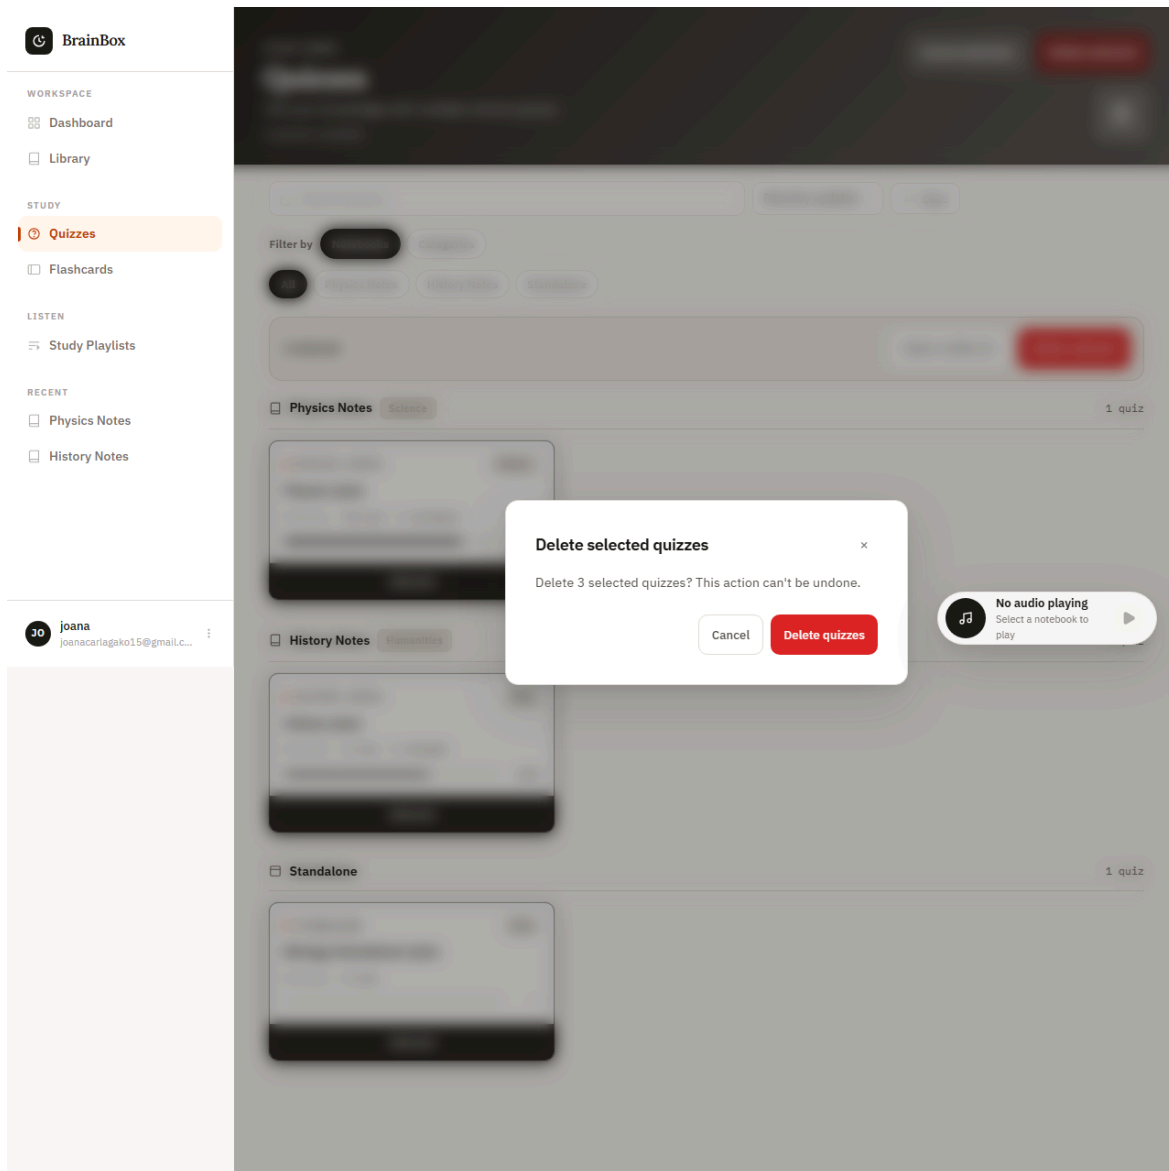

Figure 55. WEB-QZ-007 rendered evidence screenshot

WEB-QZ-008 - Filter quizzes by pills

Test Result	PASS
Execution Time	0.0 seconds
Validation	The selected filter updates the visible content set without breaking navigation.
Evidence Description	Filter quizzes by pills was completed successfully in the live web app.

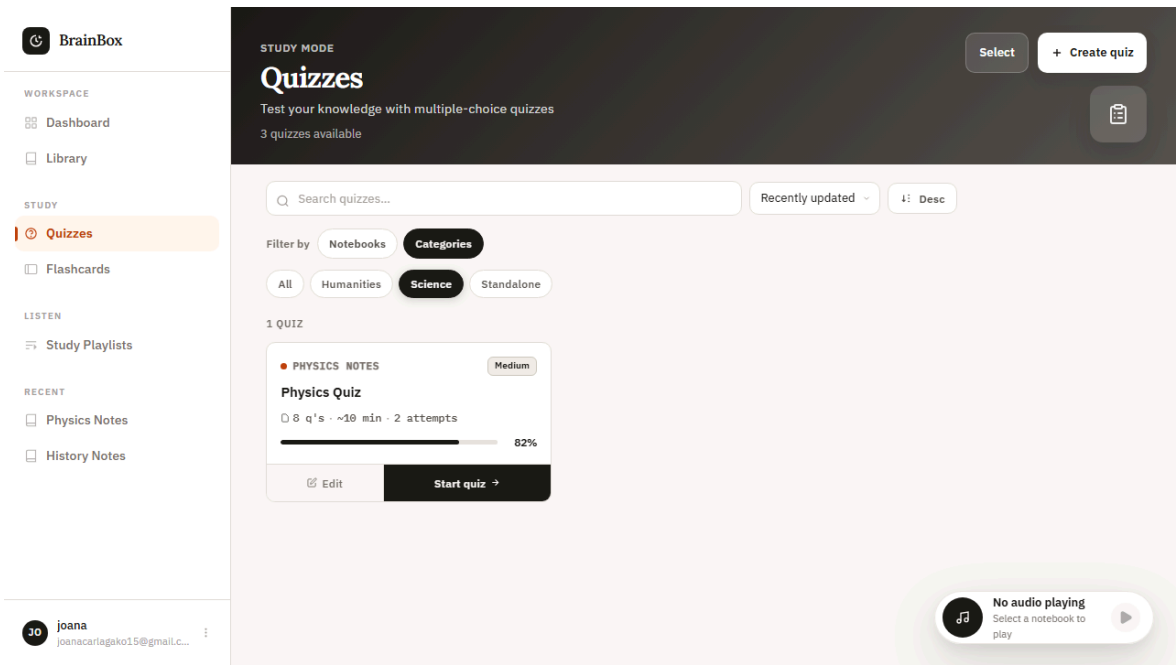

Figure 56. WEB-QZ-008 rendered evidence screenshot

8. Flashcard Module Evidence

WEB-FC-001 - Flashcards page loads

Test Result	PASS
Execution Time	0.0 seconds
Validation	The page loads successfully and its core content is visible.
Evidence Description	Flashcards page loads was completed successfully in the live web app.

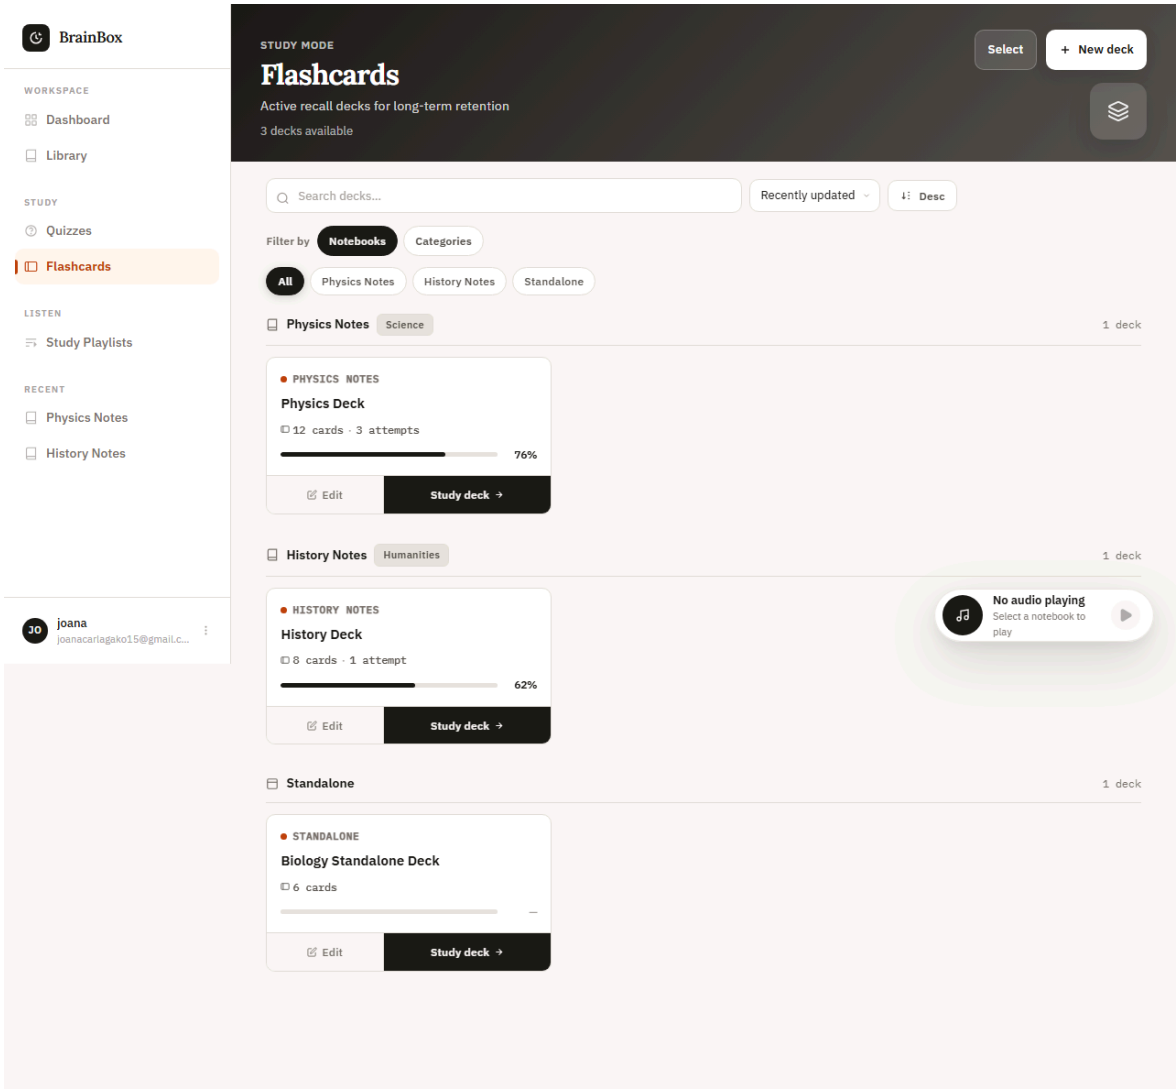

Figure 57. WEB-FC-001 rendered evidence screenshot

WEB-FC-002 - Create deck page

Test Result	PASS
Execution Time	0.0 seconds

Validation	The create flow opens correctly and accepts the intended input.
Evidence Description	Create deck page was completed successfully in the live web app.

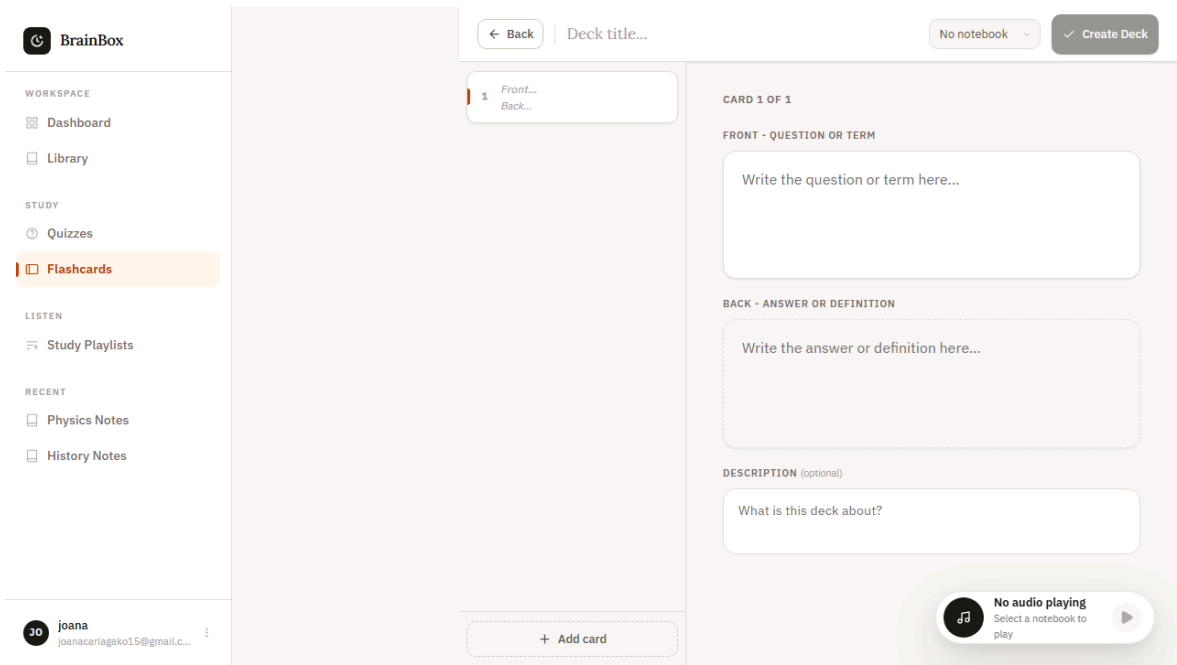

Figure 58. WEB-FC-002 rendered evidence screenshot

WEB-FC-003 - Search flashcard decks

Test Result	PASS
Execution Time	0.0 seconds
Validation	The relevant search control accepts input and updates the visible list or state.
Evidence Description	Search flashcard decks was completed successfully in the live web app.

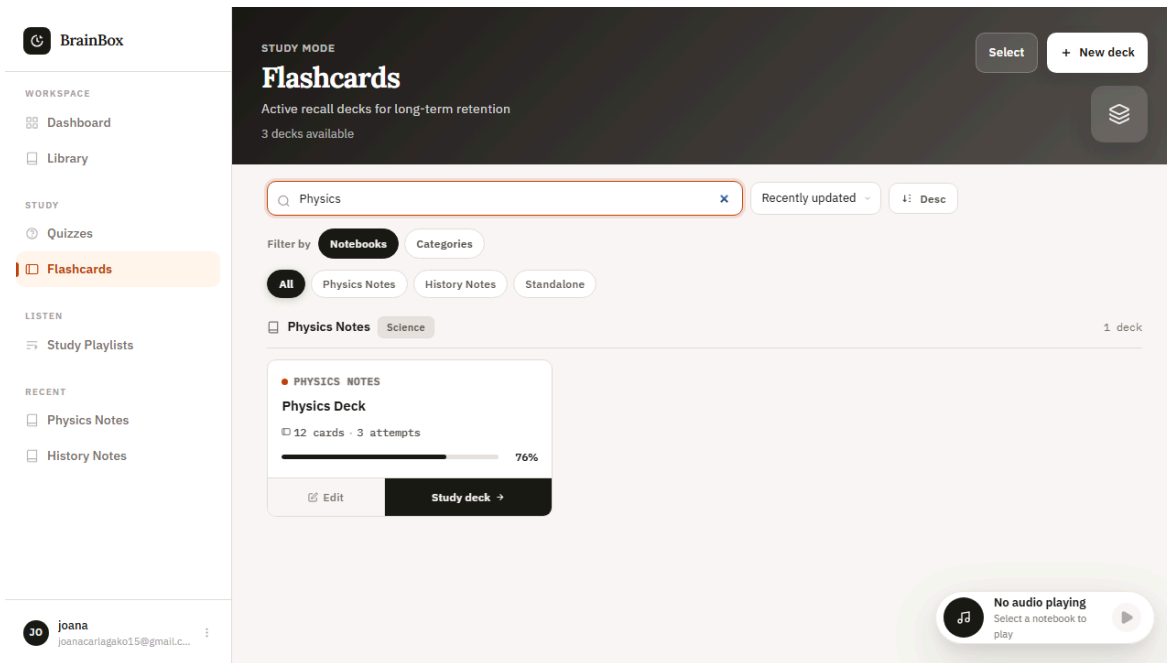

Figure 59. WEB-FC-003 rendered evidence screenshot

WEB-FC-004 - Sort flashcard decks

Test Result	PASS
Execution Time	0.0 seconds
Validation	The sort control is usable and the current view updates without errors.
Evidence Description	Sort flashcard decks was completed successfully in the live web app.

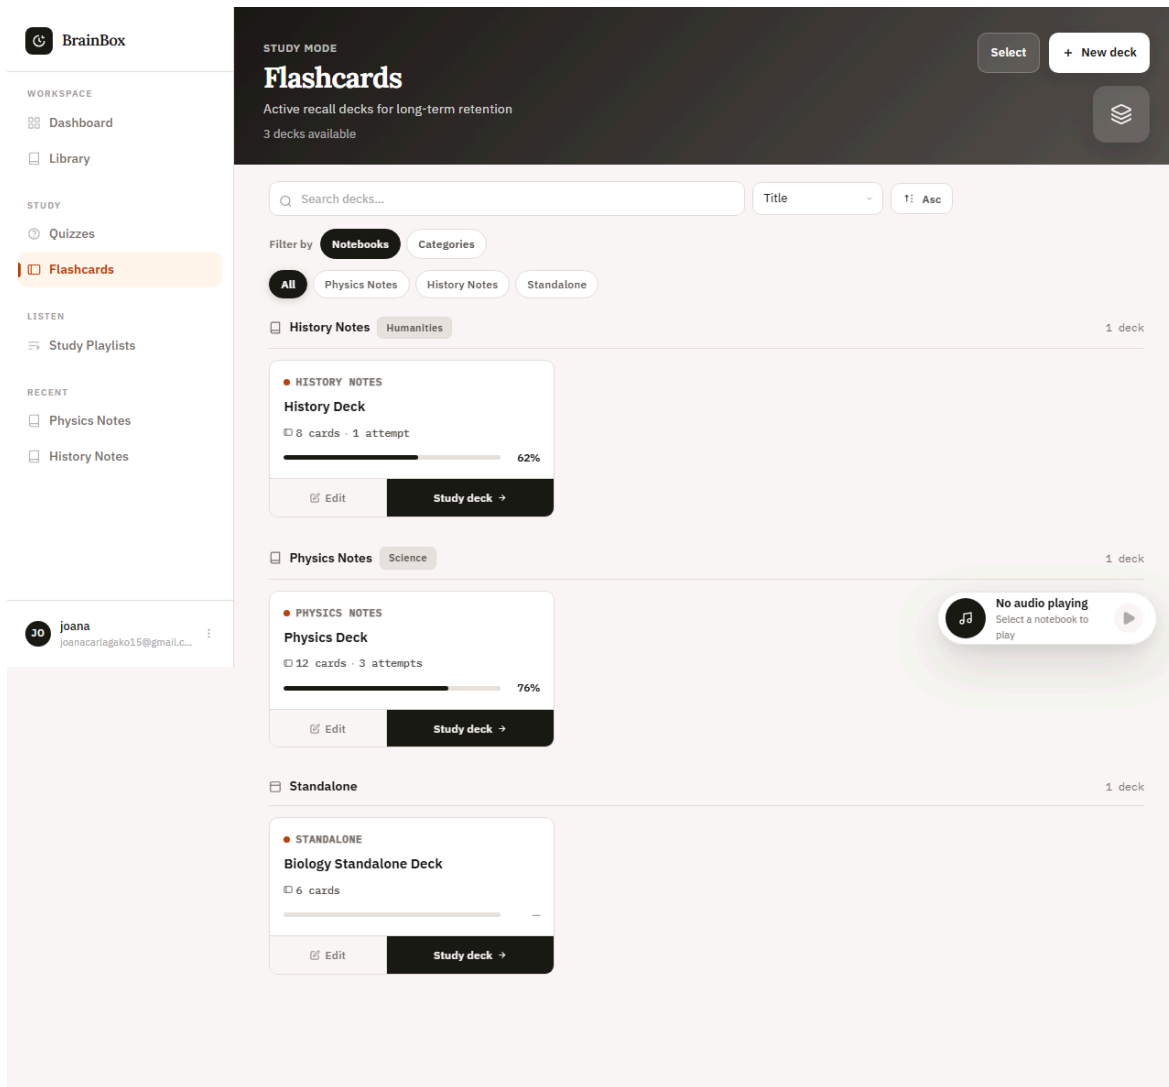

Figure 60. WEB-FC-004 rendered evidence screenshot

WEB-FC-005 - Study deck player

Test Result	PASS
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Study deck player was completed successfully in the live web app.

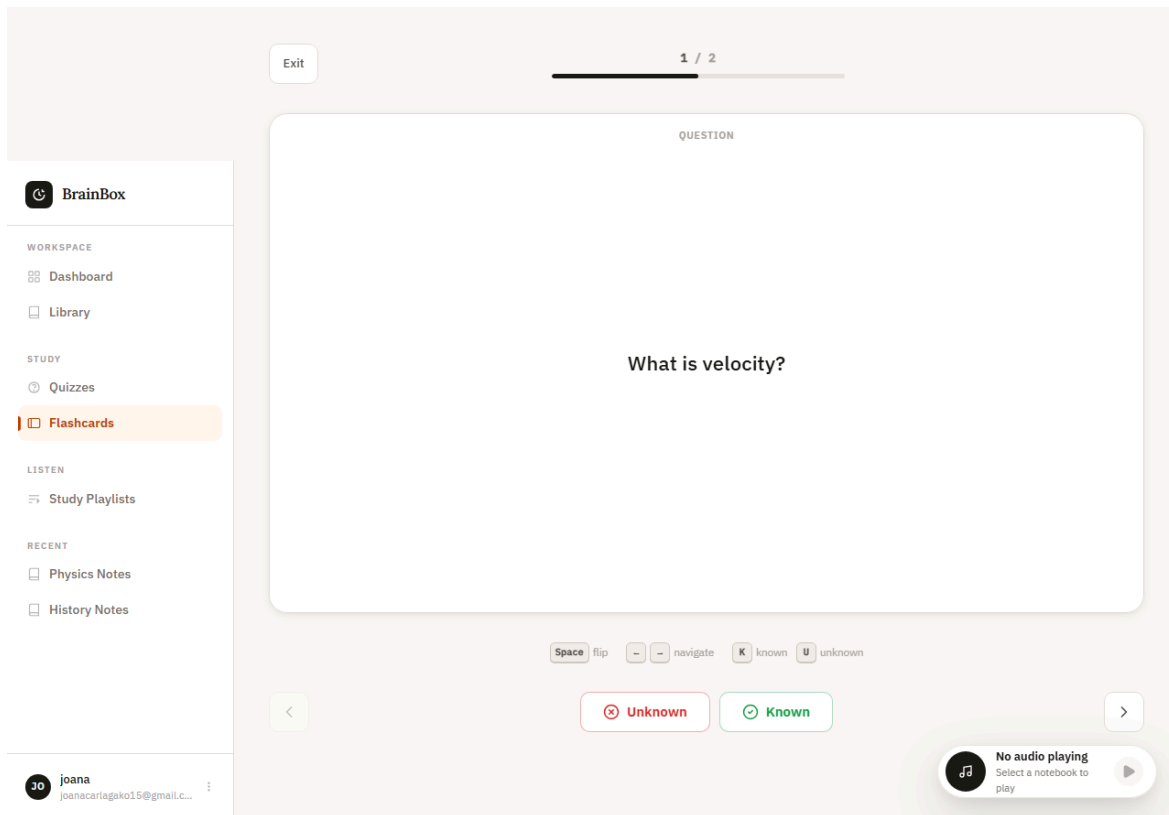

Figure 61. WEB-FC-005 rendered evidence screenshot

WEB-FC-006 - Edit deck accessible

Test Result	PASS
Execution Time	0.0 seconds
Validation	The edit surface is reachable and the relevant controls are visible.
Evidence Description	Edit deck accessible was completed successfully in the live web app.

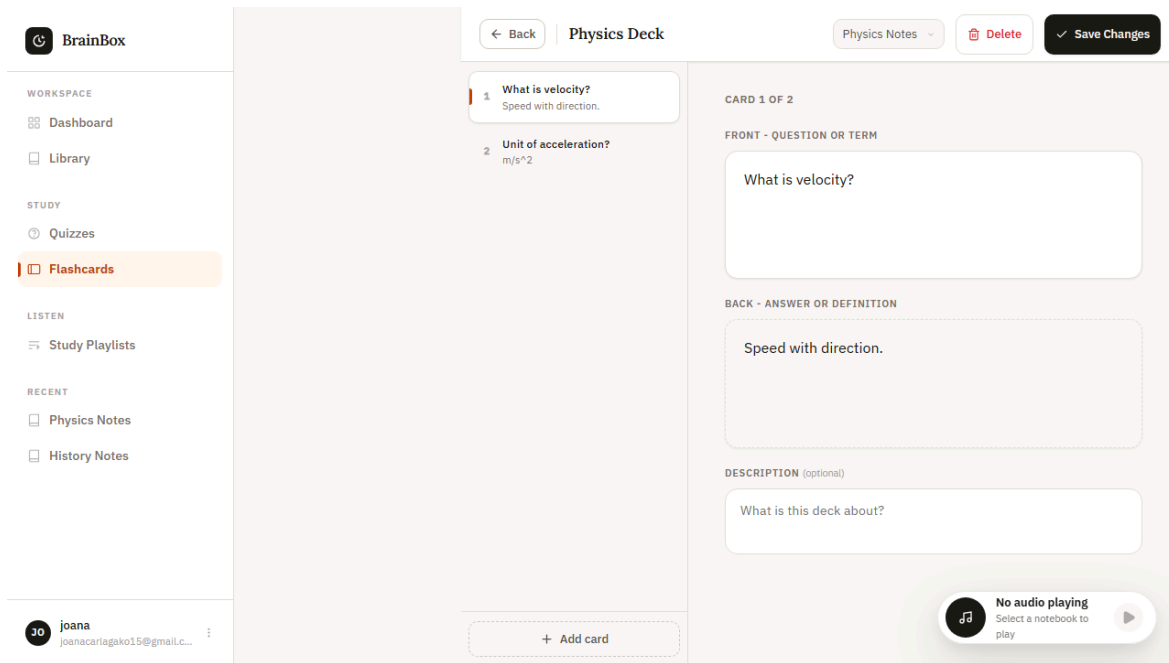

Figure 62. WEB-FC-006 rendered evidence screenshot

WEB-FC-007 - Select mode for bulk delete

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Select mode for bulk delete was completed successfully in the live web app.

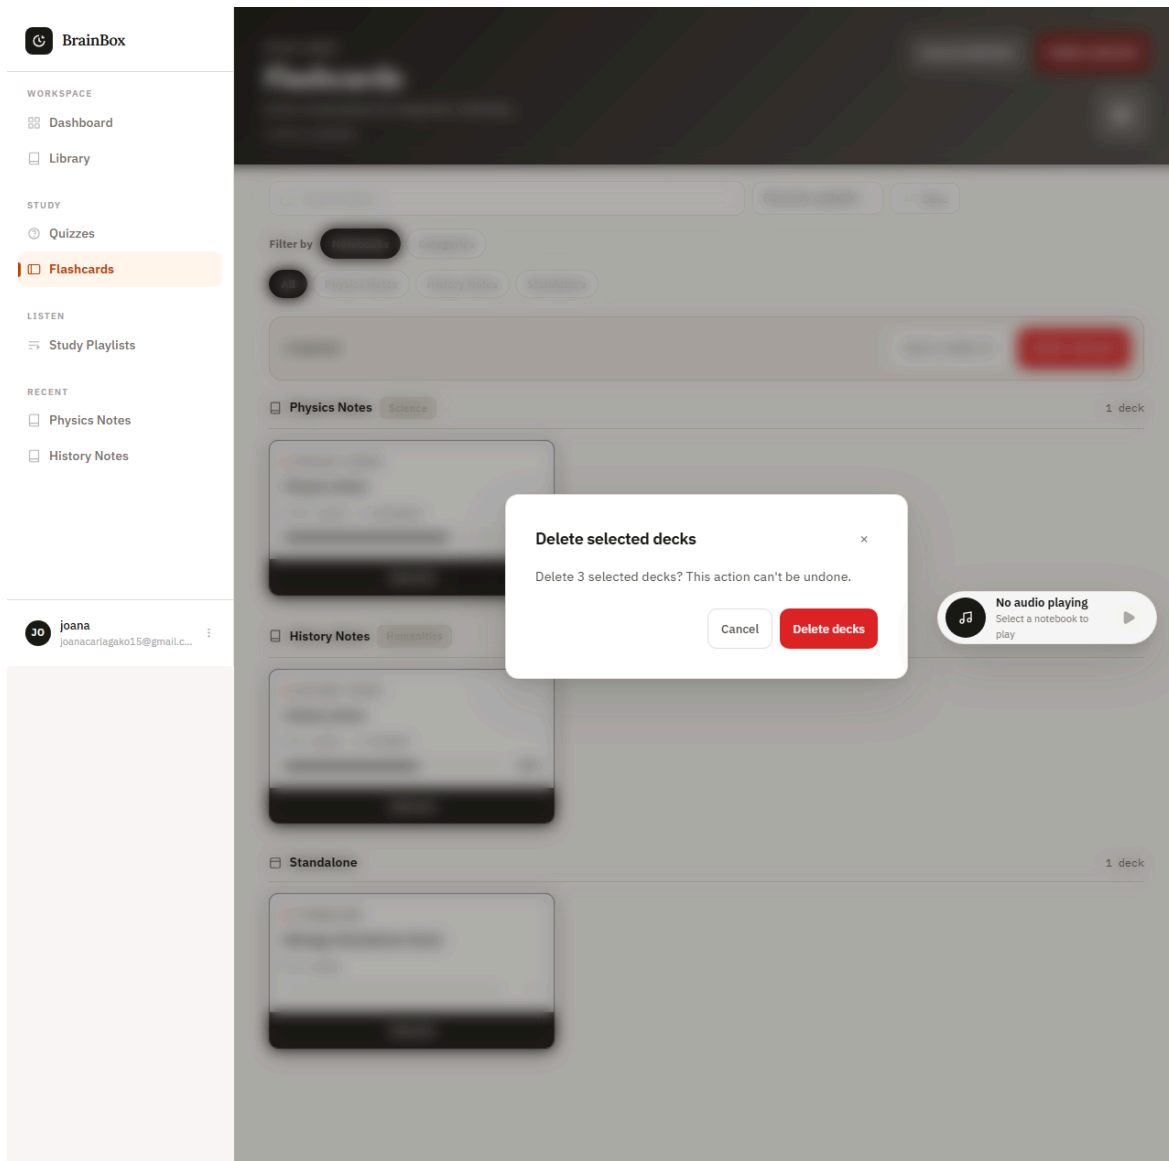

Figure 63. WEB-FC-007 rendered evidence screenshot

WEB-FC-008 - Filter decks by pills

Test Result	PASS
Execution Time	0.0 seconds
Validation	The selected filter updates the visible content set without breaking navigation.
Evidence Description	Filter decks by pills was completed successfully in the live web app.

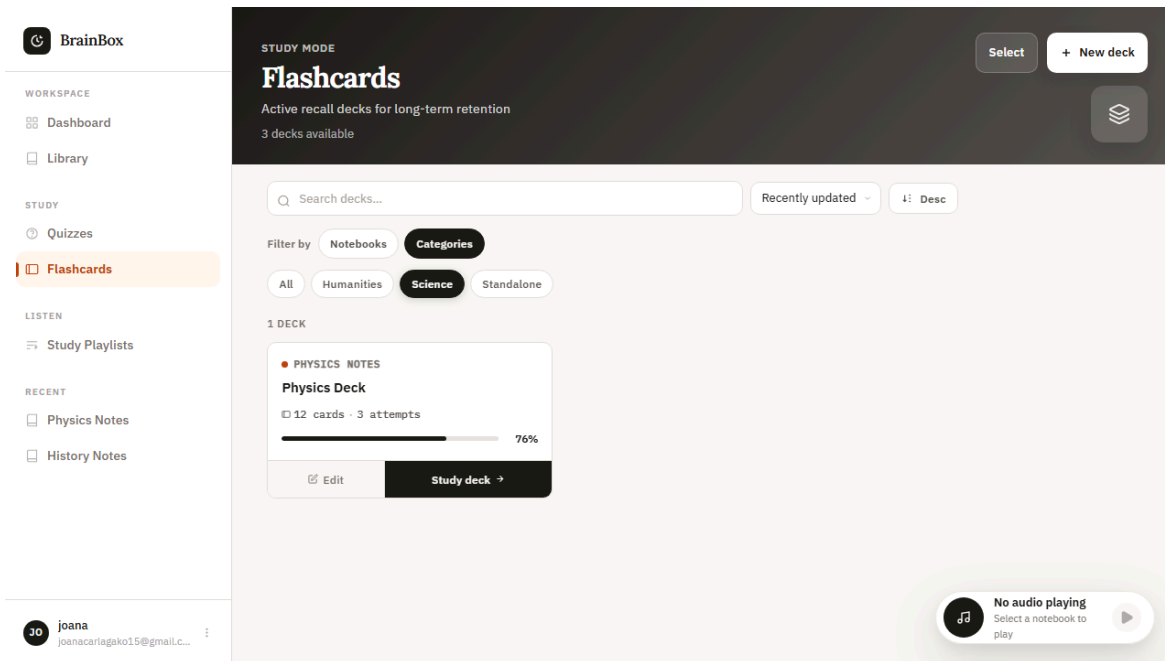

Figure 64. WEB-FC-008 rendered evidence screenshot

9. Playlist Module Evidence

WEB-PL-001 - Playlists page loads

Test Result	PASS
Execution Time	0.0 seconds
Validation	The page loads successfully and its core content is visible.
Evidence Description	Playlists page loads was completed successfully in the live web app.

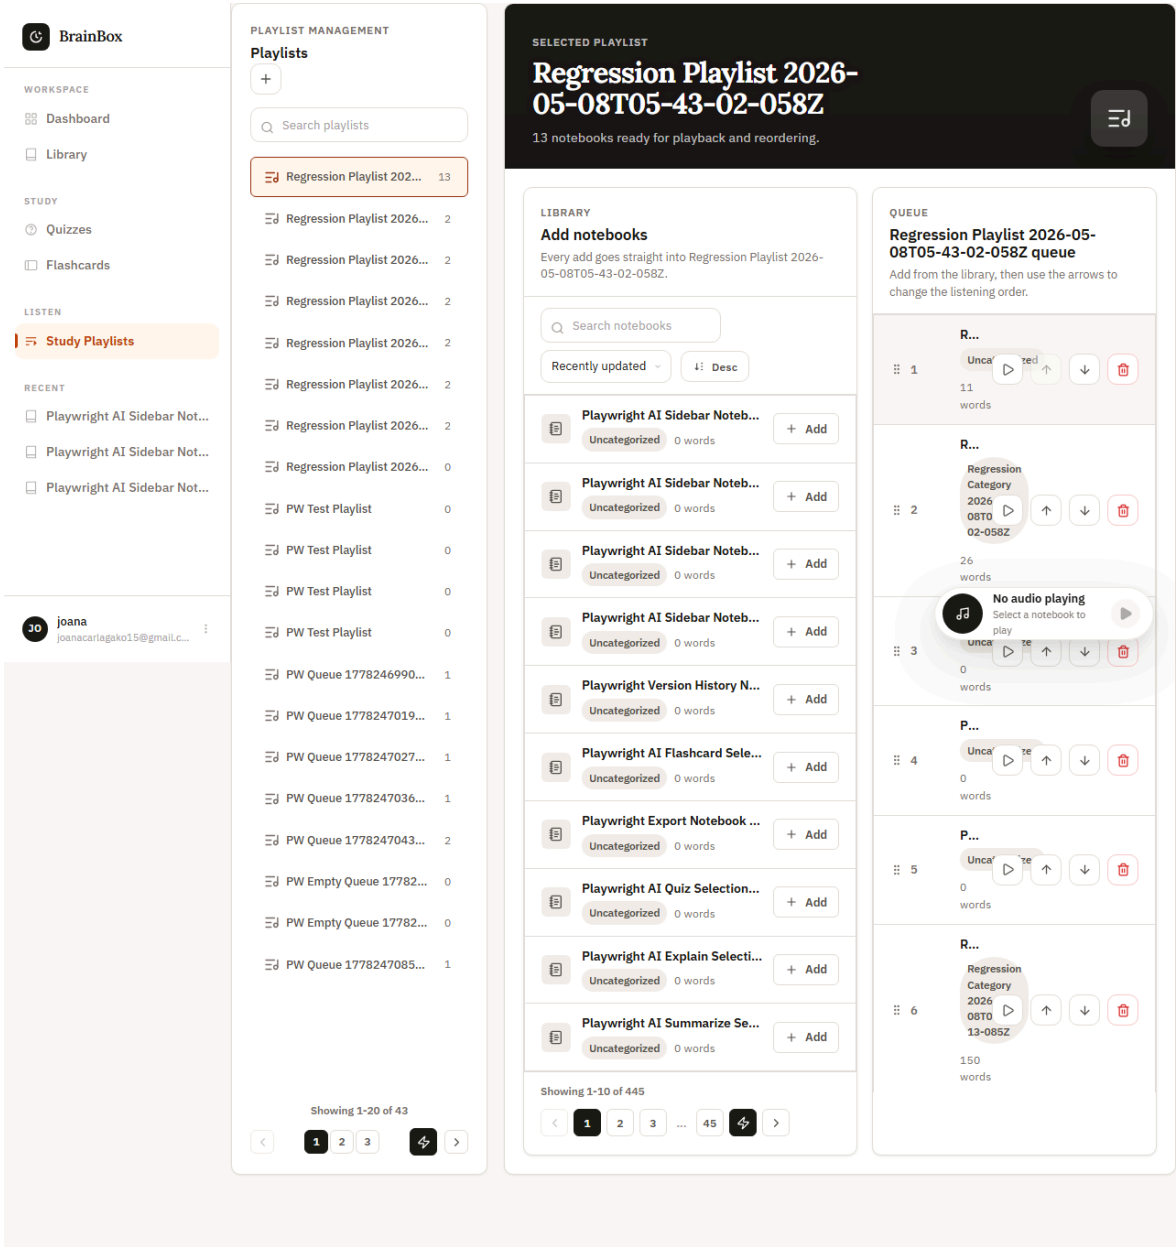

Figure 65. WEB-PL-001 rendered evidence screenshot

WEB-PL-002 - Create a playlist

Test Result	PASS
Execution Time	0.0 seconds
Validation	The create flow opens correctly and accepts the intended input.
Evidence Description	Create a playlist was completed successfully in the live web app.

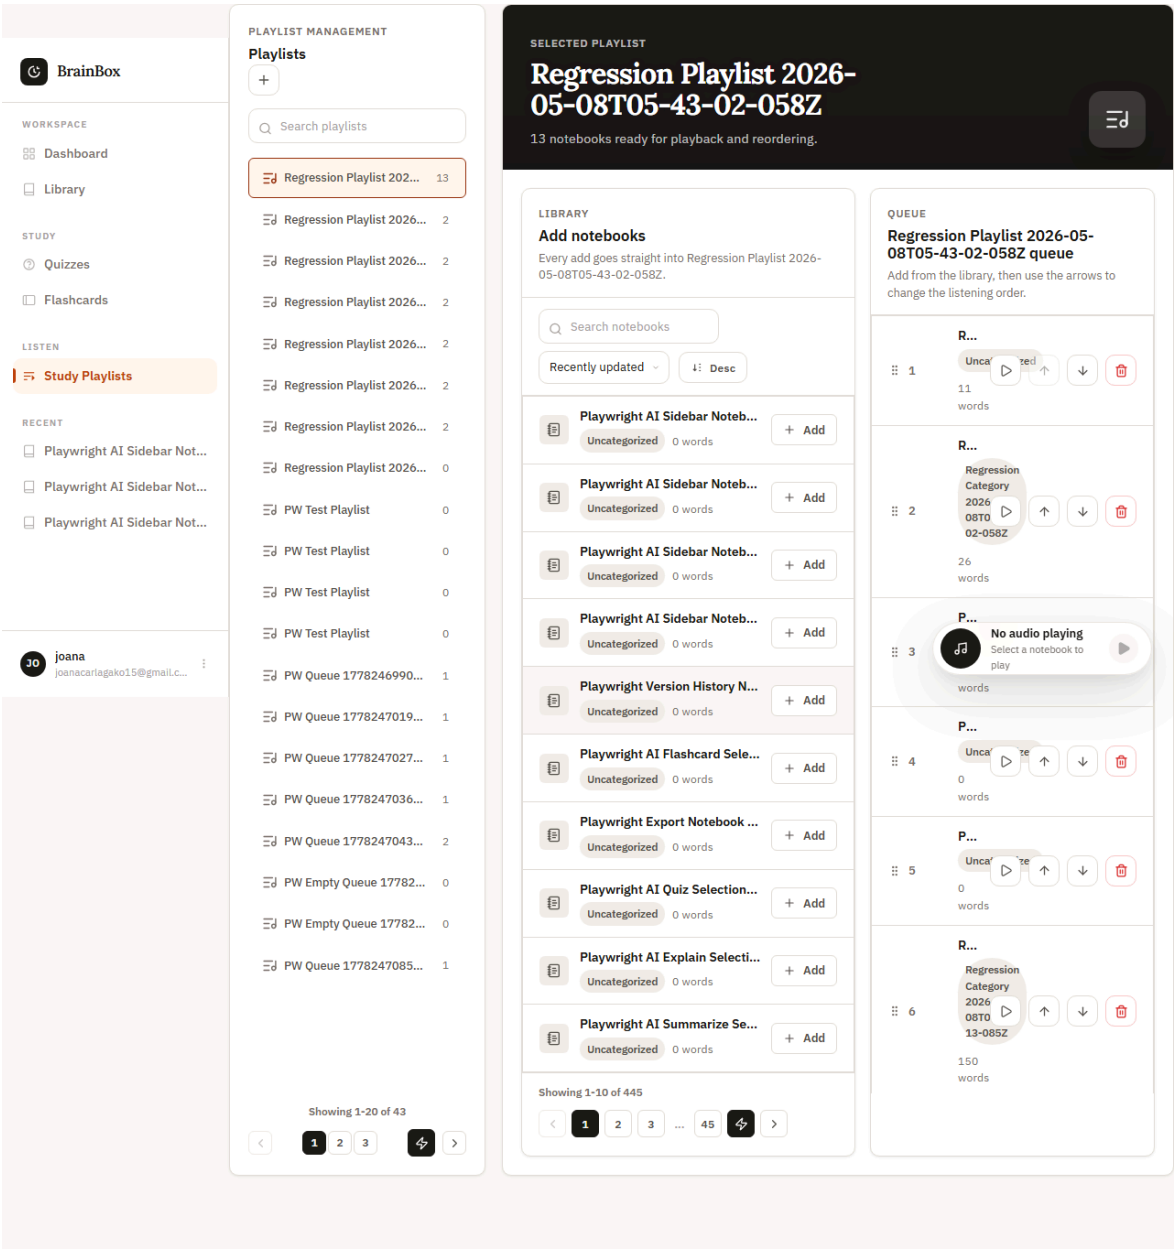

Figure 66. WEB-PL-002 rendered evidence screenshot

WEB-PL-003 - Add notebook to playlist queue

Test Result	PASS
-------------	------

Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Add notebook to playlist queue was completed successfully in the live web app.

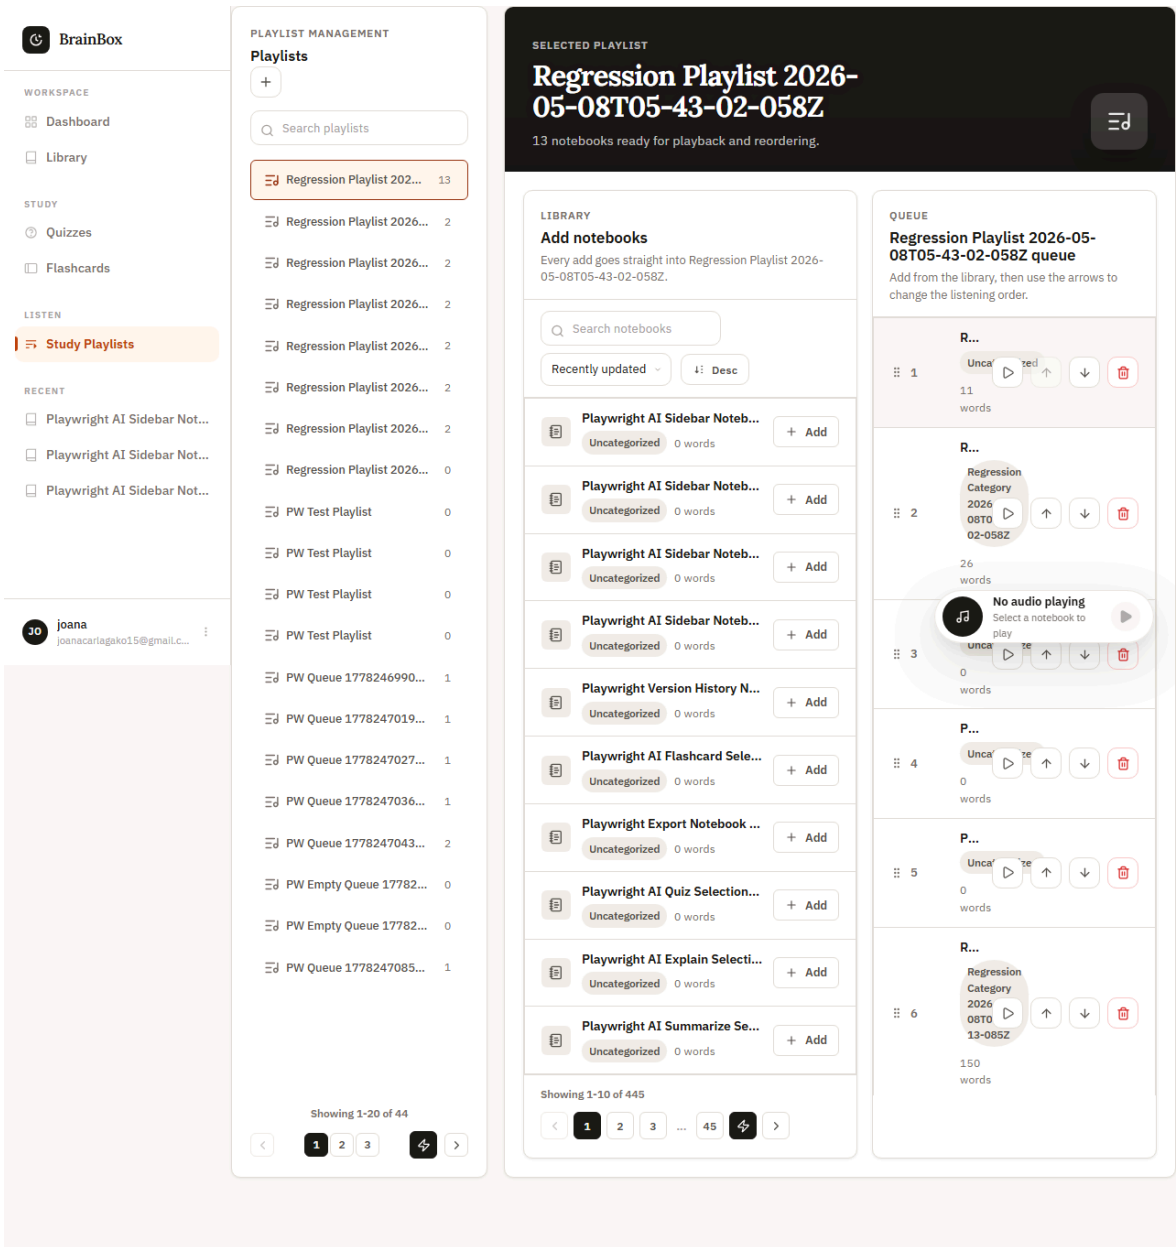

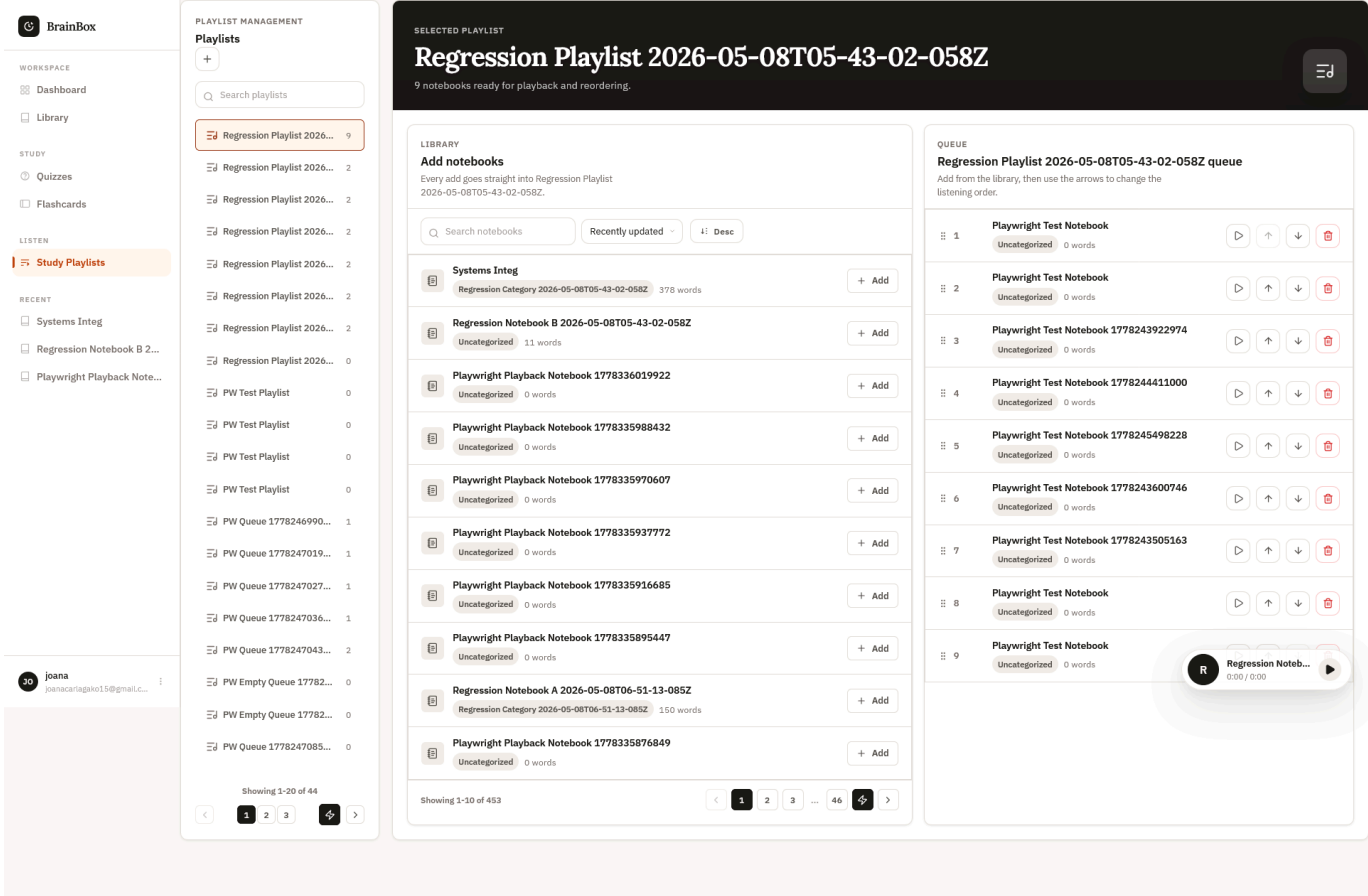

Figure 67. WEB-PL-003 rendered evidence screenshot

WEB-PL-004 - Remove notebook from queue

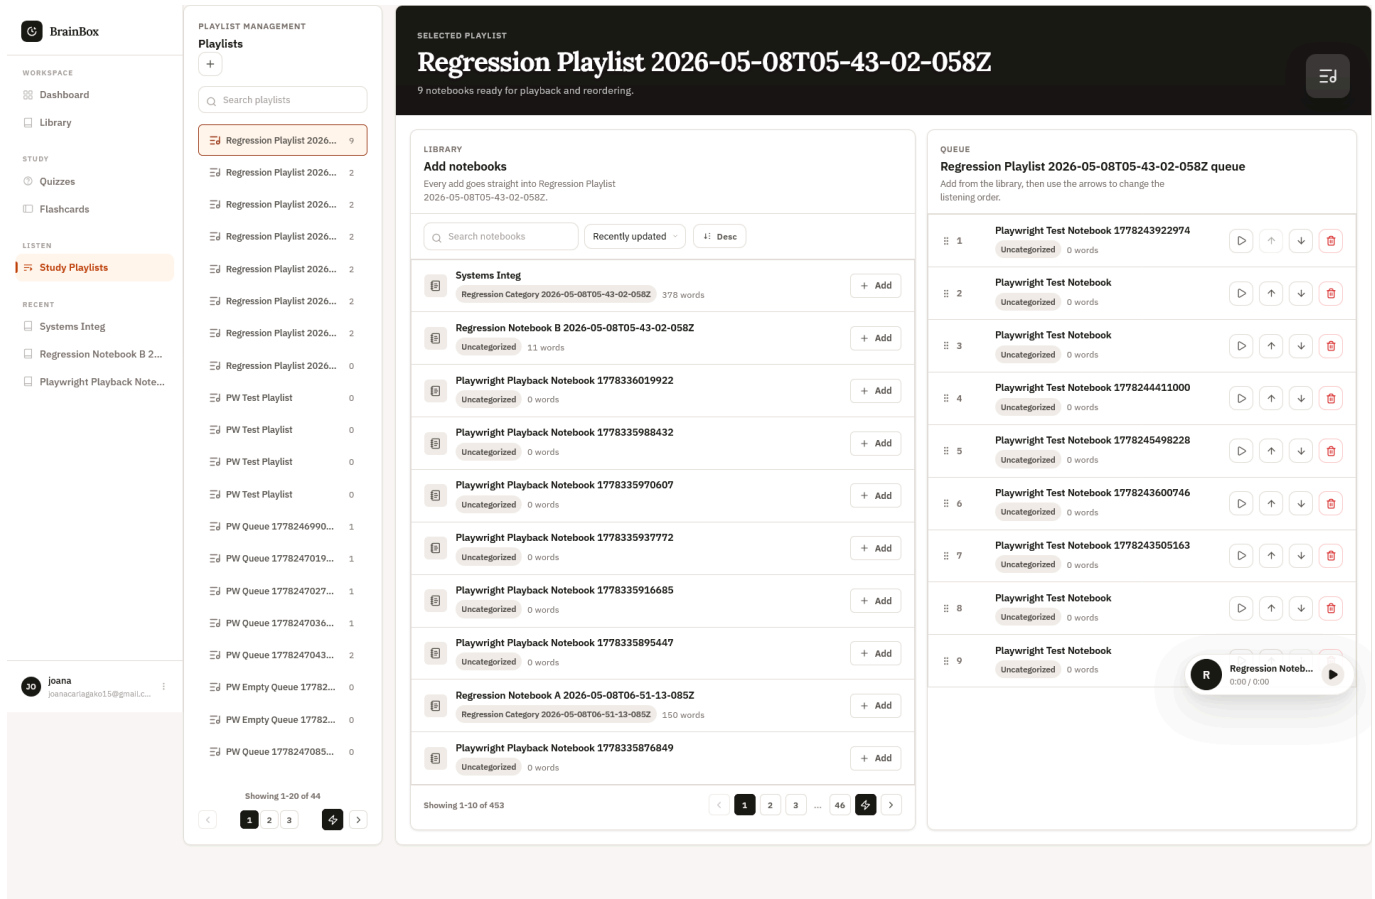

Test Result	MISSING
Execution Time	0.0 seconds

Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Remove notebook from queue was completed successfully in the live web app.

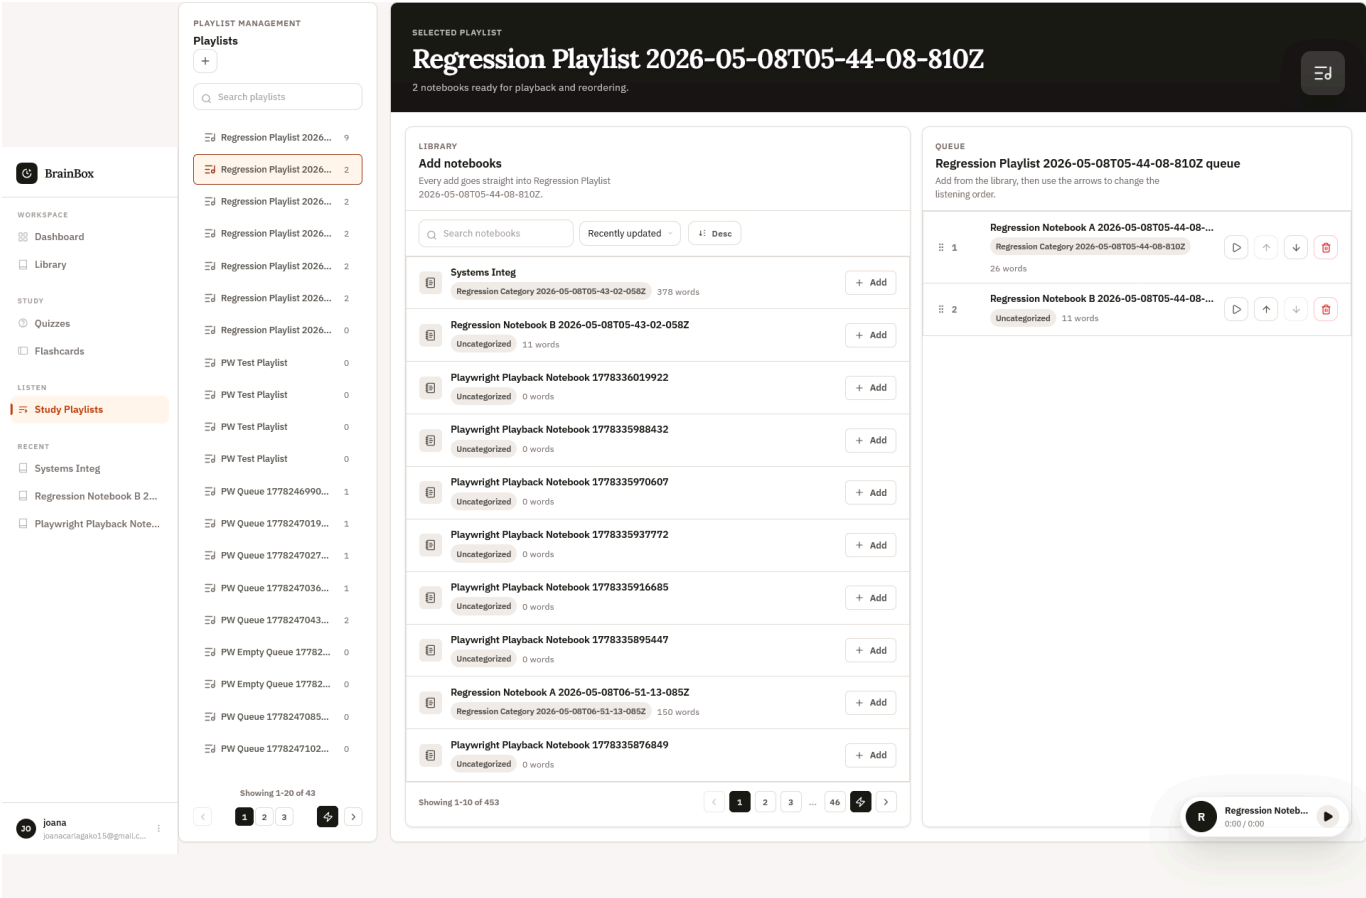

WEB-PL-005 - Reorder playlist queue

Test Result	MISSING
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Reorder playlist queue was completed successfully in the live web app.

WEB-PL-006 - Delete a playlist

Test Result	MISSING
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Delete a playlist was completed successfully in the live web app.

WEB-PL-007 - Search playlists

Test Result	PASS
Execution Time	0.0 seconds
Validation	The relevant search control accepts input and updates the visible list or state.
Evidence Description	Search playlists was completed successfully in the live web app.

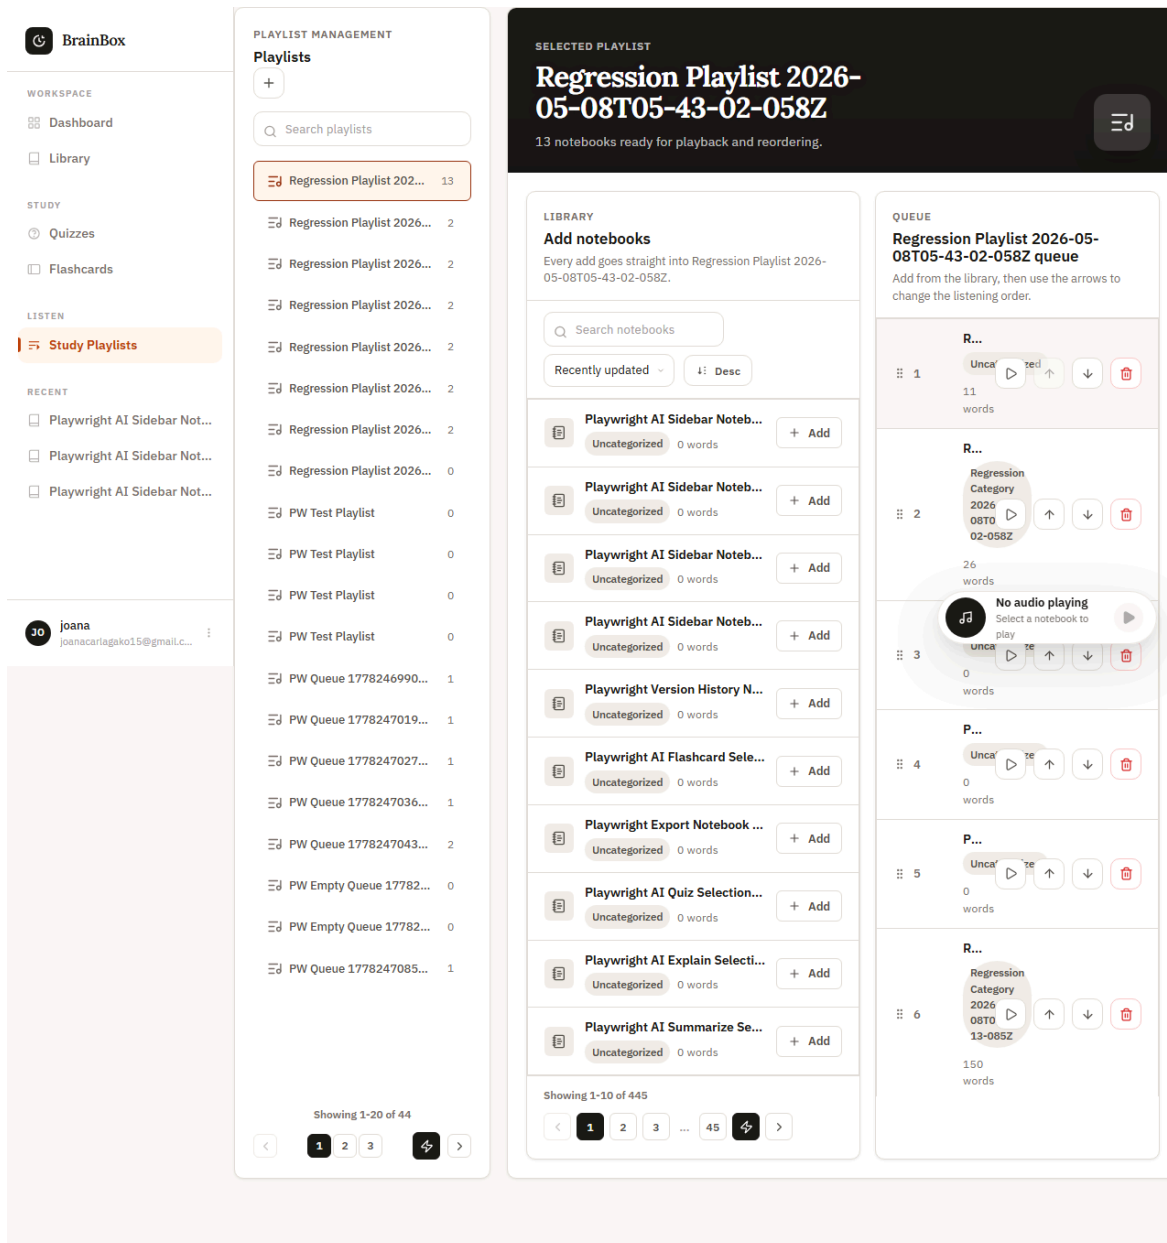

Figure 71. WEB-PL-007 rendered evidence screenshot

10. Profile And Navigation Module Evidence

WEB-PRF-001 - Profile page loads

Test Result	PASS
Execution Time	0.0 seconds
Validation	The page loads successfully and its core content is visible.
Evidence Description	Profile page loads was completed successfully in the live web app.

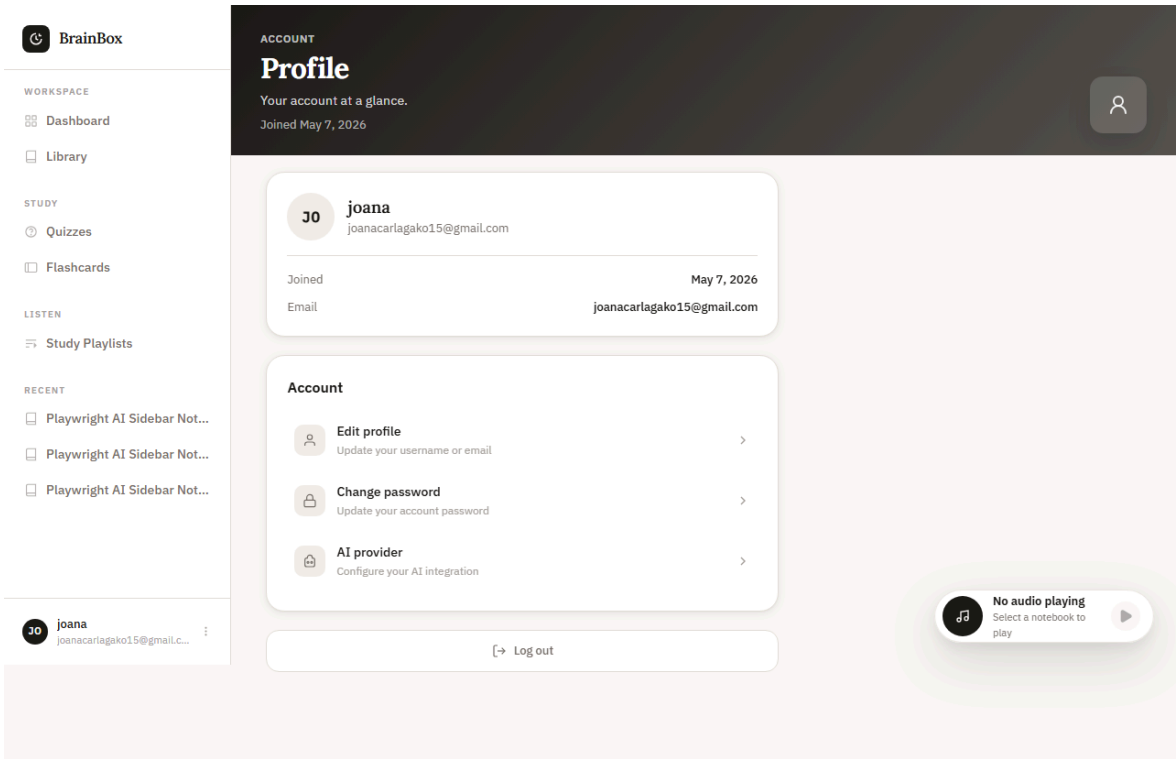

Figure 72. WEB-PRF-001 rendered evidence screenshot

WEB-PRF-002 - Edit profile action

Test Result	PASS
Execution Time	0.0 seconds
Validation	The edit surface is reachable and the relevant controls are visible.
Evidence Description	Edit profile action was completed successfully in the live web app.

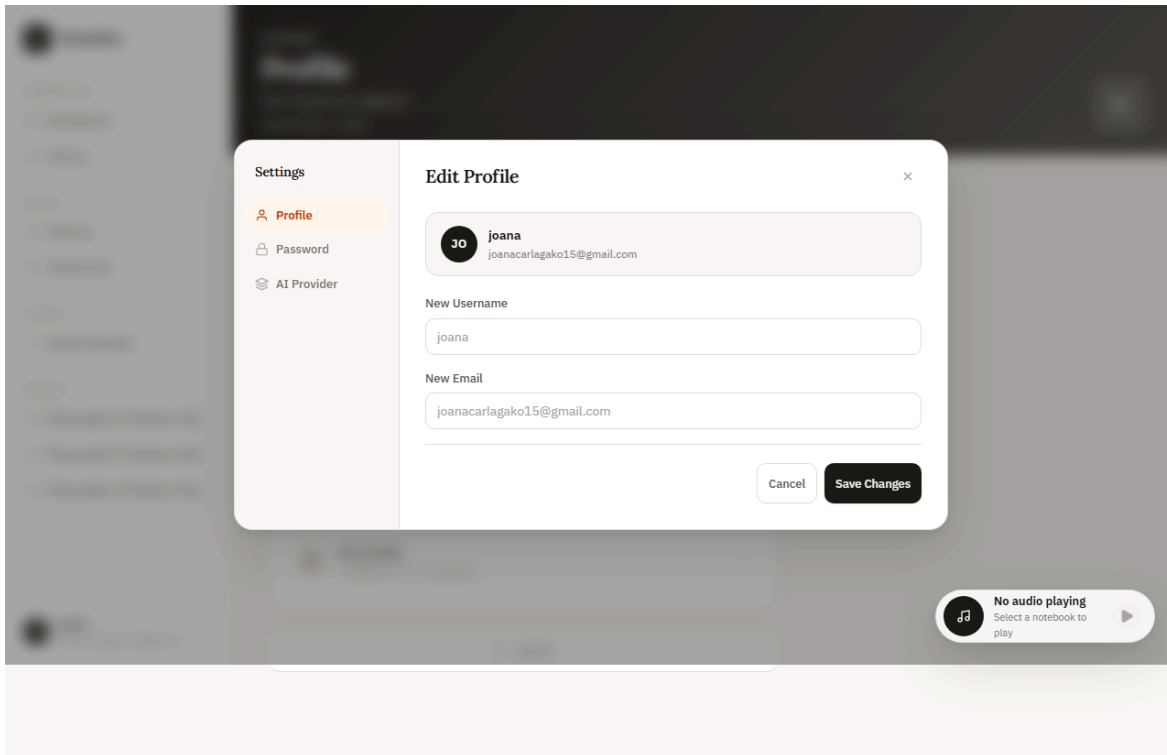

Figure 73. WEB-PRF-002 rendered evidence screenshot

WEB-PRF-003 - Change password action

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Change password action was completed successfully in the live web app.

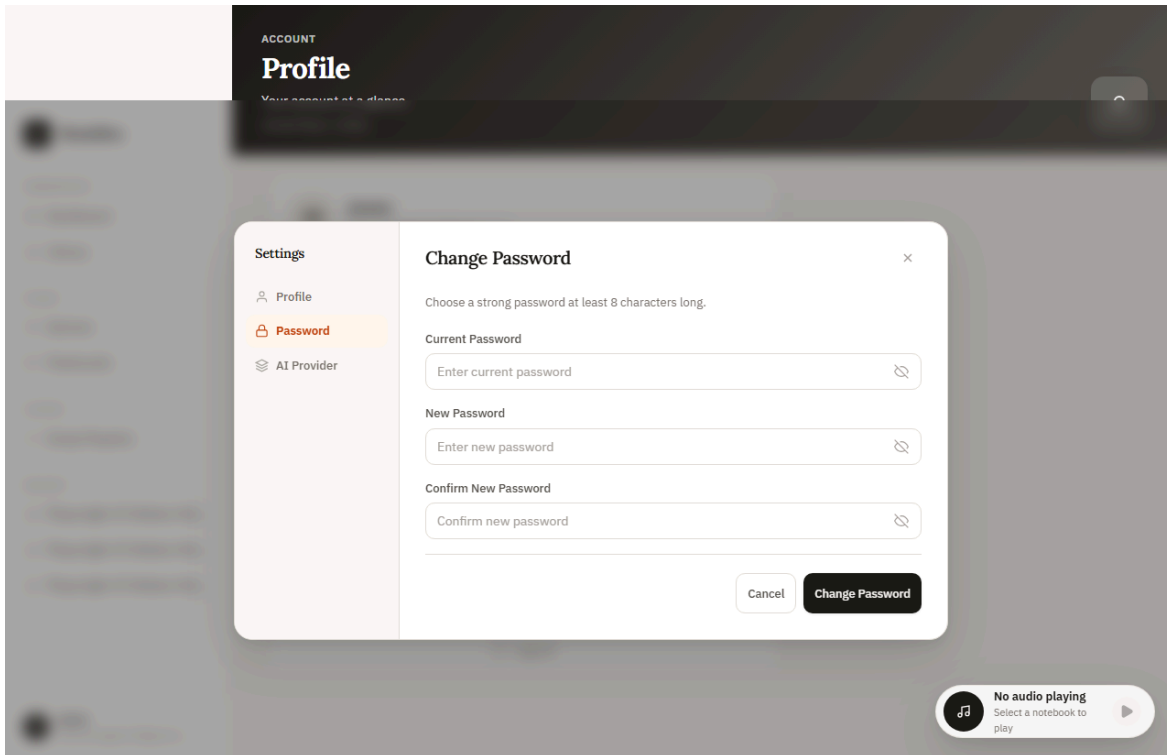

Figure 74. WEB-PRF-003 rendered evidence screenshot

WEB-PRF-004 - AI provider action

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	AI provider action was completed successfully in the live web app.

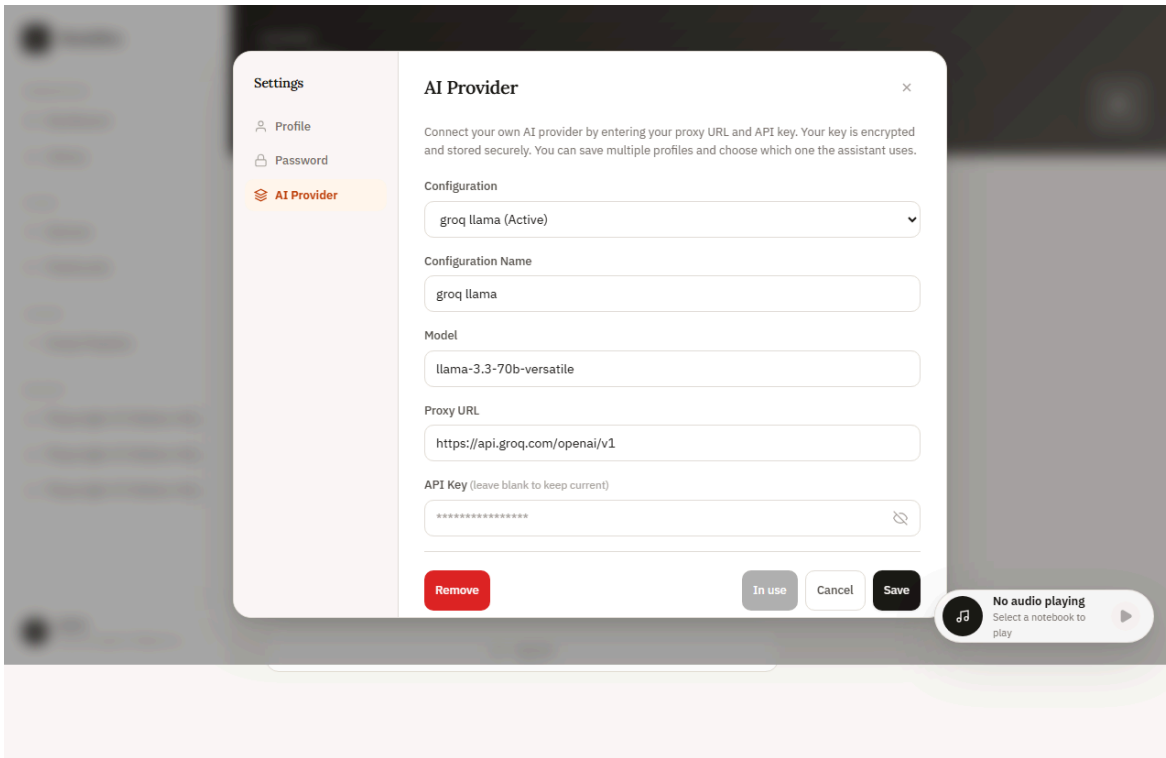

Figure 75. WEB-PRF-004 rendered evidence screenshot

WEB-NAV-001 - Sidebar navigation to all pages

Test Result	PASS
Execution Time	0.0 seconds
Validation	Navigation reaches the expected route or modal state.
Evidence Description	Sidebar navigation to all pages was completed successfully in the live web app.

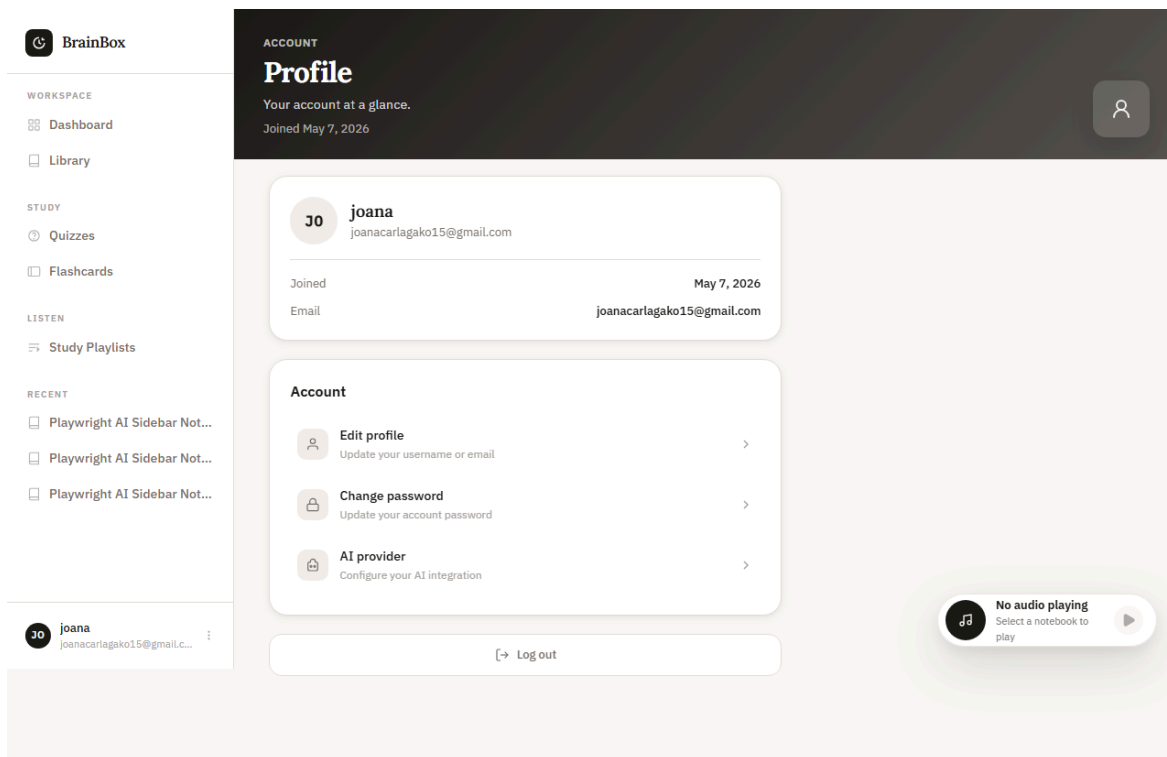

Figure 76. WEB-NAV-001 rendered evidence screenshot

11. Playback And Queue Module Evidence

WEB-PB-001 - Player bar visible in review mode

Test Result	PASS
Execution Time	0.0 seconds
Validation	Review mode turns on and the document review surface becomes visible.
Evidence Description	Player bar visible in review mode was completed successfully in the live web app.

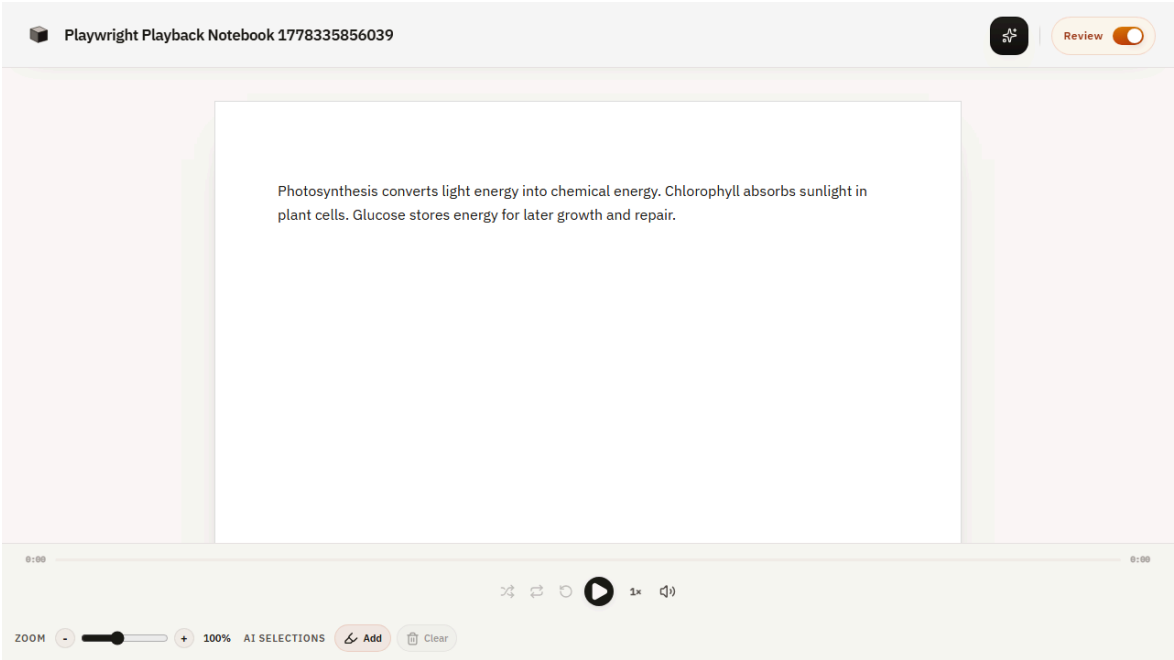

Figure 77. WEB-PB-001 rendered evidence screenshot

WEB-PB-002 - Playback controls - Play/Pause

Test Result	PASS
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Playback controls - Play/Pause was completed successfully in the live web app.

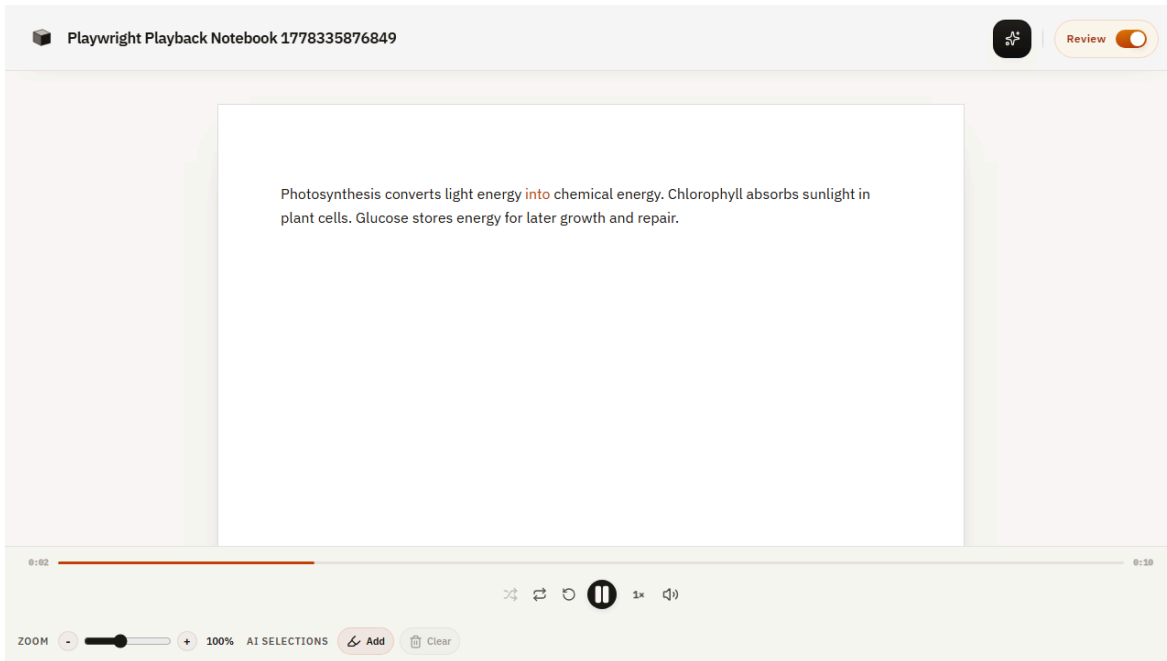

Figure 78. WEB-PB-002 rendered evidence screenshot

WEB-PB-003 - Playback progress bar

Test Result	PASS
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Playback progress bar was completed successfully in the live web app.

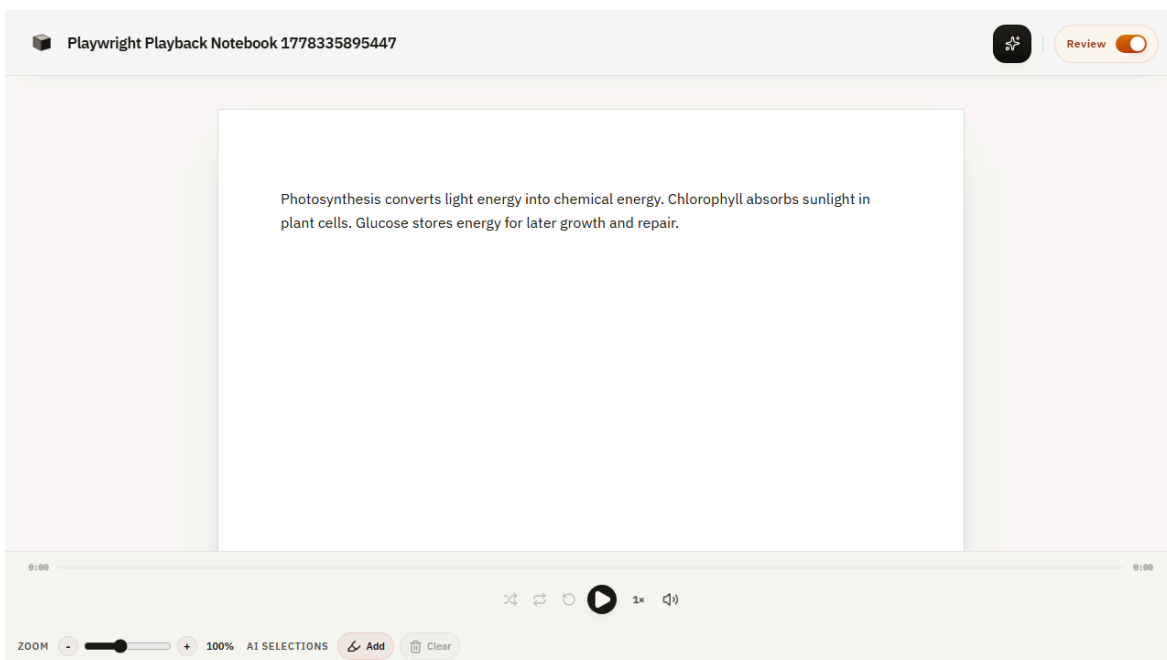

Figure 79. WEB-PB-003 rendered evidence screenshot

WEB-PB-004 - Playback time display

Test Result	PASS
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Playback time display was completed successfully in the live web app.

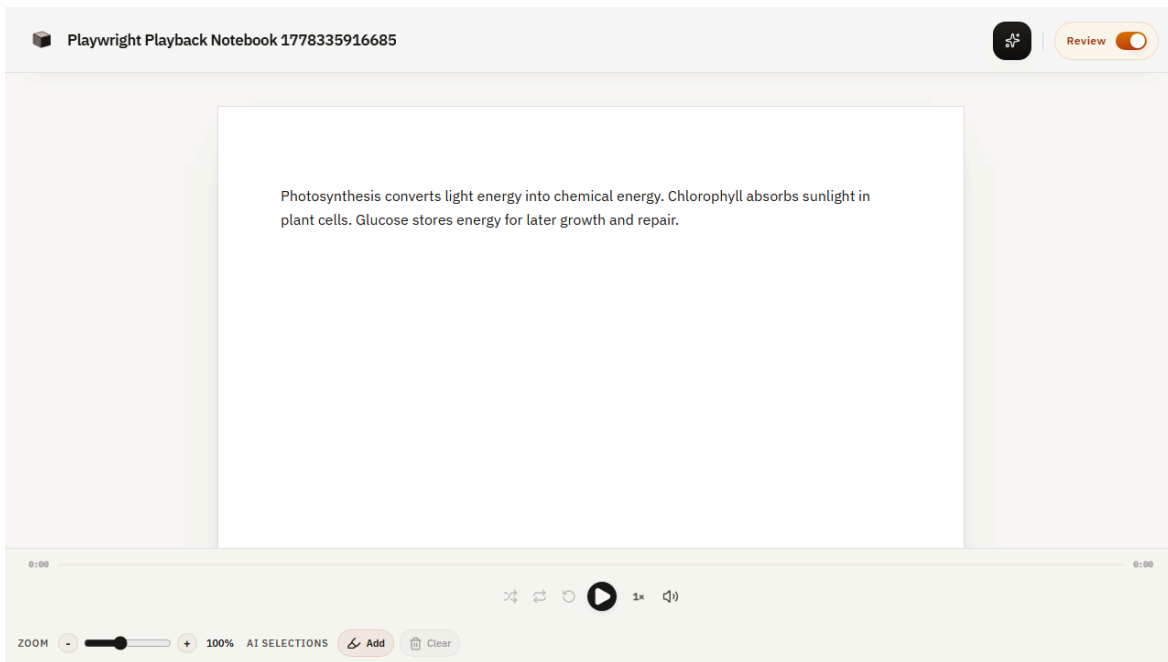

Figure 80. WEB-PB-004 rendered evidence screenshot

WEB-PB-005 - Player bar collapsed/expanded toggle

Test Result	PASS
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Player bar collapsed/expanded toggle was completed successfully in the live web app.

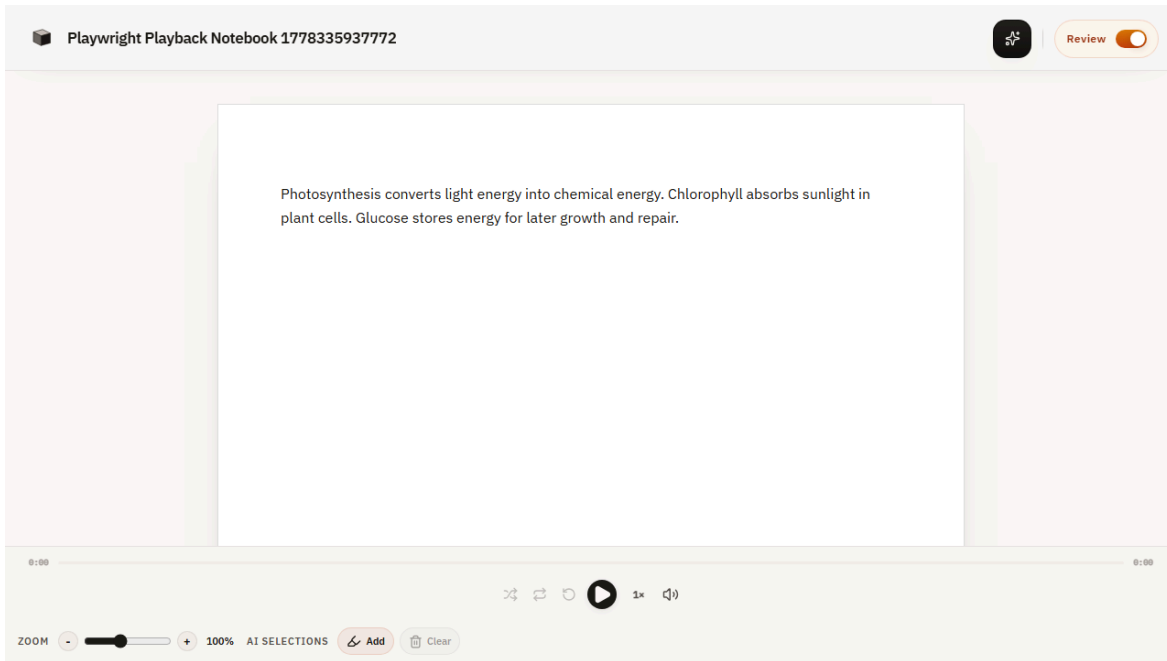

Figure 81. WEB-PB-005 rendered evidence screenshot

WEB-PB-006 - Playback from playlist

Test Result	PASS
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Playback from playlist was completed successfully in the live web app.

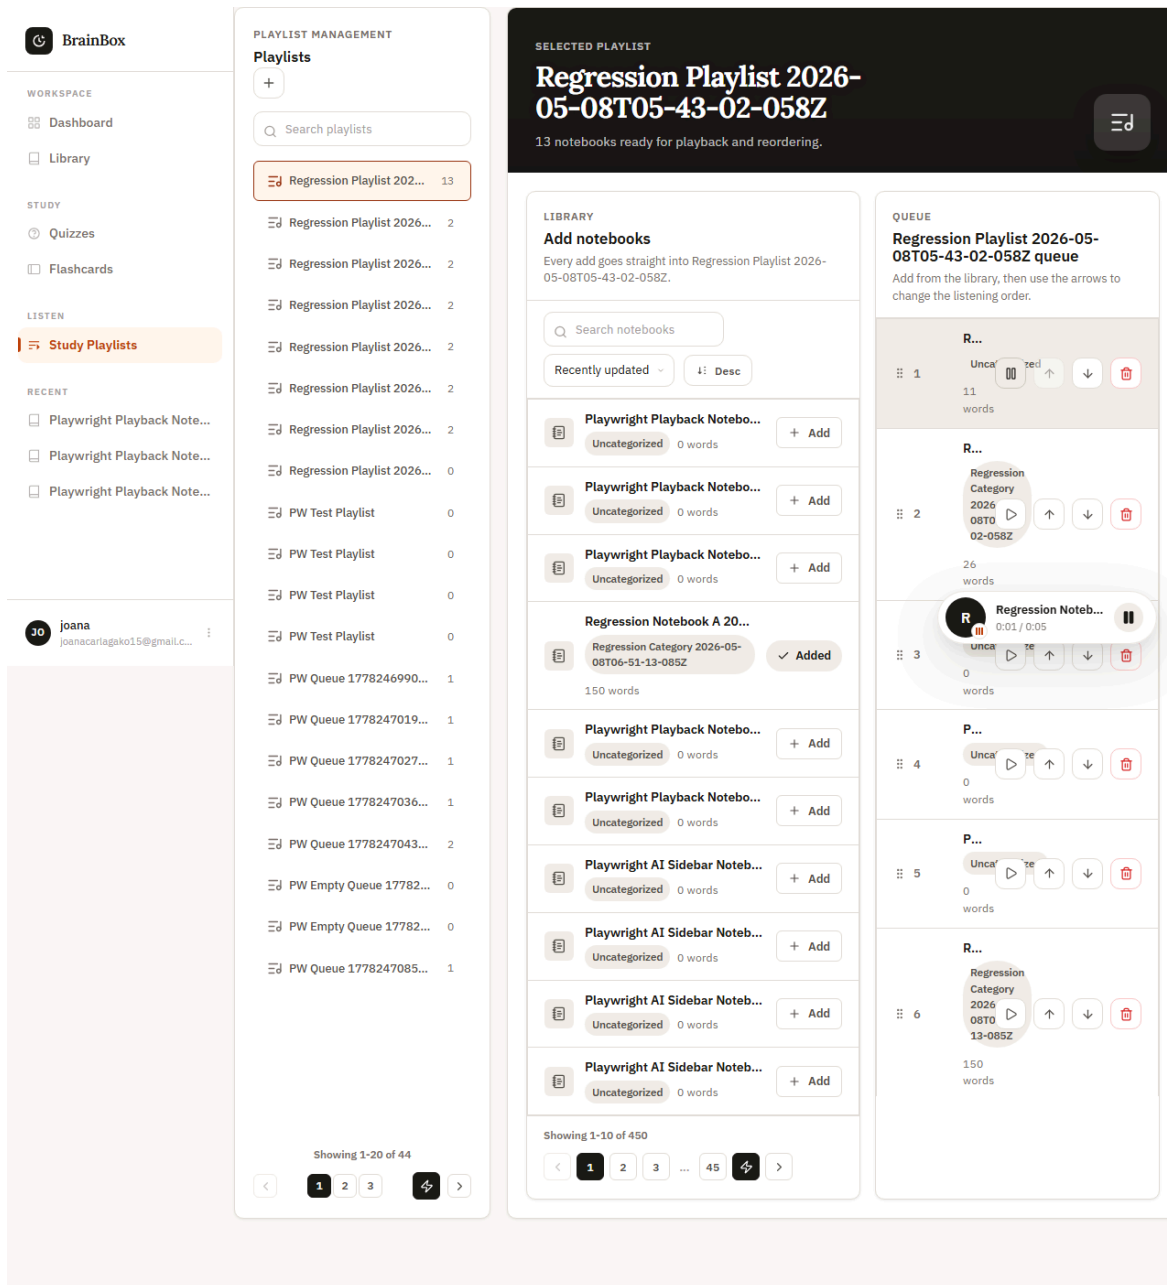

Figure 82. WEB-PB-006 rendered evidence screenshot

WEB-PB-007 - Skip forward/backward in playback

Test Result	PASS
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Skip forward/backward in playback was completed successfully in the live web app.

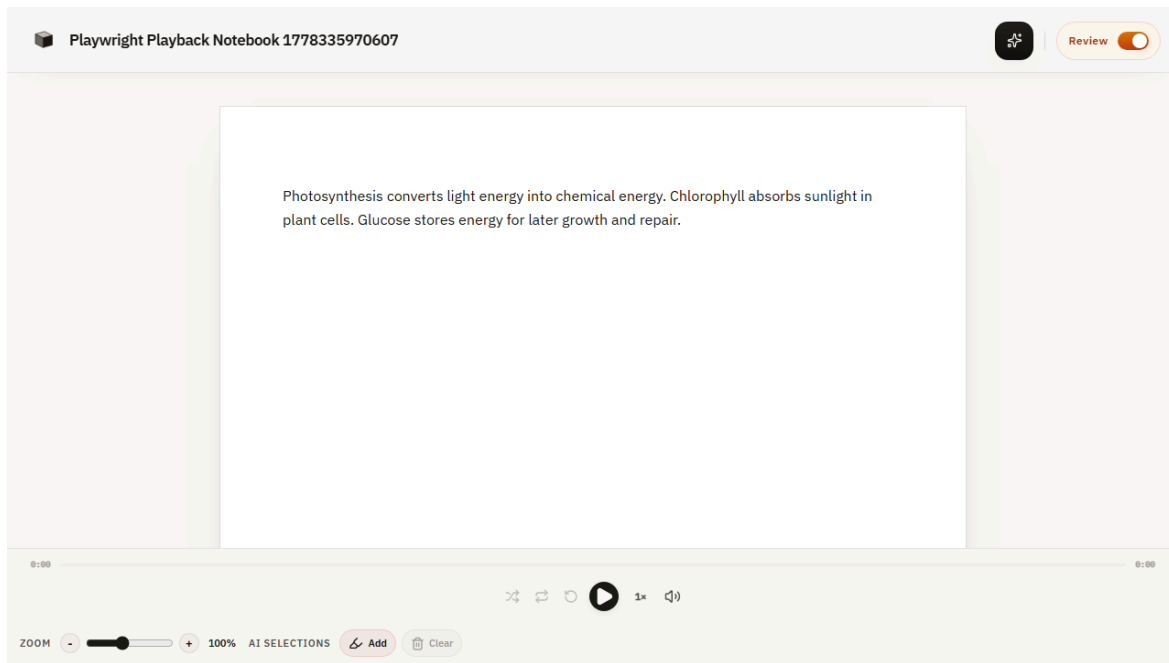

Figure 83. WEB-PB-007 rendered evidence screenshot

WEB-PB-008 - Playback speed control

Test Result	PASS
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Playback speed control was completed successfully in the live web app.

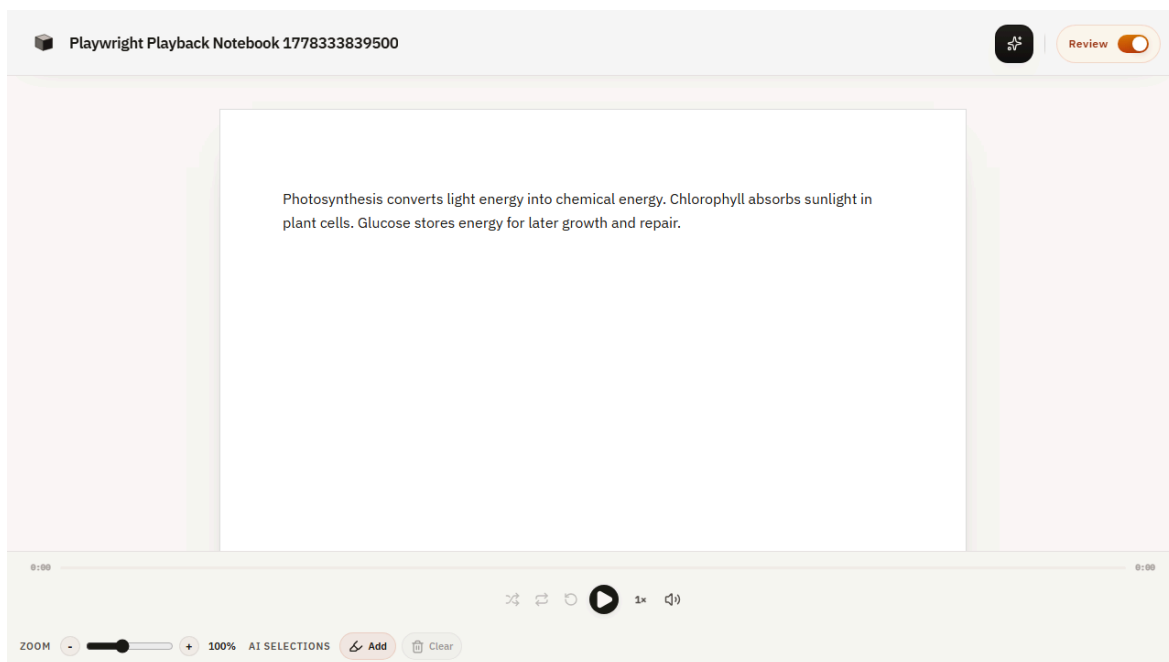

Figure 84. WEB-PB-008 rendered evidence screenshot

WEB-PB-009 - Queue panel in playlists

Test Result	PASS
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Queue panel in playlists was completed successfully in the live web app.

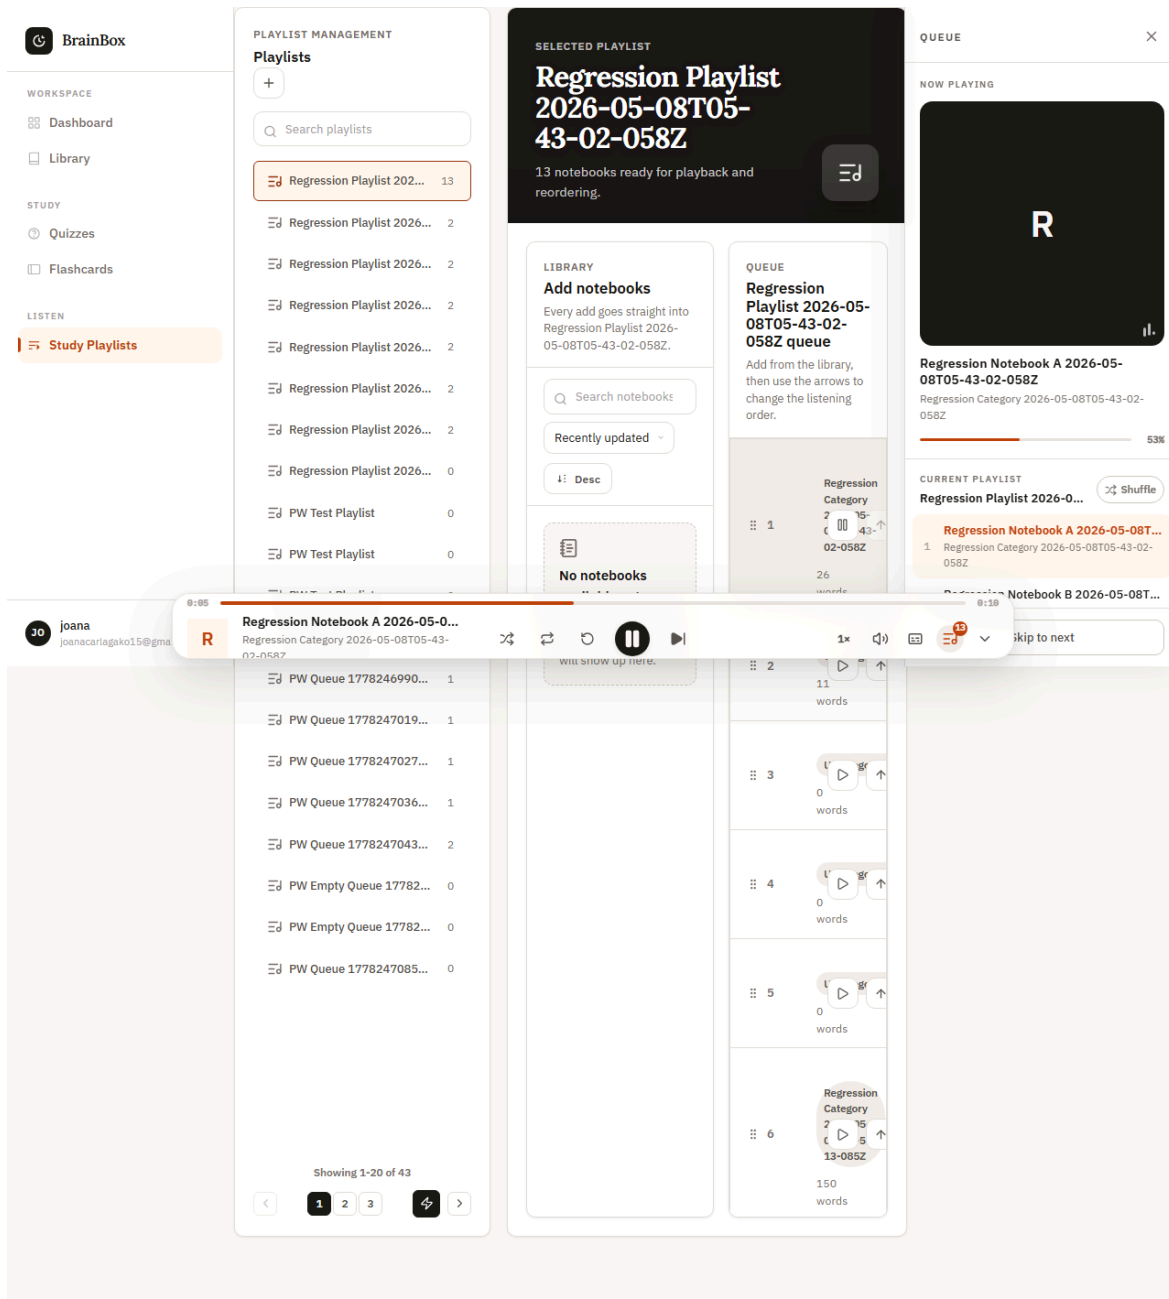

Figure 85. WEB-PB-009 rendered evidence screenshot

WEB-PB-010 - Audio settings / mute toggle

Test Result	PASS
Execution Time	0.0 seconds
Validation	The implemented BrainBox behavior completes successfully and matches the visible Playwright assertions.
Evidence Description	Audio settings / mute toggle was completed successfully in the live web app.

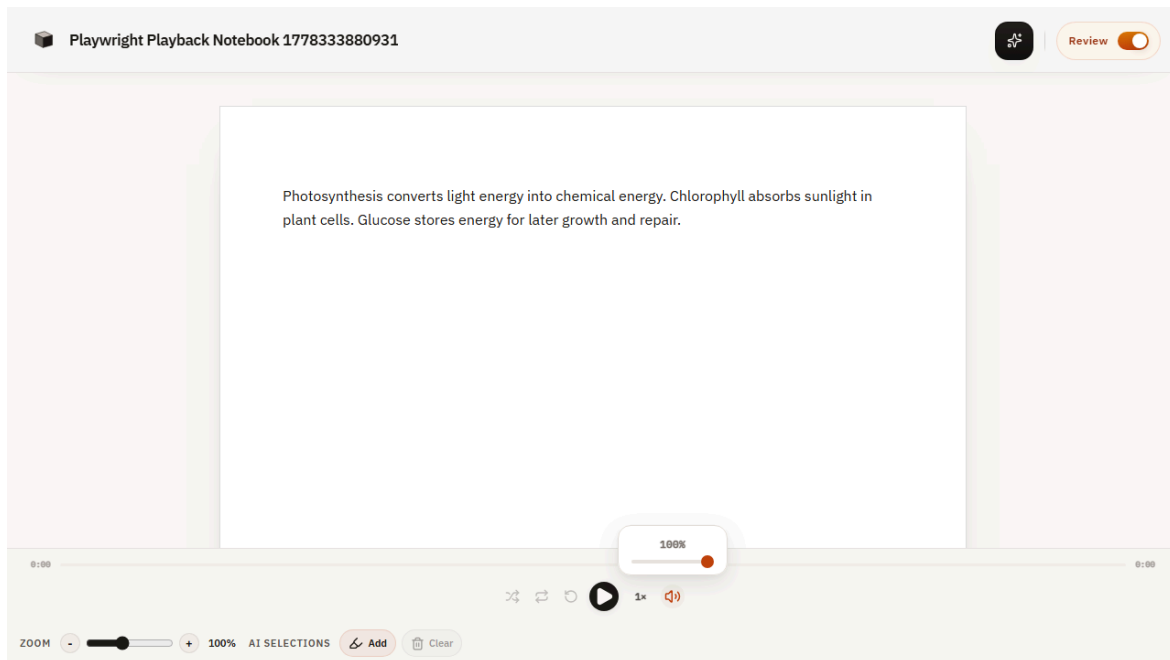

Figure 86. WEB-PB-010 rendered evidence screenshot

WEB-Q-001 - Queue panel displays current playlist items

Test Result	PASS
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Queue panel displays current playlist items was completed successfully in the live web app.

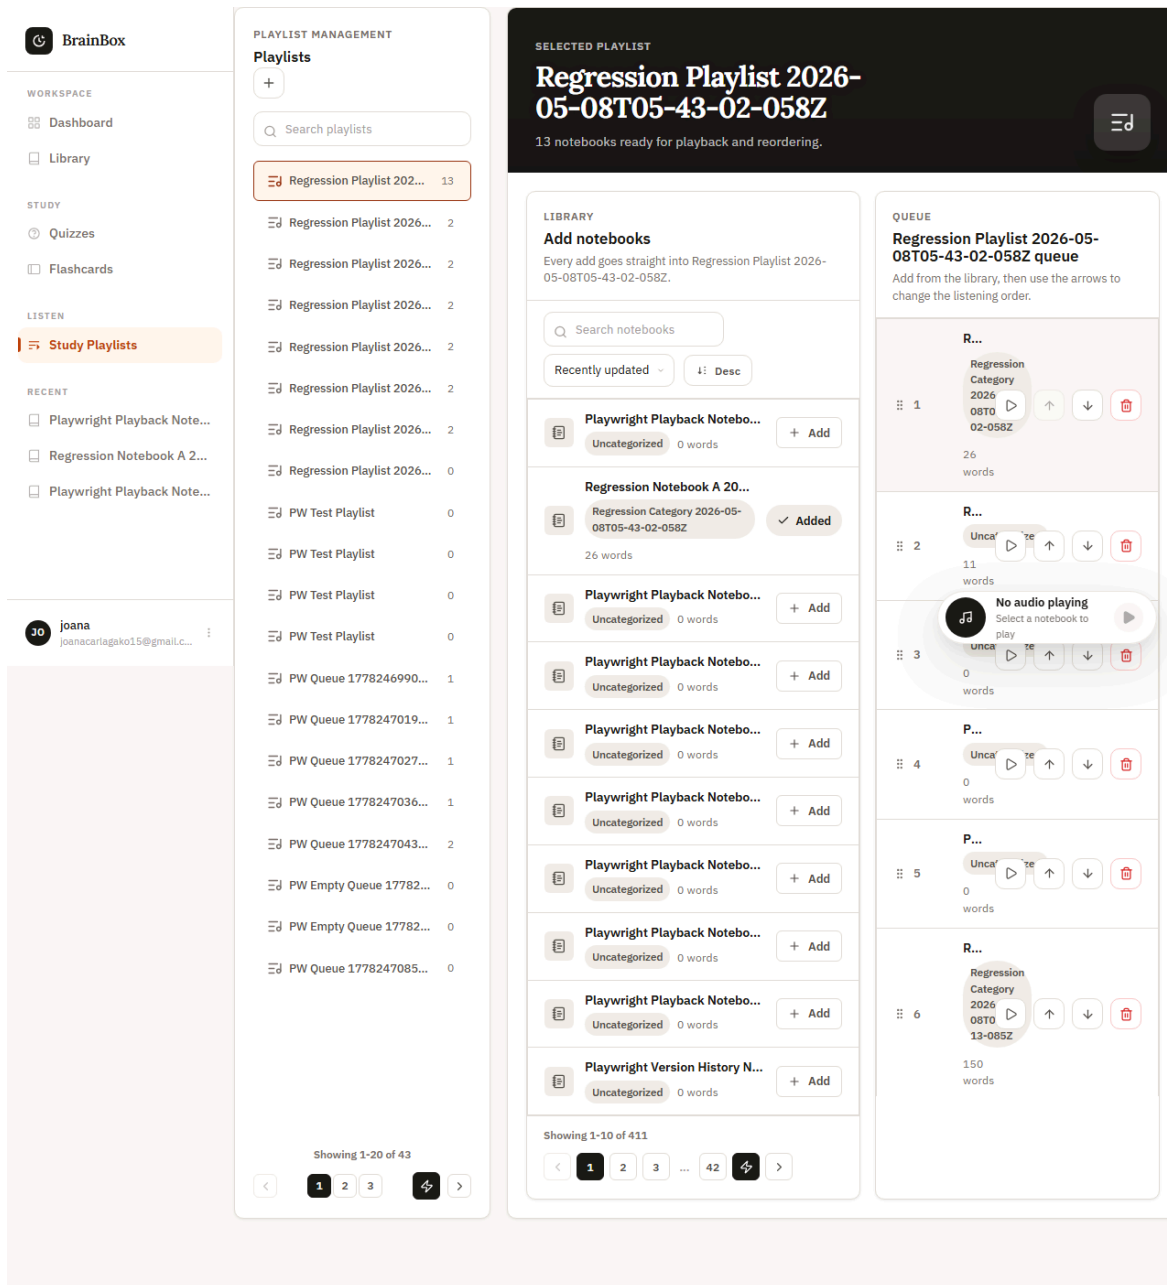

Figure 87. WEB-Q-001 rendered evidence screenshot

WEB-Q-002 - Current playing item highlighted in queue

Test Result	PASS
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Current playing item highlighted in queue was completed successfully in the live web app.

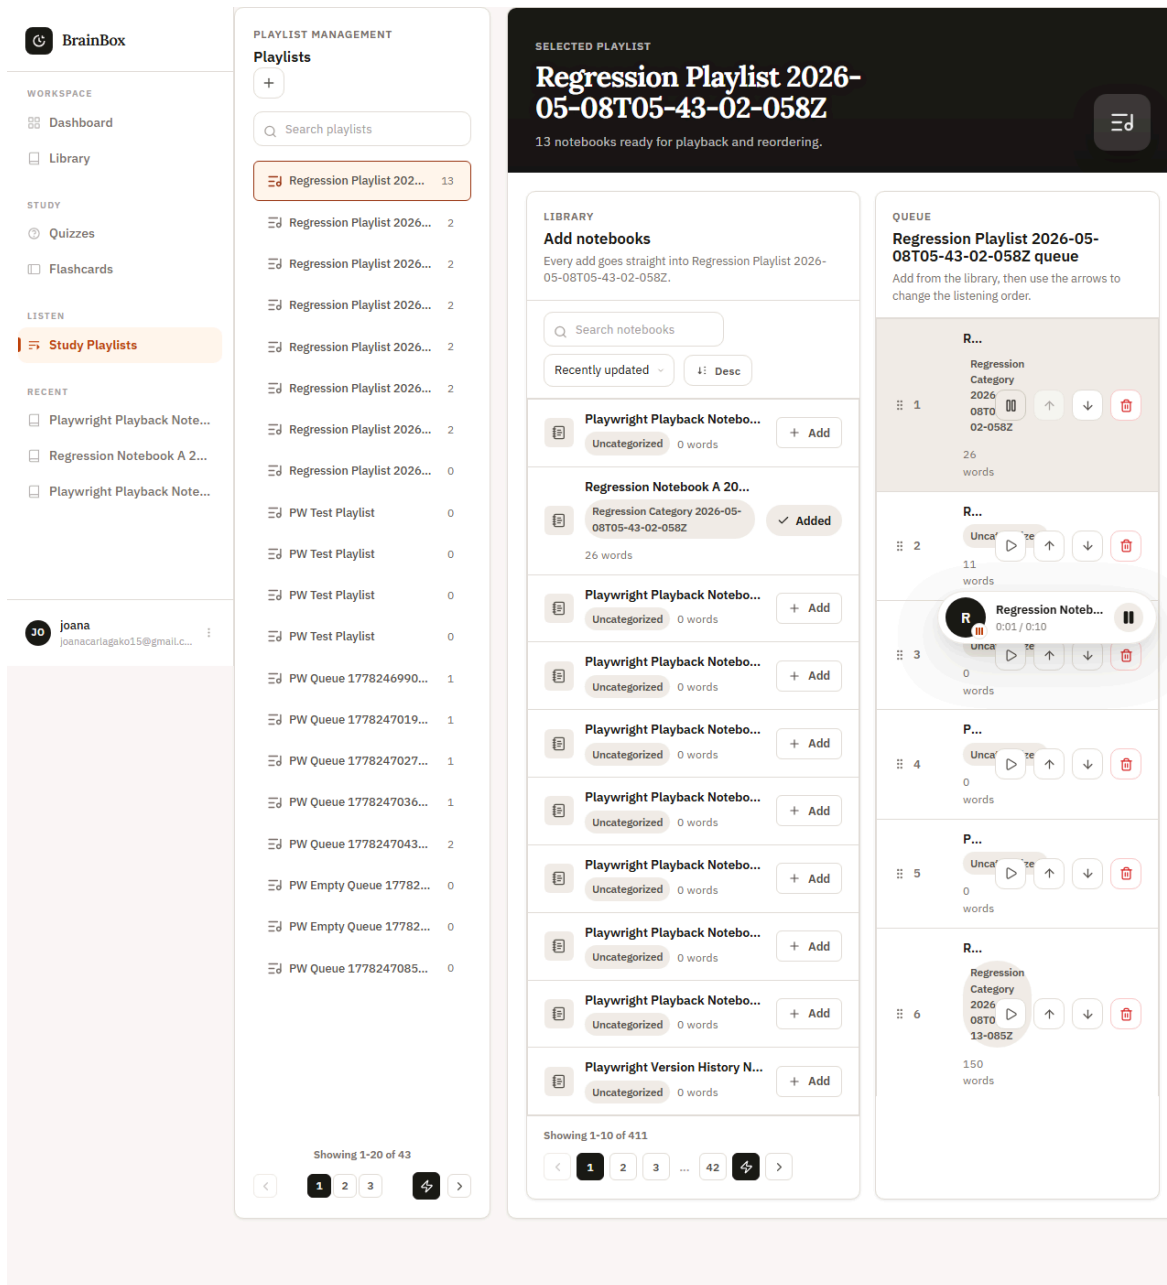

Figure 88. WEB-Q-002 rendered evidence screenshot

WEB-Q-003 - Queue item actions (play, remove)

Test Result	PASS
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Queue item actions (play, remove) was completed successfully in the live web app.

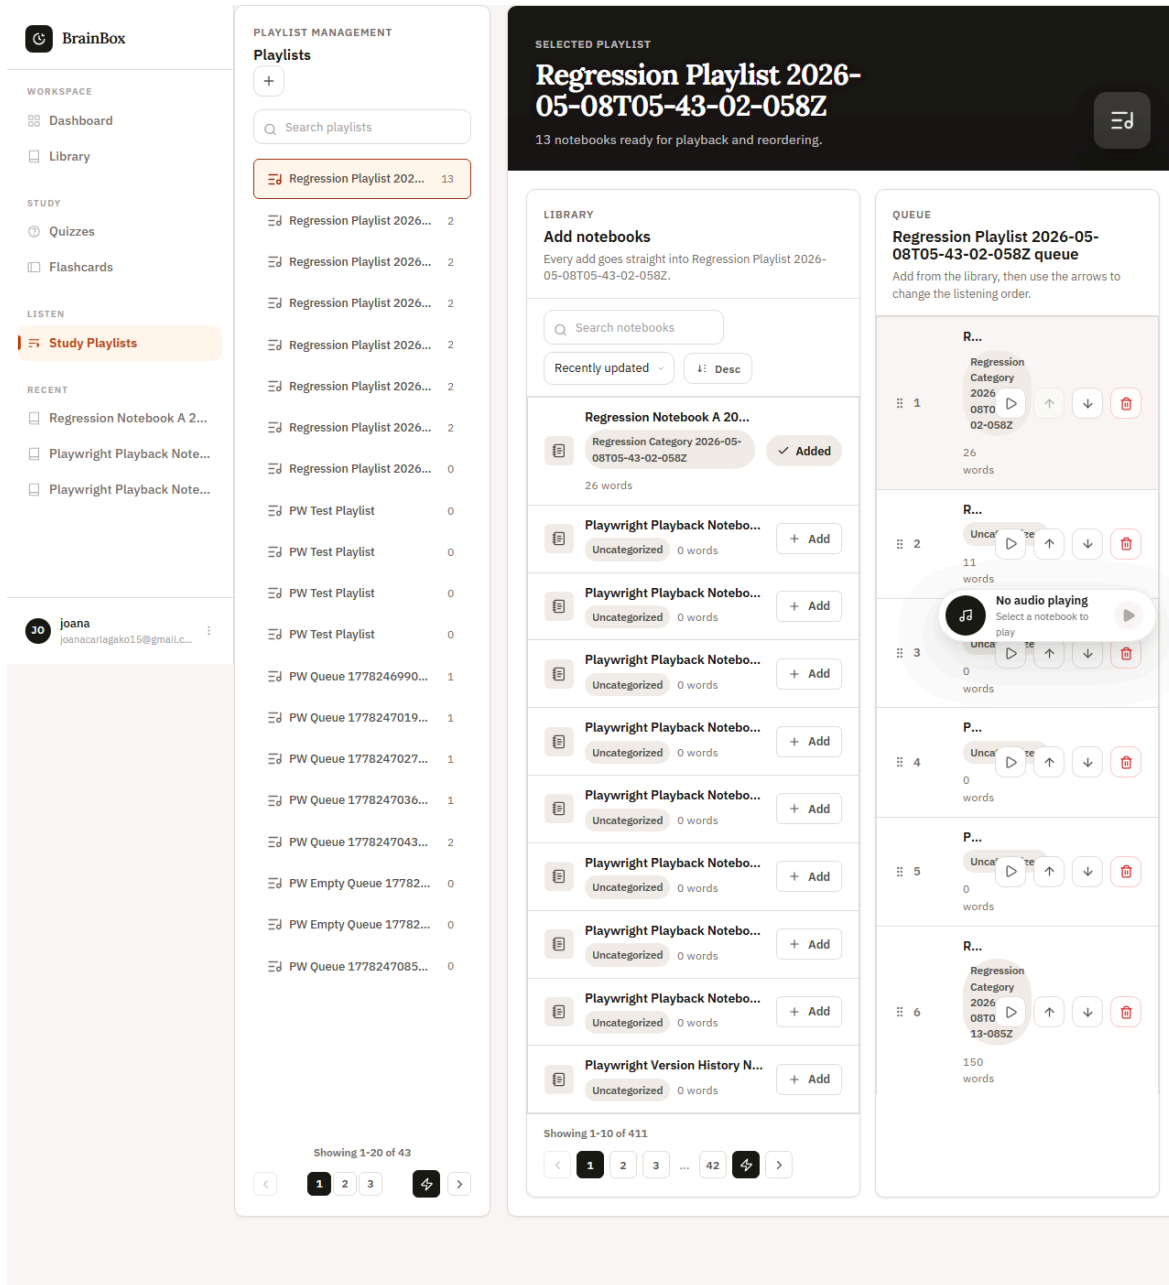

Figure 89. WEB-Q-003 rendered evidence screenshot

WEB-Q-004 - Queue reorder - move up/down

Test Result	PASS
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Queue reorder - move up/down was completed successfully in the live web app.

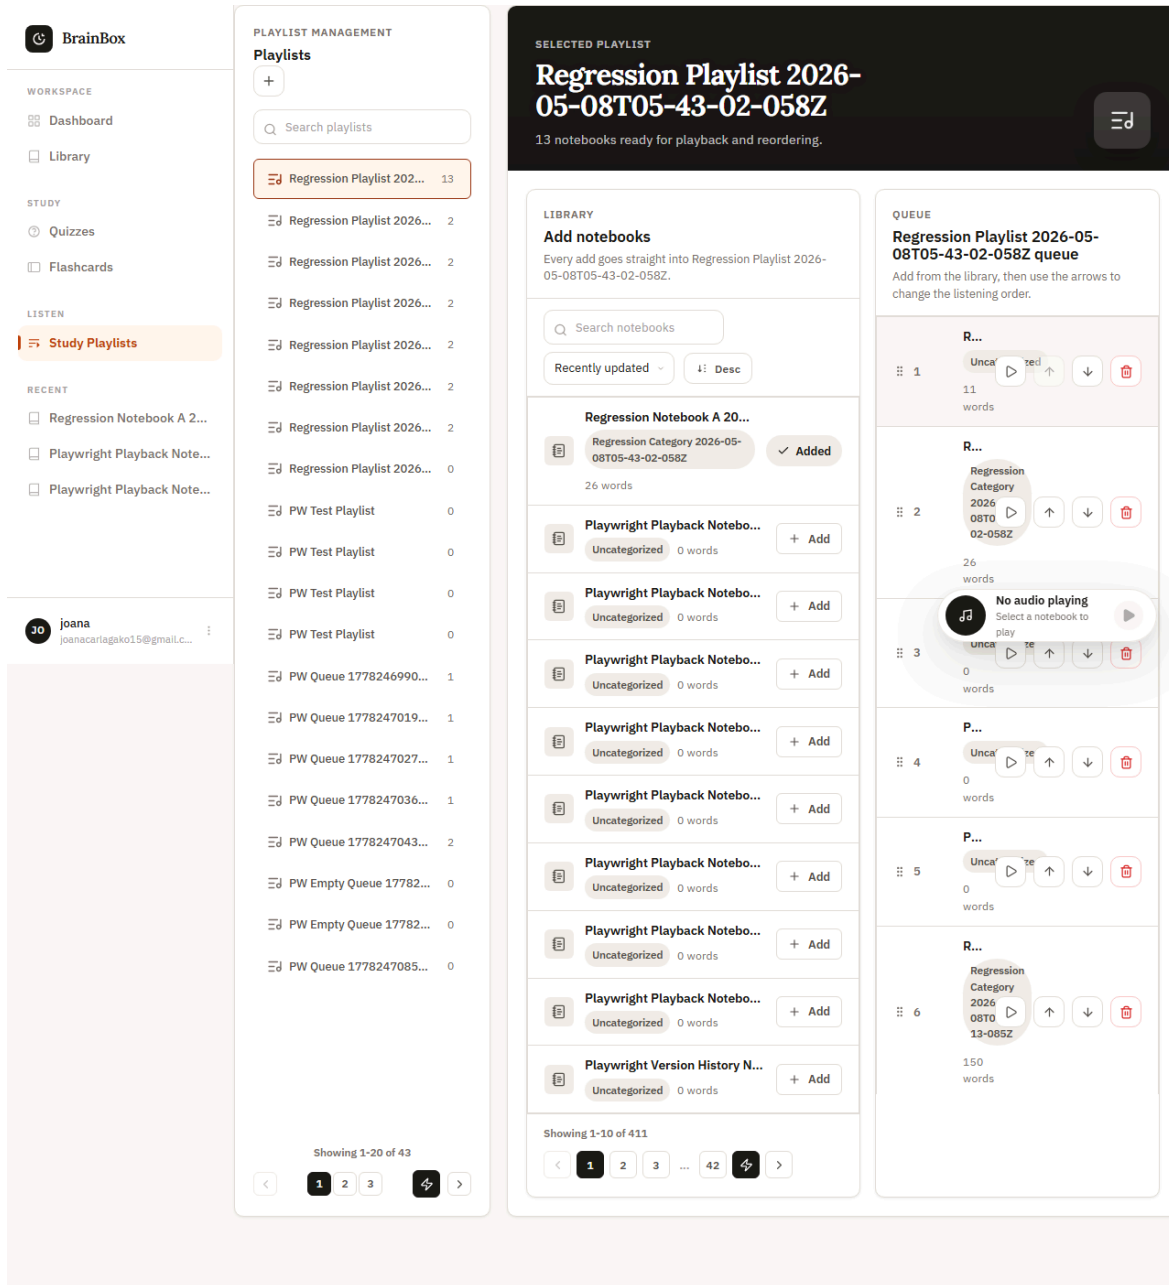

Figure 90. WEB-Q-004 rendered evidence screenshot

WEB-Q-005 - Queue empty state

Test Result	PASS
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Queue empty state was completed successfully in the live web app.

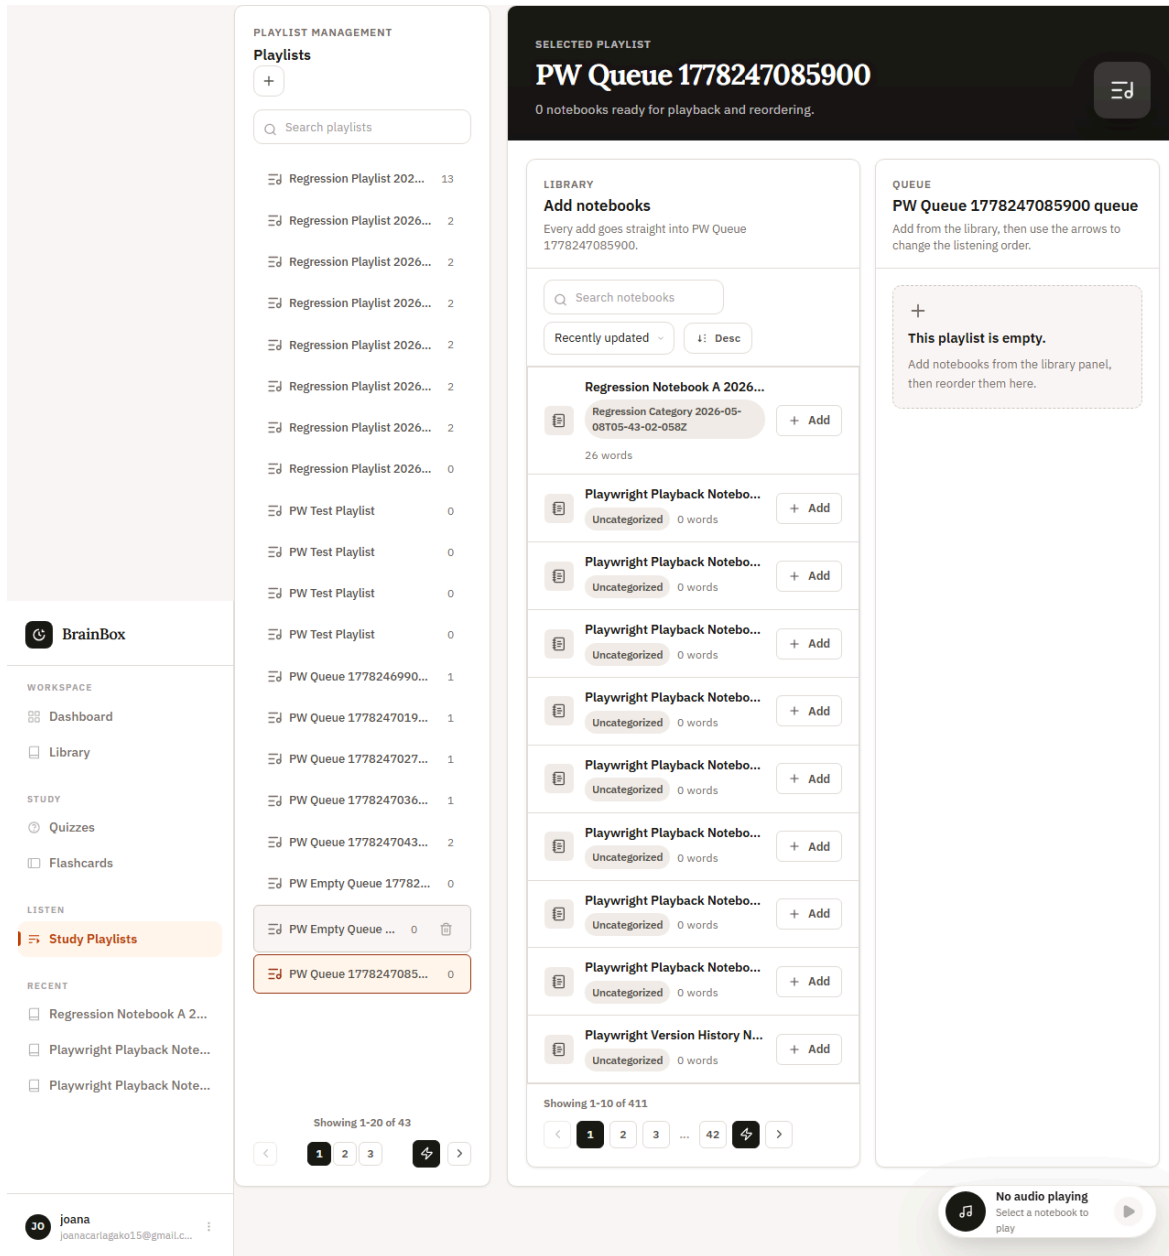

Figure 91. WEB-Q-005 rendered evidence screenshot

WEB-Q-006 - Add notebook to queue from library panel

Test Result	PASS
Execution Time	0.0 seconds
Validation	The playback or study interaction remains usable and its visible state updates correctly.
Evidence Description	Add notebook to queue from library panel was completed successfully in the live web app.
